best parenting books for newborns pdf: Negotiated Breastfeeding Caroline Chautems, 2021-10-18 Based on an ethnography of postpartum consultations by independent midwives in Switzerland, this book produces unique insights into home-birth parents' breastfeeding journey from

the first hours after birth to weaning. Considered the natural continuity of childbirth without intervention, breastfeeding is a fundamental component of the holistic, continuous and individualised care independent midwives provide as they engage with parents in a shared construction of meaning around breastfeeding. This book offers new perspectives on the conceptualisation of breastfeeding as a shared process. Parents, in collaboration with their midwife and baby, are jointly constructing negotiated breastfeeding. As the child grows and develops, questions arise regarding the management of risks, the construction of the lactating body and the body work required, and the perception of breastfeeding as a means of communication with the child, consistent with a child-centred approach to parenting. Fostering a reflection on the contrasts and similarities between the marginal model of holistic care and the dominant biomedical model, this book sheds light on issues of a broader scope: the relationship to health risks and health promotion, gender inequalities regarding parental roles and responsibilities, the concept of the child as a project, and the consequential intensification of parenthood. The book also explores transversal themes by outlining how reproduction and parenting are undertaken in Switzerland, framed by the local cultural, political and economic context, including the gender system and resulting power relationships.

best parenting books for newborns pdf: Militant Lactivism? Charlotte Faircloth, 2013-03-01 Following networks of mothers in London and Paris, the author profiles the narratives of women who breastfeed their children to full term, typically a period of several years, as part of an 'attachment parenting' philosophy. These mothers talk about their decision to continue breastfeeding as 'the natural thing to do': 'evolutionarily appropriate', 'scientifically best' and 'what feels right in their hearts'. Through a theoretical focus on knowledge claims and accountability, the author frames these accounts within a wider context of 'intensive parenting', arguing that parenting

practices – infant feeding in particular – have become a highly moralized affair for mothers, practices which they feel are a critical aspect of their 'identity work'. The book investigates why, how and with what implications some of these mothers describe themselves as 'militant lactivists' and reflects on wider parenting culture in the UK and France. Discussing gender, feminism and activism, this study contributes to kinship and family studies by exploring how relatedness is enacted in conjunction to constructions of the self.

In this incredibly helpful book, Sarah

Ockwell-Smith helps parents feel more positive and prepared for life with two children. The book begins with the obvious question: when is the right time to add another member to the family? It then goes on to examine the specific issues that can arise with a second pregnancy and birth; the common concerns about siblings, such as how to prepare your firstborn for what's to come; how to cope with the practicalities of life with two young children (aka actually managing to get anything done!); and the feelings parents are likely to experience, too. The Second Baby Book examines all the questions and issues Sarah herself faced second time around, as well as sharing the experiences of the many parents who have sought her advice. It also highlights what scientific studies reveal about such issues as the spacing of children and the differences between first and second births.
