THE PULITZER PRIZE Named one of the best books of the year by: THE NEW YORKER • THE WASHINGTON POST • THE ATLANTIC • NPR • PUBLISHERS WEEKLY • LITHUB Fascinating...The great strength of this memoir is its voracious, humble curiosity. - The Atlantic, The 10 Best Books of the Year A witty, winning, and revelatory personal narrative of the author's transition from sightedness to blindness and his quest to learn about blindness as a rich culture all its own. We meet Andrew Leland as he's suspended in the liminal state of the soon-to-be blind: he's midway through his life with retinitis pigmentosa, a condition that ushers those who live with it from sightedness to blindness over years, even decades. He grew up with full vision, but starting in his teenage years, his sight began to degrade from the outside in. Soon— but without knowing exactly when—he will likely have no vision left. Full of apprehension but also dogged curiosity, Leland embarks on a sweeping exploration of the state of being that awaits him: not only the physical experience of blindness but also its language, politics, and customs. He negotiates his changing relationships with his wife and son, and with his own sense of self, as he moves from his mainstream, "typical" life to one with a disability. Part memoir, part historical and cultural investigation, *The Country of the Blind* represents Leland's determination not to merely survive this transition but to grow from it—to seek out and revel in that which makes blindness enlightening. Brimming with warmth and humor, it is an exhilarating tour of a new way of being.

country of the blind pdf: *The Nowhere Bible* Frauke Uhlenbruch, 2015-03-10 The Bible contains passages that allow both scholars and believers to project their hopes and fears onto ever-changing empirical realities. By reading specific biblical passages as utopia and dystopia, this volume raises questions about reconstructing the past, the impact of wishful imagination on reality, and the hermeneutic implications of dealing with utopia – “good place” yet “no place” – as a method and a concept in biblical studies. A believer like William Bradford might approach a biblical passage as utopia by reading it as instructions for bringing about a significantly changed society in reality, even at the cost of becoming an oppressor. A contemporary biblical scholar might approach the same passage with the ambition of locating the historical reality behind it – finding the places it describes on a map, or arriving at a conclusion about the social reality experienced by a historical community of redactors. These utopian goals are projected onto a utopian text. This volume advocates an honest hermeneutical approach to the question of how reliably a past reality can be reconstructed from a biblical passage, and it aims to provide an example of disclosing – not obscuring – pre-suppositions brought to the text.

Scholars of media, communication, cultural, podcast, and critical race studies – among others – will find this book to be particularly useful.

country of the blind pdf: *Speculative Modernism* William Gillard, James Reitter, Robert Stauffer, 2021-11-04 Speculative modernists--that is, British and American writers of science fiction, fantasy and horror during the late 19th and early 20th centuries--successfully grappled with the same forces that would drive their better-known literary counterparts to existential despair. Building on the ideas of the 19th-century Gothic and utopian movements, these speculative writers anticipated literary Modernism and blazed alternative literary trails in science, religion, ecology and

sociology. Such authors as H.G. Wells and H.P. Lovecraft gained widespread recognition--budding from them, other speculative authors published fascinating tales of individuals trapped in dystopias, of anti-society attitudes, post-apocalyptic worlds and the rapidly expanding knowledge of the limitless universe. This book documents the Gothic and utopian roots of speculative fiction and explores how these authors played a crucial role in shaping the culture of the new century with their darker, more evolved themes.

country of the blind pdf: Islands, Identity and the Literary Imagination Elizabeth McMahon, 2016-07-09 Australia is the planet's sole island continent. This book argues that the uniqueness of this geography has shaped Australian history and culture, including its literature. Further, it shows how the fluctuating definition of the island continent throws new light on the relationship between islands and continents in the mapping of modernity. The book links the historical and geographical conditions of islands with their potent role in the imaginaries of European colonisation. It prises apart the tangled web of geography, fantasy, desire and writing that has framed the Western understanding of islands, both their real and material conditions and their symbolic power, from antiquity into globalised modernity. The book also traces how this spatial imaginary has shaped the modern 'man' who is imagined as being the island's mirror. The inter-relationship of the island fantasy, colonial expansion, and the literary construction of place and history, created a new 'man': the dislocated and alienated subject of post-colonial modernity. This book looks at the contradictory images of islands, from the allure of the desert island as a paradise where the world can be made anew to their roles as prisons, as these ideas are made concrete at moments of British colonialism. It also considers alternatives to viewing islands as objects of possession in the archipelagic visions of island theorists and writers. It compares the European understandings of the first and last of the new worlds, the Caribbean archipelago and the Australian island continent, to calibrate the different ways these disparate geographies unified and fractured the concept of the planetary globe. In particular it examines the role of the island in this process, specifically its capacity to figure a 'graspable globe' in the mind. The book draws on the colonial archive and ranges across Australian literature from the first novel written and published in Australia (by a convict on the island of Tasmania) to both the ancient dreaming and the burgeoning literature of Aboriginal and Torres Strait Islanders in the twenty-first century. It discusses Australian literature in an international context, drawing on the long traditions of literary islands across a range of cultures. The book's approach is theoretical and engages with contemporary philosophy, which uses the island and the archipelago as a key metaphor. It is also historicist and includes considerable original historical research.

She presents over 70 novel exercises to help teachers learn to use body, face, hands, voice, eyes, and word choices to precisely convey meaning. Some exercises are for teachers to practice, while others build intention and reflection in children. A self-assessment enables teachers to measure how intentional and reflective they become as they learn to use the eight techniques. This lively and often humorous resource is a companion to Lewin-Benham's *Twelve Best Practices for Early Childhood Education*, which explains what to teach and why. This new book explains how to teach. Book Features: Shows teachers how to incorporate the body's micro-actions in their teaching. Presents "mindfulness" techniques, the leading edge in psychotherapy. Examining key concepts such as minority stress and 'post-gay' identities, it offers a nuanced understanding of the historical attitudes and systemic oppression faced by the LGBTQ+ community. The chapters construct an ecological framework that highlights the unique challenges encountered by LGBTQ+ students and teachers in educational settings. This framework serves as the basis for a model that advocates for proactive measures in fostering an inclusive environment in schools. This includes the development of inclusive policies, practices, culture, and curricula. The book concludes by contemplating the potential applications of this model in Higher Education, extending its relevance beyond K-12 schools to also include universities and colleges. This volume will be valuable resource for researchers, scholars, educators, and policymakers interested in promoting LGBTQ+ inclusion in educational institutions, and with interests in gender and education, whole-school approaches, LGBTQ+, and diversity and inclusion more broadly.

country of the blind pdf: A Philosophy of Data Science Solomon Major, 2025-09-01 A common

definition for a data scientist is someone who uses data to solve problems. A Philosophy of Data Science starts with the premise that it is not only important that one can solve problems, but that they are able to articulate them as well. Unfortunately, the critical skill of asking the right question, rather than simply finding the right answers, has been neglected by much of the data and computational social science literature. This book is intended to address this gap. A Philosophy of Data Science begins by showing that the assumptions, beliefs, and goals that motivate the specification and application of data science models are based both on data - the focus of the data and computational social sciences - but also on theoretical and philosophical considerations as well. It has been written to develop a set of rules and tools that can help inform data and computational social scientists on how to best use the awesome methods that they now have at their disposal. Thus, this book is not a replacement for the impressive corpora of method-oriented data science literature used by today's quantitative analysts, but a complement to these contributions; one that uses philosophy to help motivate the questions to which they seek to give technical answers.

We once built community centers and donated to libraries, joined sporting teams and attended civic meetings, swam in local pools and played in public parks, participated in street picnics and watched Fourth of July celebrations, went to church and supported social clubs, and cleaned town squares and help paint our neighbor's house. where have those days gone? That seem like a bygone era, a relic of a different generation or different country. Today Republicans vilify the Democrats, and Democrats denigrate the Republicans. The poor despise the rich, and the rich ostracize the poor. Organizations mistreat employees, and employees detest organizations. We argue rather than debate, criticize rather than praise, and degrade rather than dignify. We rarely talk to those we know, and seldom socialize with those we do. The past may not have been idyllic, but it seemed more safe, more friendly, and more considerate. can it get better? can we do better? We can create a place where citizens share virtuous common values, where a sense of compromise advances all not just the few, where we contribute our unique gifts and talents to benefit our communities, where we are kind and gracious to our fellow man, and where we are grateful for the good fortune we have in our lives. These are the traits and characteristics of people searching for something better, of neighborhoods building something stronger, and countries offering something brighter.
