as long as grass grows pdf: As Long as Grass Grows Dina Gilio-Whitaker, 2019-04-02 The story of Native peoples' resistance to environmental injustice and land incursions, and a call for environmentalists to learn from the Indigenous community's rich history of activism Through the unique lens of "Indigenized environmental justice," Indigenous researcher and activist Dina Gilio-Whitaker explores the fraught history of treaty violations, struggles for food and water security, and protection of sacred sites, while highlighting the important leadership of Indigenous women in this centuries-long struggle. As Long As Grass Grows gives readers an accessible history of Indigenous resistance to government and corporate incursions on their lands and offers new approaches to environmental justice activism and policy. Throughout 2016, the Standing Rock protest put a national spotlight on Indigenous activists, but it also underscored how little Americans know about the longtime historical tensions between Native peoples and the mainstream environmental movement. Ultimately, she argues, modern environmentalists must look to the history of Indigenous resistance for wisdom and inspiration in our common fight for a just and sustainable future.

as long as grass grows pdf: *And Still the Waters Run* Angie Debo, 2022-10-25 The classic book that exposed the scandal of the dispossession of native land by American settlers *And Still the Waters Run* tells the tragic story of the liquidation of the independent Indian republics of the Choctaws, Chickasaws, Cherokees, Creeks, and Seminoles, known as the Five Civilized Tribes. At the turn of the twentieth century, the tribes owned the eastern half of what is now Oklahoma, a territory immensely wealthy in farmland, forests, coal, and oil. Their political and economic status was guaranteed by the federal government—until American settlers arrived. Congress abrogated treaties that it had promised would last “as long as the waters run,” and within a generation, the tribes were systematically stripped of their holdings, and were rescued from starvation only through public charity. Called a “work of art” by writer Oliver La Farge, *And Still the Waters Run* was so controversial when it was first published that Angie Debo was banned from teaching in Oklahoma for many years. Now with an incisive foreword by Amanda Cobb-Greetham, here is the acclaimed book that first documented the scandalous founding of Oklahoma on native land.

as long as grass grows pdf: *True West* Betsy Gaines Quammen, 2023-10-24 *True West* explores myths of the West and how, if left unexamined, they distort the realities of the present and exacerbate polarizations. These misperceptions about land, politics, liberty, and self-determination threaten the wellbeing of western communities overrun by newcomers seeking a dream—and the country unless America recognizes the dangers of building a national identity on illusion. Betsy Gaines Quammen interrogates it all by listening, carefully, to people from varying political and cultural perspectives as she seeks to reconcile the deep anger and broad misunderstandings that linger amid myths that define and impede the West and America.

as long as grass grows pdf: *Urban Cascadia and the Pursuit of Environmental Justice* Nik

Janos, Corina McKendry, 2021-10-26 How histories of environmental inequalities and settler colonialism undercut a famously “green” region In Portland’s harbor, environmental justice groups challenge the EPA for a more thorough cleanup of the Willamette River. Near Olympia, the Puyallup assert their tribal sovereignty and treaty rights to fish. Seattle housing activists demand that Amazon pay to address the affordability crisis it helped create. Urban Cascadia, the infrastructure, social networks, built environments, and non-human animals and plants that are interconnected in the increasingly urbanized bioregion that surrounds Portland, Seattle, and Vancouver, enjoys a reputation for progressive ambitions and forward-thinking green urbanism. Yet legacies of settler colonialism and environmental inequalities contradict these ambitions, even as people strive to achieve those progressive ideals. In this edited volume, historians, geographers, urbanists, and other scholars critically examine these contradictions to better understand the capitalist urbanization of nature, the creation of social and environmental inequalities, and the movements to fight for social and environmental justice. Neither a story of green disillusion nor one of green boosterism, Urban Cascadia and the Pursuit of Environmental Justice reveals how the region can address broader issues of environmental justice, Indigenous sovereignty, and the politics of environmental change.

as long as grass grows pdf: *Reconciliation in a Michigan Watershed* Gail Gunst Heffner, David P. Warners, 2024-05-01 Like many American urban waterways, Ken-O-Sha has been in decline for nearly two hundred years. Once life-supporting, the waterway now known as Plaster Creek is life-threatening. In this provocative book, scholars and environmentalists Gail Gunst Heffner and David P. Warners explore the watershed’s ecological, social, spiritual, and economic history to determine what caused the damage, and describe more recent efforts to repair it. Heffner and Warners provide insight into the concept of reconciliation ecology, as enacted through their group, Plaster Creek Stewards, who together with community partners refuse to accept the status quo of a contaminated creek unfit for children’s play, severely reduced biological diversity, and environmental injustices. Their work reveals that reconciliation ecology needs to focus not only on repairing damaged human-nature relationships, but also on the relationships between people groups, including Indigenous North Americans and the descendants of European colonizers.

as long as grass grows pdf: *Ground Truths* Chad Raphael, Martha Matsuoka, 2024-01-09 A free ebook version of this title is available through Luminos, University of California Press’s Open Access publishing program. Visit www.luminosoa.org to learn more. This is the first book devoted entirely to summarizing the body of community-engaged research on environmental justice, how we can conduct more of it, and how we can do it better. It shows how community-engaged research makes unique contributions to environmental justice for Black, Indigenous, people of color, and low-income communities by centering local knowledge, building truth from the ground up, producing actionable data that can influence decisions, and transforming researchers’ relationships to communities for equity and mutual benefit. The book offers a critical synthesis of relevant research in many fields, outlines the main steps in conducting community-engaged research, evaluates the major research methods used, suggests new directions, and addresses overcoming institutional barriers to scholarship in academia. The coauthors employ an original framework that shows how community-engaged research and environmental justice align, which links research on the many topics treated in the chapters—from public health, urban planning, and conservation to law and policy, community economic development, and food justice and sovereignty.

as long as grass grows pdf: Environmental Justice in North America Paul C. Rosier, 2023-11-01 Emphasizing the voices of activists, this book's diverse contributors examine communities' common experiences with environmental injustice, how they organize to address it, and the ways in which their campaigns intersect with related movements such as Black Lives Matter and Indigenous sovereignty. The global COVID-19 pandemic exposed the ways in which BIPOC (Black, Indigenous, People of Color) communities and white working-class communities have suffered disproportionately from the crisis due to sustained exposure to toxic land, air, and water, creating a new urgency for addressing underlying conditions of systemic racism and poverty in North America. In addition to exploring the historical roots of the Environmental Justice movement in the 1980s and 1990s, the volume offers coverage of recent events such as the DAPL pipeline controversy, the Flint water crisis, and the rise of climate justice. The collection incorporates the experiences of rural and urban communities, Alaska Natives, Native Hawaiians, Puerto Ricans, and Indigenous peoples in the U.S., Canada, and Mexico. The chapters offer instructors, undergraduate and graduate students, and general readers a range of accessible case studies that create opportunities for comparative and intersectional analysis across geographical and ethnic boundaries.

as long as grass grows pdf: Black Snake Katherine Wiltenburg Todrys, 2021-06 2022 High Plains Book Award Winner for First Book 2022 Eric Hoffer Award Grand Prize Short List 2022 Eric Hoffer Award Honorable Mention in Culture 2022 IPPY Gold Medal in Environment/Ecology 2022 Next Generation Indie Book Award Finalist in Regional Nonfiction 2022 Montaigne Medal Finalist 2021 Foreword Indies Honorable Mention for History The controversial Dakota Access Pipeline (DAPL) made headlines around the world in 2016. Supporters called the pipeline key to safely transporting American oil from the Bakken oil fields of the northern plains to markets nationwide, essential to both national security and prosperity. Native activists named it the "black snake," referring to an ancient prophecy about a terrible snake that would one day devour the earth. Activists rallied near the Standing Rock Reservation in North Dakota for months in opposition to DAPL, winning an unprecedented but temporary victory before the federal government ultimately permitted the pipeline. Oil began flowing on June 1, 2017. The water protector camps drew global support and united more than three hundred tribes in perhaps the largest Native alliance in U.S. history. While it faced violent opposition, the peaceful movement against DAPL has become one of the most crucial human rights movements of our time. *Black Snake* is the story of four leaders—LaDonna Allard, Jasilyn Charger, Lisa DeVille, and Kandi White—and their fight against the pipeline. It is the story of Native nations combating environmental injustice and longtime discrimination and rebuilding their communities. It is the story of a new generation of environmental activists, galvanized at Standing Rock, becoming the protectors of America's natural resources.

as long as grass grows pdf: Beyond Neighbourhood Planning Andy Yuille, 2023-06-30 The past three decades have seen an international 'turn to participation' - letting those who will be affected by outcomes play an active role in decision-making - but there is widespread dissatisfaction with actual instances of citizen-state engagement. Neighbourhood planning in England exemplifies this contradiction. This innovative analysis brings theory, research and practice together to give insights into how and why citizen voices become effective or get excluded. Ethnographic data from detailed studies of neighbourhood planning are used to illustrate the constraints and possibilities of a wide range of participatory governance practices and social movements. The book concludes with recommendations to re-invigorate community involvement in planning and beyond.

as long as grass grows pdf: Building Abolition Kelly Montford, Chloë Taylor, 2021-07-29 *Building Abolition: Decarceration and Social Justice* explores the intersections of the carceral in projects of oppression, while at the same time providing intellectual, pragmatic, and undetermined paths toward abolition. Prison abolition is at once about the institution of the prison, and a broad,

intersectional political project calling for the end of the social structured by settler colonialism, anti-black racism, and related oppressions. Beyond this, prison abolition is a constructive project that imagines and strives for a transformed world in which justice is not equated with punishment, and accountability is not equated with caging. Composed of sixteen chapters by an international team of scholars and activists, with a Foreword by Perry Zurn and an Afterword by Justin Piché, the book is divided into four themes: • Prisons and Racism • Prisons and Settler Colonialism • Anti-Carceral Feminisms • Multispecies Carcerality. This book will be of interest to undergraduate and postgraduate students, activists, and scholars working in the areas of Critical Prison Studies, Critical Criminology, Native Studies, Postcolonial Studies, Black Studies, Critical Race Studies, Gender and Sexuality Studies, and Critical Animal Studies, with particular chapters being of interest to scholars and students in other fields, such as, Feminist Legal Studies, Animal Law, Critical Disability Studies, Queer Theory, and Transnational Feminisms.

as long as grass grows pdf: Teaching Climate Change to Children Rebecca Woodard, Kristine M. Schutz, 2024 Teaching Climate Change to Children describes the journey of two literacy researchers to learn about climate change and support relevant literacy pedagogy for young children (pre-K-6). The authors argue that climate change and social justice are inextricable from each other; that children in the younger grades are capable of learning about climate change; and that reading, writing, and language study is well-suited to this work. Three anchoring themes are offered to support literacy climate pedagogy—interconnectivity, relationality, and action—with rich classroom examples and different entry points to engage with these themes, either by “starting small” or “going big.” The text includes chapters on the importance of taking an emotionally affirming stance and on the potential of incorporating arts-based methods. With love for the Earth and one another at its core, this accessible book takes a broad view of what it means to cultivate sustainable futures for our planet, for teachers, and for children in today’s schools. Book Features: A unique focus on teaching about climate change to young children, as opposed to adolescents. Insights drawn from a yearlong teacher inquiry group with classroom teachers and from literacy methods courses with preservice teachers. Explicit attention to the importance of humanizing and care-based practices in literacy climate pedagogy. Classroom examples collected across four urban public schools where teachers used the activities and resources discussed in the book. User-friendly textboxes with suggestions and questions to guide discussion, reflection, and action.

as long as grass grows pdf: The Settler Sea Traci Brynne Voyles, 2021-11 2022 Choice Outstanding Academic Title 2022 WHA Caughey Western History Prize for the most distinguished book on the American West Can a sea be a settler? What if it is a sea that exists only in the form of incongruous, head-scratching contradictions: a wetland in a desert, a wildlife refuge that poisons birds, a body of water in which fish suffocate? Traci Brynne Voyles's history of the Salton Sea examines how settler colonialism restructures physical environments in ways that further Indigenous dispossession, racial capitalism, and degradation of the natural world. In other words, The Settler Sea asks how settler colonialism entraps nature to do settlers' work for them. The Salton Sea, Southern California's largest inland body of water, occupies the space between the lush agricultural farmland of the Imperial Valley and the austere desert called America's Sahara. The sea sits near the boundary between the United States and Mexico and lies at the often-contested intersections of the sovereign lands of the Torres Martinez Desert Cahuilla and the state of California. Created in 1905, when overflow from the Colorado River combined with a poorly constructed irrigation system to cause the whole river to flow into the desert, this human-maintained body of water has been considered a looming environmental disaster. The Salton Sea's very precariousness--the way it sits uncomfortably between worlds, existing always in the interstices of human and natural influences, between desert and wetland, between the skyward pull of the sun and the constant inflow of polluted water--is both a symptom and symbol of the larger precariousness of settler relationships to the environment, in the West and beyond. Voyles provides an innovative exploration of the Salton Sea, looking to the ways the sea, its origins, and its role in human life have been vital to the people who call this region home.

as long as grass grows pdf: *Living West as Feminists* Krista Comer, 2024-11 In the aftermath of the 2020 U.S. presidential election, Krista Comer invited fifteen colleagues into a conversation about feminism and the U.S. West. From her travels over some thirteen thousand miles to places chosen by participants comes a remarkable series of dialogues focusing on questions about the where of us—the places that we love or belong, or don't belong, and who we are in them. *Living West as Feminists* moves from travelogue to interviews to critical meditations. It asks who one's people are, to whom one feels accountable, and how we might make peace with the itinerant, often displaced lives of late-stage capitalist culture. Ultimately, the book understands feminism not as a specific politics or set of theories but as a network of relations. Its coalitional perspective allows for coming together even while distinguishing feminists who write from Black, Indigenous, queer, Chicana, and materialist perspectives. Feminist rest areas, in which relational securities find footing, can create the most priceless resource in desperate times: well-being and political hope.

as long as grass grows pdf: *Anti-Oppressive Education in "Elite" Schools* Katy Swalwell, Daniel Spikes, 2021 This collection of groundbreaking essays brings together a diverse group of experts who are researching, theorizing, and enacting anti-oppressive education in "elite" schooling environments—that is, schools imbued with wealth and whiteness. This volume explores how those who are in a position of power can be educated to take active steps that reduce and disrupt oppression. Each essayist, writing with practitioners in mind, responds to one of four guiding questions from their unique point of view as an educator, student, or researcher: Why does this work matter? What is needed to start and sustain it? What does it look like in practice? What are the common pitfalls and how can they be avoided? Readers are encouraged to mull over various perspectives and experiences to find answers that fit their own contexts. This important book addresses the need to educate for social justice within economically privileged settings where power can be leveraged and repurposed for the benefit of a diverse society. Book Features: Identifies ethical and effective pedagogical and curricular approaches to use with students in "elite" school settings. Examines what it means to work or learn in "elite" educational spaces for those who hold nondominant identities. Explores the special obligations and responsibilities these schools require furthering justice. as long as grass grows pdf: *The Routledge Handbook of Crime Fiction and Ecology* Nathan Ashman, 2023-10-27 The Routledge Handbook of Crime Fiction and Ecology is the first comprehensive examination of crime fiction and ecocriticism. Across 33 innovative chapters from leading international scholars, this Handbook considers an emergent field of contemporary crime narratives that are actively responding to a diverse assemblage of global environmental concerns, whilst also opening up 'classic' crime fictions and writers to new ecocritical perspectives. Rigorously engaged with cutting-edge critical trends, it places the familiar staples of crime fiction scholarship – from thematic to formal approaches – in conversation with a number of urgent ecological theories and ideas, covering subjects such as environmental security, environmental justice, slow violence, ecofeminism and animal studies. The Routledge Handbook of Crime Fiction and Ecology is an essential introduction to this new and dynamic research field for both students and scholars alike.

as long as grass grows pdf: *Working across Lines* Corrie Grosse, 2022-07-12 How are communities uniting against fracking and tar sands to change our energy future? *Working across Lines* offers a detailed comparative analysis of climate justice coalitions in California and Idaho—two states with distinct fossil fuel histories, environmental contexts, and political cultures. Drawing on ethnographic evidence from 106 in-depth interviews and three years of participant observation, Corrie Grosse investigates the ways people build effective energy justice coalitions across differences in political views, race and ethnicity, age, and strategic preferences. This book argues for four practices that are critical for movement building: focusing on core values of justice, accountability, and integrity; identifying the roots of injustice; cultivating relationships among

activists; and welcoming difference. In focusing on coalitions related to energy and climate justice, Grosse provides important models for bridging divides to reach common goals. These lessons are more relevant than ever.

as long as grass grows pdf: To Know the World Mitchell Thomashow, 2020-11-03 Why we must rethink our residency on the planet to understand the connected challenges of tribalism, inequity, climate justice, and democracy. How can we respond to the current planetary ecological emergency? In *To Know the World*, Mitchell Thomashow proposes that we revitalize, revisit, and reinvigorate how we think about our residency on Earth. First, we must understand that the major challenges of our time--migration, race, inequity, climate justice, and democracy--connect to the biosphere. Traditional environmental education has accomplished much, but it has not been able to stem the inexorable decline of global ecosystems. Thomashow, the former president of a college dedicated to sustainability, describes instead environmental learning, a term signifying that our relationship to the biosphere must be front and center in all aspects of our daily lives. In this illuminating book, he provides rationales, narratives, and approaches for doing just that.
