Drawing on their extensive experience, the authors offer a detailed and authoritative exposition of family law illustrated by materials carefully selected from a wide range of sources. The book has two principal aims: to provide readers with a thorough understanding of the law relating to the family, and to stimulate critical reflection on that law. Readers are encouraged to consider how and why the law has developed as it has, what policies it is seeking to pursue, whether it achieves the right balance between the rights and interests of individual family members and the wider public interest, and how it operates in practice. Online Resources The text is supported by substantial online resources, which features regular updates on the law, further reading suggestions, and revision questions to accompany each chapter.

money management for young adults pdf: *Consumer Knowledge and Financial Decisions* Douglas J. Lamdin, 2011-11-23 There has been an increasing recognition that financial knowledge (i.e., literacy) is lacking across the population. Moreover, there is recognition that this lack of knowledge poses real problems as credit, mortgages, health insurance, retirement benefits, and savings and investment decisions become increasingly complex. *Financial Decisions Across the Lifespan* brings together the work of scholars from various disciplines (family and consumer sciences, economics, law, finance, sociology, and public policy) to provide a broad range of perspectives on financial knowledge, financial decisions, and policies. For consistency across the volume each chapter follows a similar format: (1) what individuals know or need to know (2) how what they know or need to know affects financial decisions and outcomes (3) ways in which policies or programs or financial innovations can enhance their knowledge, or decisions, or outcomes. Contributors will provide both new and existing research to create a valuable picture of the state of financial literacy and how it can be improved.
