the spy who came in from the cold pdf: Come Fly with Us Melvin Croft, John Youskauskas, 2019-02 2020 Space Hipsters Prize for Best Book in Astronomy, Space Exploration, or Space History
Come Fly with Us is the story of an elite group of space travelers who flew as members of many space shuttle crews from pre-Challenger days to Columbia in 2003. Not part of the regular NASA astronaut corps, these professionals known as payload specialists came from a wide variety of backgrounds and were chosen for an equally wide variety of scientific, political, and national security reasons. Melvin Croft and John Youskauskas focus on this special fraternity of spacefarers and their individual reflections on living and working in space. Relatively unknown to the public and often flying only single missions, these payload specialists give the reader an unusual perspective on the experience of human spaceflight. The authors also bring to light NASA's struggle to integrate the wide-ranging personalities and professions of these men and women into the professional astronaut ranks. While *Come Fly with Us* relates the experiences of the payload specialists up to and including the Challenger tragedy, the authors also detail the later high-profile flights of a select few, including Barbara Morgan, John Glenn (who returned to space at the age of seventy-seven), and Ilan Ramon of Israel aboard Columbia on its final, fatal flight, STS-107.

The Shadow World presents the behind-the-scenes tale of the global arms trade, exposing in forensic detail the deadly collusion that too often exists among senior politicians, weapons manufacturers, felonious arms dealers, and the military--a situation that compromises our security and undermines our democracy. Now a major PBS documentary An authoritative guide to the business of war. Chilling, heartbreaking, and enraging.--Arundhati Roy Andrew Feinstein reveals the cover-ups behind a range of weapons deals, from the largest in history--between the British and Saudi governments--to the guns-for-diamonds deals in Africa and the current \$60 billion U.S. weapons contract with Saudi Arabia. Based on pathbreaking reporting and unprecedented access to top-secret information, *The Shadow World* takes us into a clandestine realm that is as vitally important as it is shocking.

the spy who came in from the cold pdf: *Nuclear Fictions* Michael Gardiner, 2024-11-30 In this book, Michael Gardiner suggests that the conception of the 'war-ending' weapon was tied up with a longer commitment to unified space and singular progress. The mission for total weapons can be seen rising with the highly-technical defensive war of the later nineteenth century, and passing through twentieth century atomic research, then the targeting of the outsides of commercial empire, and the post-war consensus with deterrence as its foundation. The end of the Cold War brought an opportunity to fully naturalise deterrence, but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out. If the world-unifying role of deterrence has always been undermined by the rise of rival empires, it has also been questioned by critical communities including the consensus-sceptics of the 1950s-60s, 1980s-90s Nuclear Criticism and readers of 'nuclear ism', millennial campaigns for Scottish independence, and twenty-first century descriptions of nuclear colonialism. Recently it has become more obvious that an Anglosphere concept of 'worldly' deterrence was bound to a singular and ultimately nihilistic idea of progress.[bio]Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick.

the spy who came in from the cold pdf: *Authoritarian Practices in a Global Age* Marlies Glasius, 2023 This book challenges the assumption that authoritarianism is a phenomenon located at the level of the state, and that states as a whole are therefore either democratic or authoritarian. It

Many think the answer is, The victims. Who has duties to challenge these injustices? Many say, The privileged. To both, this book offers a different answer: Everyone. Everyone is made unfree by such injustices: victims, bystanders, and perpetrators alike. For such injustices try to suppress everyone's resistance to their workings, and that suppression counts as arbitrary power. Moreover, everyone has a duty to themselves to be free. Examining three major global injustices--gender, race, and poverty--this book thus offers a new defence of the doctrine of the global left, No one is free while others are oppressed!

the spy who came in from the cold pdf: [The Oxford Handbook of International Security](#) Alexandra Gheciu, William Curti Wohlforth, 2018 This Oxford Handbook is the definitive volume on the state of international security and the academic field of security studies. It provides a tour of the most innovative and exciting news areas of research as well as major developments in established lines of inquiry. It presents a comprehensive portrait of an exciting field, with a distinctively forward-looking theme, focusing on the question: what does it mean to think about the future of international security? The key assumption underpinning this volume is that all scholarly claims about international security, both normative and positive, have implications for the future. By examining international security to extract implications for the future, the volume provides clarity about the real meaning and practical implications for those involved in this field. Yet, contributions to this volume are not exclusively forecasts or prognostications, and the volume reflects the fact that, within the field of security studies, there are diverse views on how to think about the future. Readers will find in this volume some of the most influential mainstream (positivist) voices in the field of international security as well as some of the best known scholars representing various branches of critical thinking about security. The topics covered in the Handbook range from conventional international security themes such as arms control, alliances and Great Power politics, to new security issues such as global health, the roles of non-state actors, cyber-security, and the power of visual representations in international security. The Oxford Handbooks of International Relations is a twelve-volume set of reference books offering authoritative and innovative engagements with the principal sub-fields of International Relations. The series as a whole is under the General Editorship of Christian Reus-Smith of the University of Queensland and Duncan Snidal of the University of Oxford, with each volume edited by a distinguished pair of specialists in their respective fields. The series both surveys the broad terrain of International Relations scholarship and reshapes it, pushing each sub-field in challenging new directions. Following the example of the original Reus-Smit and Snidal The Oxford Handbook of International Relations, each volume is organized around a strong central thematic by a pair of scholars drawn from alternative perspectives, reading its sub-field in an entirely new way, and pushing scholarship in challenging new directions.
