god technology and the christian life pdf: Confronting Technology Matthew T. Prior, 2020-03-16 We are living through a digital revolution which already touches every area of life and will continue to shape the future in as yet unforeseen ways. Digital technologies are an ordinary part of daily life, and yet they also present an unprecedented challenge to Christians to articulate a biblical, theological framework to navigate times of rapid change. The work of the French theologian Jacques Ellul is a theological time-bomb primed for times like these. Accounts of Ellul's career often divide off his sociology and theology, but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God, tackling the phenomenon he named technique, the pursuit of maximal power and efficiency implicit in the technological enterprise, with a profound depth of biblical and ethical insight. Centering himself on the apocalypse or revelation of Jesus Christ in history, Ellul offers a monumental, timely (though far from flawless) contribution to contemporary ethical debates about the uses and abuses of technologies. His work blazes a trail that Christians and all concerned for the future would do well to follow, as we avoid both the naivety of "technological neutrality" and the dread of "technological determinism."

god technology and the christian life pdf: Techno-Sapiens in a Networked Era Ryan K. Bolger, Kutter Callaway, 2020-11-09 Techno-Sapiens gathers together leading scholars of technology, theology, and religion in order to explore the ways in which modern technology is neither solely a dehumanizing force in the world nor a mere instrument for evangelizing the world, but rather the very means by which incarnation happens—the media in and through which humans love the (digital) other. The essays explore the question of how technology encourages and/or inhibits the human capacity to love our neighbor through asking the following questions: Who is my (digital) neighbor? How does social media in particular allow us to love our (digital) neighbor? How does one become a (digital) neighbor?

god technology and the christian life pdf: *Living in Love and Faith* Bishops of the Church of England, 2020-11-09 Issues of gender and sexuality are intrinsic to people's experience: their sense of identity, their lives and the loving relationships that shape and sustain them. The life and mission of the Church of England - and of the worldwide Anglican Communion - are affected by the deep, and sometimes painful, disagreements about these matters, divisions brought into sharper focus because of society's changing perspectives and practices, especially in relation to LGBTBI+ people. *Living in Love and Faith* sets out to inspire people to think more deeply both about what it means to be human, and to live in love and faith with one another. It tackles the tough questions and the divisions among Christians about what it means to be holy in a society in which understandings and practices of gender, sexuality and marriage continue to change. Commissioned and led by the Bishops of the Church of England, the *Living in Love and Faith* project has involved many people across the Church and beyond, bringing together a great diversity and depth of expertise, conviction and experience to explore these matters by studying what the Bible, theology, history and the social and biological sciences have to say. Amid the biblical, theological, historical and scientific exploration, each part includes Encounters with real, contemporary disciples of Christ whose stories raise questions which ask us to discern where God is active in human lives. The book ends with an appeal from the Bishops to join them in a period of discernment and decision-making following the publication of *Living in Love and Faith*. The *Living in Love and Faith* book is accompanied by a range of free digital resources including films, podcasts and an online library, together with *Living in Love and Faith: The Course*, a 5-session course which is designed to help local groups engage with the resources, also published by Church House Publishing.

god technology and the christian life pdf: *Transhumanism, Ethics and the Therapeutic Revolution* Stephen Goundrey-Smith, 2023-03-03 This book explores the impact of developments in pharmaceutical medicine in the twentieth century on a Christian ethical evaluation of transhumanism and future hi-tech medical enhancement technologies. It suggests that the Christian ethical assessment of proposed future radical transhumanist biomedical technologies should be

conducted in the light of responses to past medical advances. Two specific case studies are featured, focusing on the oral contraceptive pill and on Prozac and selective serotonin reuptake inhibitor (SSRI) antidepressants. Whilst future biomedical technologies may have therapeutic benefits for the relief of disease and contribute to improving human health and welfare, the book considers the implications for society and their acceptability as therapies from a Christian perspective. Stressing the inadequacy of natural law alone, the author proposes an ethical framework for assessing novel biomedical technologies according to the effects on personal autonomy, embodiment and bodily life, and on the imago Dei.

god technology and the christian life pdf: Beyond Cutting Edge? Paul C. Heidebrecht, 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change. As a myriad of articles and advertisements demonstrate, not only are we preoccupied with technology, but we are bombarded with numerous reminders that the cutting edge is in constant motion. Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest. Indeed, it is often assumed that the church has no choice but to find ways to cope with its new technological context. This book does not make the same assumptions. Building on the work of Mennonite theologian John Howard Yoder, it argues that the practices of the church make it possible for Christians to conscientiously engage technology. This happens when we recognize that marks of the church such as patience, vulnerability, and servanthood can put technological ideals such as speed, control, and efficiency in their proper place. In the course of grappling with three examples of morally formative technologies--automobiles, genetically modified food, and the Internet--this book goes beyond Yoder's thought by emphasizing that the church also plays a crucial role in our moral formation.
