Jefferies, Steve Rowlinson, 2016-04-14 The last three decades have seen the evolution of Public-Private Partnerships (PPPs) and Relationship Contracting (RC) as alternative procurement approaches to traditional methods of delivering public infrastructure. The potential for growth in these new forms of procurement has led to an on-going debate on the nature of requirements, particularly in terms of policy development, encouraging private investment and value for money. A key argument for Governments to procure

This wide-ranging study of such crucial procurement issues includes international historical context, collaboration and risk management, with a focus on sustainable procurement approaches. The international significance of PPPs and RC procurement is reinforced with case study examples from the UK, Europe, North America, South Africa and the Asia-Pacific. It features cutting-edge research from around the world on subjects such as: Reviews and reflection of the PPP approach Project Alliancing Implementation of RC in developing countries Changes in procurement policy Value for money, collaboration and stakeholder involvement Growth and emergence of PPPs in Asia Risk management Including contributions from some of the world's most prominent academics and practitioners in this field, it is a crucial guide to the strategic choices governments now face for the provision of infrastructure, between using 'public' or 'private' mechanisms, or a combination of the two.

forms of government pdf: THE FORMS OF RESILIENCE IN URBAN CONTEXTS Celestina Fazia, Kh Md Nahiduzzaman, 2025-02-01 The book "The Forms of Resilience in Urban Contexts" compiles contributions from a diverse group of scholars, professors, researchers, and doctoral students associated with the research teams led by the two authors: Celestina Fazia from the Department of Engineering and Architecture in Kore University of Enna, Italy and Kh Md Nahiduzzaman from Citinnov SA for Integrated Territorial Planning and Smart Cities¹ in Mohammed VI Polytechnic University (UM6P), Morocco. The topic of resilience has been addressed on several occasions and in different fields, but the approach that has been taken by the authors is to solicit broader disciplinary reflections on the issues and research/experiments, delving into issues that have remained underexplored. Therefore, a structure was envisioned that would consider a double key: on the one hand, insights into the concept of urban resilience and its evolutions/declinations, and on the other hand, experiments, trying to bring out the contributions that different fields of intervention provide to make cities more resilient and ready to face the challenges ahead. The authors attempted to solicit contributions on the following areas: - Context and significance of resilience in urban planning - The advancement of urban resilience: moving beyond sustainability - Technological and digital transitions: perspectives and opportunities - Case studies on resilience: learning from contextual experiences - The role of heritage and landscape in urban resilience - Green and blue infrastructure: foundations for resilient urban landscapes - Emergency and affordable housing urbanism, hypotheses for sustainable regeneration.
