download reddit post as pdf: *The Truth Machine* Michael J. Casey, Paul Vigna, 2025-09-23 Views differ on bitcoin, but few doubt the transformative potential of Blockchain technology. The Truth Machine is the best book so far on what has happened and what may come along. It demands the attention of anyone concerned with our economic future. —Lawrence H. Summers, Charles W. Eliot University Professor and President Emeritus at Harvard, Former Treasury Secretary From Michael J. Casey and Paul Vigna, the authors of *The Age of Cryptocurrency* , comes the definitive work on the Internet's Next Big Thing: The Blockchain. Big banks have grown bigger and more entrenched. Privacy exists only until the next hack. Credit card fraud is a fact of life. Many of the

legacy systems once designed to make our lives easier and our economy more efficient are no longer up to the task. Yet there is a way past all this—a new kind of operating system with the potential to revolutionize vast swaths of our economy: the blockchain. In *The Truth Machine*, Michael J. Casey and Paul Vigna demystify the blockchain and explain why it can restore personal control over our data, assets, and identities; grant billions of excluded people access to the global economy; and shift the balance of power to revive society's faith in itself. They reveal the disruption it promises for industries including finance, tech, legal, and shipping. Casey and Vigna expose the challenge of replacing trusted (and not-so-trusted) institutions on which we've relied for centuries with a radical model that bypasses them. *The Truth Machine* reveals the empowerment possible when self-interested middlemen give way to the transparency of the blockchain, while highlighting the job losses, assertion of special interests, and threat to social cohesion that will accompany this shift. With the same balanced perspective they brought to *The Age of Cryptocurrency*, Casey and Vigna show why we all must care about the path that blockchain technology takes—moving humanity forward, not backward.

download reddit post as pdf: [A New Leaf](#) Alyson Martin, Nushin Rashidian, 2015-02-03 Two award-winning journalists offer a “cogent, well-sourced and ambitious analysis of the slow decline of cannabis prohibition in the United States” (Kirkus Reviews). In November 2012, voters in Colorado and Washington passed landmark measures to legalize the production and sale of cannabis for social use—a first in the United States and the world. Once vilified as a “gateway drug,” cannabis is now legal for medical use in eighteen states and Washington, DC. Yet the federal government refuses to acknowledge these broader societal shifts. 49.5 percent of all drug-related arrests involve the sale, manufacture, or possession of cannabis. In the first book to explore the new landscape of cannabis in the United States, investigative journalists Alyson Martin and Nushin Rashidian demonstrate how recent cultural and legal developments tie into cannabis’s complex history and thorny politics. Reporting from nearly every state with a medical cannabis law, Martin and Rashidian interview patients, growers, doctors, entrepreneurs, politicians, activists, and regulators. *A New Leaf* moves from the federal cannabis farm at the University of Mississippi to the headquarters of the ACLU to Oregon’s World Famous Cannabis Café. The result is a lucid account of how cannabis legalization is changing the lives of millions of Americans and easing the burden of the “war on drugs” both domestically and internationally.

download reddit post as pdf: **Beyond the Valley** Ramesh Srinivasan, 2020-09-01 How to

repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the “design labs” of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.

download reddit post as pdf: Cosplayers A. Luxx Mishou, 2021-05-30 *Cosplayers: Gender and Identity* is an examination of identity practices in cosplay, as expressed by cosplayers themselves. It challenges the assumed correlation between cosplay and cosplayer identity and considers the lived experiences of cosplayers engaging in the fan practice of sartorial performance. Through a series of chapters covering the blurring lines of gender, sexualized fantasy in real spaces, and nostalgia, the author argues that observational data run the risk of affirming normative expectations of identity in the absence of cosplayer narratives, and produce misreadings that generalize. The work develops and builds an understanding of a complex cultural system of art, engaging with multiple methodologies to make identity, fandom, and critical analysis on the parts of participants and observers alike. This is an accessible and innovative study suitable for scholars and students in gender studies, cultural studies, sexuality studies, sociology, and media studies.

You need to see what's already in front of you. Profit From Everyday Tools You Ignore challenges the myth that successful businesses must be built on complex technology, flashy innovation, or venture-backed disruption. The truth? Most thriving digital entrepreneurs are using simple, overlooked tools to solve everyday problems—and getting paid well for it. This book shows you how to take inventory of what you already know, what you already use, and what people already need—and turn it into products, services, or systems that sell. You'll learn how to use familiar tools—like spreadsheets, documents, voice memos, basic design apps, and email—to deliver powerful outcomes that don't require coding, a massive team, or a fancy app. You'll realize that complexity often becomes an excuse for procrastination. But simplicity? Simplicity sells. Simplicity scales. Simplicity wins. Stop waiting for funding, perfection, or the perfect idea. The tools you've ignored are probably all you need to launch something profitable, sustainable, and helpful. Sometimes the smartest way to start a business is with what's already in your hands.

Kendi) account of three women immersed in the white nationalist movement. After the election of Donald J. Trump, journalist Seyward Darby went looking for the women of the so-called alt-right -- really just white nationalism with a new label. The mainstream media depicted the alt-right as a bastion of angry white men, but was it? As women headlined resistance to the Trump administration's bigotry and sexism, most notably at the Women's Marches, Darby wanted to know why others were joining a movement espousing racism and anti-feminism. Who were these women, and what did their activism reveal about America's past, present, and future? Darby researched dozens of women across the country before settling on three -- Corinna Olsen, Ayla Stewart, and Lana Lokteff. Each was born in 1979, and became a white nationalist in the post-9/11 era. Their respective stories of radicalization upend much of what we assume about women, politics, and political extremism. Corinna, a professional embalmer who was once a body builder, found community in white nationalism before it was the alt-right, while she was grieving the death of her brother and the end of her marriage. For Corinna, hate was more than just personal animus -- it could also bring people together. Eventually, she decided to leave the movement and served as an informant for the FBI. Ayla, a devoutly Christian mother of six, underwent a personal transformation from self-professed feminist to far-right online personality. Her identification with the burgeoning tradwife movement reveals how white nationalism traffics in society's preferred, retrograde ways of seeing women. Lana, who runs a right-wing media company with her husband, enjoys greater fame and notoriety than many of her sisters in hate. Her work disseminating and

monetizing far-right dogma is a testament to the power of disinformation. With acute psychological insight and eye-opening reporting, Darby steps inside the contemporary hate movement and draws connections to precursors like the Ku Klux Klan. Far more than mere helpmeets, women like Corinna, Ayla, and Lana have been sustaining features of white nationalism. *Sisters in Hate* shows how the work women do to normalize and propagate racist extremism has consequences well beyond the hate movement.

It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of “embodiment” and scope of “substantial part”. Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users’ acts of streaming digital content, because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content’s infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users’ access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions.

Turban, 2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field.
