cultural anthropology a toolkit for a global age pdf: Unraveling Assumptions Karen L. Suyemoto, Roxanne A. Donovan, Grace S. Kim, 2022-06-01 Unraveling Assumptions: A Primer for Understanding Oppression and Privilege offers fundamental understandings of concepts and frameworks related to diversity and social justice. Aimed at university and community audiences, it offers an introductory exploration of power, privilege, and oppression as foundations of systems of inequality and examines complexities within meanings and lived experiences of race, ethnicity, gender, sexuality, disability, and social class. After considering why it is so difficult to engage these issues, the authors explore meanings and impacts of power, privilege, and oppression as a primary

lens of analysis. Subsequent chapters offer definitions of race, ethnicity, gender, sexuality, disability and social class, identifying erroneous assumptions and challenging the tendency to oversimplify and decontextualize. Meanings, identities, and effects of oppression and privilege are central foci within each chapter. The book ends with a chapter examining ways that individuals may take action as allies and advocates to resist oppression. Throughout the book, *Unraveling Assumptions* makes connections among individual, interpersonal, and systemic levels of inequality, while focusing on relational and psychological implications for lived experience—including the reader's lived experience. By integrating social science research with concrete examples and personal reflection, this concise, introductory level text invites the reader to consider the costs of systemic hierarchies for all people and envision possible alternatives to participating in oppressive hierarchy. *Unraveling Assumptions* is a book for students and community to learn about privilege and oppression. cultural anthropology a toolkit for a global age pdf: *Class Interruptions* Robin Brooks, 2021-12-20 As downward mobility continues to be an international issue, Robin Brooks offers a timely intervention between the humanities and social sciences by examining how Black women's cultural production engages debates about the growth in income and wealth gaps in global society during the late twentieth and early twenty-first centuries. Using an interdisciplinary approach, this innovative book employs major contemporary texts by both African American and Caribbean writers—Toni Morrison, Gloria Naylor, Dawn Turner, Olive Senior, Oonya Kempadoo, Merle Hodge, and Diana McCauley—to demonstrate how neoliberalism, within the broader framework of racial capitalism, reframes structural inequalities as personal failures, thus obscuring how to improve unjust conditions. Through interviews with authors, textual analyses of the fiction, and a diagramming of cross-class relationships, Brooks offers compelling new insight on literary portrayals of class inequalities and division. She expands the scope of how the Black women's literary tradition, since the 1970s, has been conceptualized by repositioning the importance of class and explores why the imagination matters as we think about novel ways to address long-standing and simultaneously evolving issues.

cultural anthropology a toolkit for a global age pdf: *Developing the Global Student* David Killick, 2014-06-27 *Developing the Global Student* addresses the question of how students of higher education can emerge from their university life better equipped to dwell more effectively, ethically, and comfortably amidst the turmoils of a globalizing world. It does this from a number of theoretical perspectives, illustrating the nature of the personal and educational challenges facing the individual student and the teaching professional. The book explores the massive social changes wrought by the technologies and mobilities of globalization, particularly how present and future generations will relate to, work with and dwell alongside the global other. It outlines a range of social, psychological and intercultural perspectives on human tendencies to seek out comfort among communities of similitude, and illustrates how the experience of life in a global era requires us to transcend the limits of our own biographies and approach university education as a matter of knowledge deconstruction and identity reconstruction, rather than reproduction. This book brings these

considerations directly into the daily business of higher education by drawing out the implications for practice at a number of levels. It examines: the implications of a globally interconnected world and individual biographies for the design of the curriculum; a holistic view of learning in the context of the need to develop the global self; what the impact on non-academic practice will be if universities as institutions are to enable these changes; ways in which the broader student community can transform to offer an experience which is more supportive of the development of global selves. Linking theoretical perspectives to present a model of learning as change, this book will be of great interest to those working in higher education, and particularly to anyone involved in policy design and the delivery of the student experience.

cultural anthropology a toolkit for a global age pdf: Student Learning Abroad Michael Vande Berg, R. Michael Paige, Kris Hemming Lou, 2023-07-03 A central purpose of this book is to question the claims commonly made about the educational benefits of study abroad. Traditional metrics of enrollment increases and student self-report, and practices of structural immersion, are being questioned as educators voice growing uncertainty about what students are or are not in fact learning abroad. This book looks into whether these criticisms are justified—and what can be done if they are. The contributors to this book offer a counter-narrative to common views that learning takes place simply through students studying elsewhere, or through their enrolling in programs that take steps structurally to “immerse” them in the experience abroad. Student Learning Abroad reviews the dominant paradigms of study abroad; marshals rigorous research findings, with emphasis on recent studies that offer convincing evidence about what undergraduates are or are not learning; brings to bear the latest knowledge about human learning and development that raises questions about the very foundations of current theory and practice; and presents six examples of study abroad courses or programs whose interventions apply this knowledge. This book provokes readers to reconsider long-held assumptions, beliefs and practices about teaching and learning in study abroad and to reexamine the design and delivery of their programs. In doing so, it provides a new foundation for responding to the question that may faculty and staff are now asking: What do I need to know, and what do I need to be able to do, to help my students learn and develop more effectively abroad? Michael Paige (2007) and Michael Vande Berg (2012) are recipients of the Forum on Education Abroad’s Peter A. Wollitzer Award.
