parent teacher conference sign in sheet pdf: Accreditation a Hands on Approach for Principals Dr. Thomas Whittle, 2021-11-02 Leadership is an art form that has been practiced since the beginning of time, however it is not an exact science in which any person with a certain amount of education and some type of a checklist can guarantee student academic success. The highly recommended solutions from great educational leaders of yesterday (such as Plato, Aristotle, Jefferson, Washington, and Socrates) do not work in all situations. These successful leaders did not

just lead their followers; they taught them various leadership principles for given situations. Successful principals learn through experiences what works in a particular situation and what does not work. Remember, one can learn from a failure as well as through accomplishment. Each time you fail, it provides you with the opportunity to learn and be successful. Building principals who have mastered the art of leadership do not rely on trial and error. This Hands-On Approach for Principals provides a small resource for continuous improvement in the art of building-level leadership. The small summary of my experiences may serve as a springboard for each principal's self-awareness and discovery. This resource will assist you with the analysis of leadership situations in your building and in systematically choosing a leadership style which best fits the situation (Reflective, Relational, Collaborative, Communicative or Visionary). When you have developed an understanding of these various techniques, situations will dictate the application of each technique. You will make better decisions and that will lead to a motivated faculty and student body. This gives you a much greater chance of leading your building to student academic success. Leadership is about change; embedded in your leadership is the hope of the students. You are standing on the shoulders of great educational leaders of yesterday, looking into the future, and seeing possibilities. Face change with a smile; embrace change with determination unseen by those around you. I believe it was Reverend Doctor Martin Luther King who said, "The best leaders are determined, bold, and reject inhibitors imposed by old traditions and habits." Moving your school to full accreditation will not be easy; your goals must be clearly stated. Remember, the simplest approach will prove to be the most effective. Respect all points of view and do not set your standards too low. Find one thing in your school where all stakeholders, even the extremists, can visualize the school climate and culture better because of its success. The goal of this book is to aid you in your attempt to accreditate your school. Do not allow misguided teachers the opportunity to rob students of their academic successes and joy at the completion of your mission.

parent teacher conference sign in sheet pdf: In Common No More Arnold F. Shober, 2016-06-13 When did the Common Core evolve from pet project to pariah among educators and parents? This book examines the rise and fall of our national education standards from their inception to the present day. Parents, teachers, and political groups have waged debates over the Common Core since the standards' adoption in 2010. This timely examination explores the shifting political alliances related to the Common Core State Standards Initiative, explains why initial national support has faded, and considers the major debates running through the Common Core controversy. The book is organized around four themes of political conflict: federal versus state control, minorities versus majorities, experts versus professionals, and elites versus local preferences. The work reviews the politics of state and national standards, evaluating the political arguments for and against the Common Core: federal overreach, lack of evidence for effectiveness, lack of parental control, lack of teacher input, improper adaptive testing, overtesting, and connections to private education-reform funders and foundations. The work includes a short primer on the Common Core State Standards Initiative as well as on the Partnership for Assessment of Readiness for College and Careers (PARCC) and Smarter Balance, two state-level organizations that have worked on the standards. An informative appendix presents brief descriptions of major interest groups and think tanks involved with the standards initiative along with a timeline of American educational standards reforms and the Common Core.
