arctic dreams barry lopez pdf: *Handbook of Ecocriticism and Cultural Ecology* Hubert Zapf, 2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of recent literary and cultural studies. From its regional origins in late-twentieth-century Anglo-American academia, it has become a worldwide phenomenon, which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities. A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology, reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature, art, and other forms of cultural creativity for the evolution of societies towards sustainable futures. In state-of-the-art contributions by leading international scholars in the field, this handbook maps some of the most important developments in contemporary ecocritical thought. It introduces key theoretical concepts, issues, and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena.

arctic dreams barry lopez pdf: Being and Place among the Tlingit Thomas F. Thornton, 2011-07-01 In *Being and Place among the Tlingit*, anthropologist Thomas F. Thornton examines the concept of place in the language, social structure, economy, and ritual of southeast Alaska's Tlingit Indians. Place signifies not only a specific geographical location but also reveals the ways in which individuals and social groups define themselves. The notion of place consists of three dimensions - space, time, and experience - which are culturally and environmentally structured. Thornton examines each in detail to show how individual and collective Tlingit notions of place, being, and identity are formed. As he observes, despite cultural and environmental changes over time, particularly in the post-contact era since the late eighteenth century, Tlingits continue to bind themselves and their culture to places and landscapes in distinctive ways. He offers insight into how Tlingits in particular, and humans in general, conceptualize their relationship to the lands they inhabit, arguing for a study of place that considers all aspects of human interaction with landscape. In Tlingit, it is difficult even to introduce oneself without referencing places in Lingit Aani (Tlingit Country). Geographic references are embedded in personal names, clan names, house names, and, most obviously, in k-waan names, which define regions of dwelling. To say one is Sheet'ka K-waan defines one as a member of the Tlingit community that inhabits Sheet'ka (Sitka). *Being and Place among the Tlingit* makes a substantive contribution to the literature on the Tlingit, the Northwest Coast cultural area, Native American and indigenous studies, and to the growing social scientific and humanistic literature on space, place, and landscape.

arctic dreams barry lopez pdf: Babylon Michael Seymour, 2014-08-29 For two thousand years the real, physical metropolis lay buried while another, ghostly city lived on through ideas as varied as the legendary Hanging Gardens, the career of the biblical Daniel, and even the Apocalypse. More recently, the site of Babylon has been the centre of major excavation, yet the spectacular results of this work have done little to displace the many other fascinating ways in which the city has endured and reinvented itself in culture. Saddam Hussein, for one, notoriously exploited the Babylonian myth to associate himself and his regime with its glorious past. Why has Babylon so creatively fired the human imagination, with results both good and ill? Why has it been enthralling to so many, and for so long? In exploring answers, Michael Seymour ranges extensively over space and time and embraces art, archaeology, history and literature. From Hammurabi and Nebuchadnezzar, via Strabo and Diodorus, to the Book of Revelation, Bruegel, Rembrandt, Voltaire, William Blake and modern interpreters like Umberto Eco, Italo Calvino and Gore Vidal, the author brings to light a

carnival of disparate sources dominated by powerful and intoxicating ideas such as the Tower of Babel and the city of sin. *Babylon: Legend, History and the Ancient City* weighs idea against reality, fiction against fact, conjuring the fascinating story of this ancient metropolis and its legacy to brilliant life as never before.

arctic dreams barry lopez pdf: *Contesting the Arctic* Philip E. Steinberg, Jeremy Tasch, Hannes Gerhardt, Adam Keul, Elizabeth A. Nyman, 2015-02-16 As climate change makes the Arctic a region of key political interest, so questions of sovereignty are once more drawing international attention. The promise of new sources of mineral wealth and energy, and of new transportation routes, has seen countries expand their sovereignty claims. Increasingly, interested parties from both within and beyond the region, including states, indigenous groups, corporate organizations, and NGOs are pursuing their visions for the Arctic. What form of political organization should prevail? *Contesting the Arctic* provides a map of potential governance options for the Arctic and addresses and evaluates the ways in which Arctic stakeholders throughout the region are seeking to pursue them.

arctic dreams barry lopez pdf: *Wonder in Contemporary Artistic Practice* Christian Mieves, Irene Brown, 2017-01-12 Wonder has an established link to the history and philosophy of science. However, there is little acknowledgement of the relationship between the visual arts and wonder. This book presents a new perspective on this overlooked connection, allowing a unique insight into the role of wonder in contemporary visual practice. Artists, curators and art theorists give accounts of their approach to wonder through the use of materials, objects and ways of exhibiting. These accounts not only raise issues of a particular relevance to the way in which we encounter our reality today but ask to what extent artists utilize the function of wonder purposely in their work.

arctic dreams barry lopez pdf: *Anthropocene Reading* Tobias Menely, Jesse Oak Taylor, 2017-10-13 Few terms have garnered more attention recently in the sciences, humanities, and public sphere than the Anthropocene, the proposed epoch in which a human "signature" appears in the lithostratigraphic record. *Anthropocene Reading* considers the implications of this concept for literary history and critical method. Entering into conversation with geologists and geographers, this volume reinterprets the cultural past in relation to the anthropogenic transformation of the Earth system while showcasing how literary analysis may help us conceptualize this geohistorical event. The contributors examine how a range of literary texts, from *The Tempest* to contemporary dystopian novels to the poetry of Emily Dickinson, mediate the convergence of the social institutions, energy regimes, and planetary systems that support the reproduction of life. They explore the long-standing dialogue between imaginative literature and the earth sciences and show how scientists, novelists, and poets represent intersections of geological and human timescales, the deep past and a posthuman future, political exigency and the carbon cycle. Accessibly written and representing a range of methodological perspectives, the essays in this volume consider what it means to read literary history in the Anthropocene. Contributors include Juliana Chow, Jeffrey Jerome Cohen, Thomas H. Ford, Anne-Lise François, Noah Heringman, Matt Hooley, Stephanie LeMenager, Dana Luciano, Steve Mentz, Benjamin Morgan, Justin Neuman, Jennifer Wenzel, and Derek Woods.

arctic dreams barry lopez pdf: Choreographing the North Bridget Cauthery, 2024-12-30
Choreographing the North examines 11 contemporary dance pieces that perform northern culture, landscape, folklore, and ideas of North. The choreographers, from Canada, the United States, the United Kingdom, Belgium, Luxembourg, Australia, and Argentina, translate their real or imagined journeys to the North for stage and/or screen. This book examines the ways Indigenous subjects and subjectivities have been diminished and/or distorted and considers how that diminishment has fuelled misrepresentation both inside and outside the field of contemporary dance. Where Indigenous presence is represented in dances about the North, it is as discarnate storytellers or "everyman" pastoral figures against backdrops of ice and snow. Indigenous presence is there but it is romanticized, caricatured, flattened. Using these works as moving texts Cauthery argues that, in many regards, these dances are colonizing acts that either ignore or erase the land and people upon which they are based. In analyzing and deconstructing these dances, this book acknowledges the land- and culture-based inheritances embedded in and performed through the works themselves. This study will be of great interest to students and scholars in dance studies, theatre and performance studies, and cultural studies, as well as those interested in environmental psychology, human geography, and the expanding field of Arctic humanities.

arctic dreams barry lopez pdf: Design and the Built Environment of the Arctic Leena Cho, Matthew Jull, 2023-12-20
Design and the Built Environment of the Arctic is a concise introductory guide to the design and planning of the built environments in the Arctic region. As the global forces of change are becoming more pronounced in the Arctic, the future trajectories for living environments, city-making processes, and their adaptive capacities need to be addressed directly. This book presents 11 new and original contributions from both leading and emerging scholars and practitioners, positioning the Arctic as a dynamic, diverse, and lived place at the nexus of unprecedented socioenvironmental transformations. The volume offers key concepts for understanding and spatializing Arctic cities and landscapes; similarities and differences in the development of design and planning approaches responsive to specific climatic and cultural conditions; and historical and geographic case studies that provide unique perspectives for the management of the built environment, from the scales of a building and infrastructure to cities and territories. Altogether, the contributions expand regional Arctic design scholarship to understand how the variability of the Arctic context influences the designed urban, architecture, and landscape systems, and offer numerous lessons for design and other forms of spatial practice both within and beyond the Arctic. This is a unique resource for researchers, creative practitioners, policymakers, and community decision-makers, as well as for advanced undergraduate and graduate students.

arctic dreams barry lopez pdf: Inveterate Walkers, Literary Minds Anandarup Biswas,

2025-02-18 *Inveterate Walkers, Literary Minds: Bengal's Pilgrims and Their Himalayan Journeys* brings under its critical focus the writings of Bengal's travellers (mostly pilgrims) who went, on foot, into Himalayan trails from the mid-nineteenth to the early and mid-twentieth century. Unlike many European travellers and climbers in the age of empire, who saw the mountain as an obstacle overcoming which was a matter of individual and national pride, these modest walkers, unkempt and raddled in their meagre ways of travel, produced a discourse of surrender in their intimate and reflecting engagement with the mountains. The book examines the writings of Jadunath Sharbadhikary, the first among Bengal's pilgrims whose Himalayan travels were published as a book and the more popular writers including Jaladhar Sen, Umaprasad Mukhopadhyay and Abadhut. It also traces emergent selfhoods and complex subjectivities of women travellers in particular, such as Ratnamala Devi, Rani Chanda and Nabaneeta Deb Sen whose accounts reveal both guarded, hesitant voices and self-assured, confident enunciation of the self.

Their unique ecosystems support a huge range of marine and other wildlife: human activity too is profoundly influenced by their waters and shores. The Solway Firth—the crooked finger of water that both unites and divides Scotland and England—is a beautiful yet unpredictable place and one of the least-industrialized natural large estuaries in Europe. Its history, geology and turbulent character have long affected the way its inhabitants, both human and non-human, have learnt to live along and within its ever-changing margins. "Lingard's scientific knowledge of the area and its multitudinous inhabitants [is] delivered in riveting prose. This is deep and beautiful natural history writing."* —BBC Countryfile Magazine "Like a hungry gull, Ann Lingard explores her beloved Solway shoreline for every living detail that catches her eye. arctic dreams barry lopez pdf: *Sand, Snow, and Stardust* Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand, survive, and command harsh environments worldwide—and beyond. Deserts, the Arctic, outer space—these extreme environments are often seen as inhospitable places at the edges of our maps. But from the 1940s through the 1960s, spurred by the diverse and unfamiliar regions the US military had navigated during World War II, the United States defense establishment took a keen interest in these places, dispatching troops to the Aleutian Islands, North Africa, the South Pacific, and beyond. To preserve the country's status as a superpower after the war, to pave runways and build bridges, engineers had to understand and then conquer dunes, permafrost, and even the surface of the moon. *Sand, Snow, and Stardust* explores how the US military generated a new understanding of these environments and attempted to master them, intending to cement America's planetary power. Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology. From General George S. Patton learning the hard way that the desert is not always hot, to the challenges of constructing a scientific research base under the Arctic ice, to the sheer implausibility of modeling Martian environments on Earth, Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments. Even decades after the first manned space flight, plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth. An entertaining survey of the relationship between environmental history and military might, *Sand, Snow, and Stardust* also serves as a warning about the further transformation of the planet—whether through desertification, melting ice caps, or attempts to escape it entirely.

arctic dreams barry lopez pdf: *Terrible Beauty* Auden Schendler, 2024-11-26 A firsthand,

trench-view story of the failure of the modern environmental movement—and an inspiring prescription for change. Something's gone badly awry with environmentalism. We faithfully separate our waste into different streams, but wonder whether it really makes a difference. Global companies announce their commitment to carbon negativity while simultaneously sponsoring oil conferences. American businesses, communities, and individuals assiduously measure their carbon footprints, then implement voluntary emissions-reduction programs, all while trumpeting their do-gooderism. The problem is, none of this—whether individual efforts or corporate sustainability tactics—will make a dent in solving the civilizational threat of climate change. We only pretend it will, at our peril. As sustainability veteran Auden Schendler argues in this provocative, powerful book, we're living a big green lie. The hard truth is that much of the modern environmental road map could have been written by the fossil fuel industry specifically to avoid disrupting the status quo. We have become somehow complicit. But there is another truth: while ineffective or duplicitous environmentalism has become standard practice, we all have friends and family we love and care about, whose future depends on solving the problem of climate change. Conscience tells us we have an obligation to repair the world. How can our common dreams be so at odds with our daily practice? And how might we meld our spirit and our passion to create a better future? Schendler meets this profound contradiction head-on—with a bracing critique, moving personal stories of parenthood and service, and innovative, real-world methods to tackle climate change at the corporate, community, and individual levels. *Terrible Beauty* is a unique and inspiring call for a new environmentalism, showing us that the key to saving the planet is to tap into our own humanity.

arctic dreams barry lopez pdf: *Environmental Hermeneutics in the Anthropocene* David Utsler, Forrest Clingerman, Brian Treanor, 2025-10-15 *Environmental Hermeneutics in the Anthropocene* is a diverse collection of essays that approach contemporary environmental problems with the tools and perspectives provided by the tradition of philosophical hermeneutics, advanced by philosophers such as Martin Heidegger, Hans-Georg Gadamer, and Paul Ricoeur. Engaging both established and new voices, this book presents a significant contribution to the field by expanding the scope of philosophical hermeneutics to environmental issues. It addresses a broad scope of environmental topics such as the Anthropocene, climate change, degrowth, environmental justice, the limits of language in understanding nature, and environmental aesthetics in environmental practice. Together, the chapters show the crisis of regional and global environmental problems to be in part a crisis of interpretation. The ways that human beings understand their relationship to environments shape and determine how to act and live within places. Yet the values and ideals that different people have about their lived environments often come into conflict. Thus hermeneutics plays an important role in environmental discourse: it helps adjudicate these conflicting understandings. This collection of essays demonstrates the unique way that environmental hermeneutics can be employed to understand environments in this age of the Anthropocene. It will appeal to researchers and upper-level students in environmental humanities, environmental studies, ethics and philosophy.

arctic dreams barry lopez pdf: *Getting Green Done (EasyRead Large Bold Edition)* Auden Schendler, 2010 Auden Schendler serves as the sustainability director of the Aspen Skiing Company, which operates the Aspen/Snowmass resort complex in Colorado. He discusses his successes and failures in promoting sustainability to illustrate the lessons he has learned. Proving refreshingly open, Schendler criticizes his colleagues, including his previous CEO, who told Schendler he could introduce a green initiative only over my dead body. Schendler calls for transparency and an end to

greenwashing, demanding that corporations, nonprofit organizations, and governmental bodies clarify which sustainability projects work and which do not, and pursue the ones that make a difference. getAbstract recommends this valuable guide to executives, government leaders and concerned citizens who want to take meaningful action against global warming.

arctic dreams barry lopez pdf: *Philosophy in an African Place* Bruce B. Janz, 2009-01-01
Philosophy in an African Place shifts the central question of African philosophy from Is there an African philosophy? to What is it to do philosophy in this (African) place? This book both opens up new questions within the field and also establishes philosophy-in-place, a mode of philosophy which begins from the places in which concepts have currency and shows how a truly creative philosophy can emerge from focusing on questioning, listening, and attention to difference.
