strategies for effective communication pdf: *Sustainable Development Policy Directory* W. Alan Strong, Lesley Hemphill, 2008-04-15 This Directory means that a whole range of built environment professionals need never be caught out by the perversities of policy – in its formulation or on its journey into the real life of you and me. To have in one place the means of not only burrowing down into any one policy, but also of exploring the interconnections is a precious resource for any professional – ‘sustainability literate’ or not. Today, nobody who delivers our built environment can be excused from taking responsibility for the future. Armed with this Directory their contribution can only be made more effective. Sara Parkin OBE Forum for the Future This desk-top reference on sustainable development provides essential information for all who need to be up-to-date and familiar with the implications of the legal, fiscal and planning frameworks around the global and local sustainability agenda. It is relevant to a range of organisations and individuals – from national and local authorities, professional bodies, built environment professions, academia, environmental consultancies, non-governmental organisations and others. Carefully designed to facilitate access for a diverse range of stakeholders, it covers international, European, British and local policies in key built environment themes, and develops their inter-relationship to sustainable development. The Directory addresses each theme in a series of tables which summarise the policy purpose and also provide web-links to view the specific policy documents. The themes covered are: · Biodiversity · Climate Change · Construction · Energy · Environment · Planning · Pollution · Social Issues · Sustainable Development Policy and Practice · Transport · Urban Development · Waste Management · Water Other books of interest: The Green Guide to Specification Anderson ISBN: 1405119616 Smart & Sustainable Built Environments Yang Hardback ISBN: 1405124229 Sustainable Property Development Keeping Paperback ISBN: 0632058048 Previously Developed

Other chapters discuss evaluation of surveillance methods, ethical considerations and legal issues. The book concludes with a review of historical lessons learned from the application of surveillance in disease control—for smallpox in the 1970s and for severe acute respiratory syndrome (SARS) in 2003. A comprehensive resource to improve the tracking of infectious diseases Offers perspectives on best practices through examples of a wide variety of surveillance systems from around the globe Acts as a starting point for design of new surveillance systems Serves as an easy reference for key information Designed for frontline public health practitioners engaged in communicable disease control, epidemiologists, clinical microbiologists, and students of public health and epidemiology, this book portrays both the conceptual framework and the practical aspects of infectious disease surveillance.

strategies for effective communication pdf: Berg Water Project Lawrence J.M. Haas, Leonardo Mazzei, Donal T. O'Leary, Nigel Rossouw, 2010-07-08 The past decade has witnessed a major global shift in thinking about water, including the role that water infrastructure plays in sustainable development. This rethinking aims to balance better the social, economic, and environmental performance aspects in the development and management of large dams. Infrastructure strategies must complement strategies for water, environment, and energy security and for emerging concerns to reduce vulnerability in water resource systems to climate change on the horizon. Communication is central to multi-stakeholder dialogue and partnerships at all levels needed to achieve sustainability and governance reform in water resource management and infrastructure provision. At the same time, communication drives the advocacy to mobilize political will and public support for beneficial change and continuous improvement in practices. This case study emphasizes that is not only important to mobilize all opportunities to reconcile water demand and supply in river basins that are coming under increasing levels of water stress, but also to integrate effectively governance and anti-corruption reforms and sustainability improvements into all stages of the planning and project cycle adding value for stakeholders.
