At McGraw-Hill, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in Human Development courses. The most common topics raised include managing the vast amount of content inherent to a Lifespan course and ensuring the dependability of the assigned material—is it current and accurate? Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. And our new Milestones of development help bring the course material to life, allowing students to witness development as it unfolds. Connecting to today's student, connecting research to what we know about development; connecting developmental processes; and connecting lifespan development to the real world are the 4 key ways that the connections theme has shaped this 13th edition. All of this material is informed by Life-Span Development's unique board of expert contributors—a who's who of developmental psychology—ensuring that the material is as accurate and up-to-date as possible.
