The denial may include generational abusive and/or intrusive injunctions that go against their lived truth. Psychotherapists will come away from this book with a deep understanding of the importance of attending to the degree of trauma experienced when the client's self-worth is separated from their individual truth. Moreover, where there is worth-based trauma, the psychotherapist will learn models both for helping clients gently and honestly reestablish a worthy and true sense of self and for consciously guiding clients toward recovery of human worth as a birthright.
