in dreams begin responsibilities pdf: Between Race and Reason Susan Searls Giroux, 2010-07-28 Inquiring into the future of the university, Susan Giroux finds a paradox at the heart of higher education in the post-civil rights era. Although we think of post-civil rights as representing a colorblind or race transcendent triumphalism in national political discourse, Giroux argues that our present is shaped by persistent raceless racism at home and permanent civilizational war abroad. She sees the university as a primary battleground in this ongoing struggle. As the heir to Enlightenment ideals of civic education, the university should be the institution for the production of an informed and reflective democratic citizenry responsible to and for the civic health of the polity, a privileged site committed to free and equal exchange in the interests of peaceful and democratic coexistence. And yet, says Giroux, historically and currently the university has failed and continues to fail in this role. Between Race and Reason engages the work of diverse intellectuals—Friedrich Nietzsche, W. E. B. Du Bois, Michel Foucault, Martin Luther King, Jr., Jacques Derrida and others—who challenge the university's past and present collusion with racism and violence. The book complements recent work done on the politics of higher education that has examined the consequences of university corporatization, militarization, and bureaucratic rationalization by focusing on the ways in which these elements of a broader neoliberal project are also racially prompted and promoted. At the same time, it undertakes to imagine how the university can be reconceived as a uniquely privileged site for critique in the interests of today's urgent imperatives for peace and justice.

The “adversarial” relationship for which environmental regulation is famous is appropriate for those unwilling to comply, but not appropriate for the many well-meaning regulated entities. This book explains how these, and other principles of reformed environmental law have been demonstrated successfully but the lessons of success have not been learned. The approach of the book is to collate examples of environmental governance, policy-making and ethics and demonstrate paths towards a more progressive environmental and climate agenda.

in dreams begin responsibilities pdf: The Emotional Life of the Great Depression John Marsh, 2019-10-31 The Emotional Life of the Great Depression documents how Americans responded emotionally to the crisis of the Great Depression. Unlike most books about the 1930s, which focus almost exclusively on the despair of the American people during the decade, this volume explores the 1930s through other, equally essential emotions: righteousness, panic, fear, awe, love, and hope. In expanding the canon of Great Depression emotions, the book draws on an eclectic archive of sources, including the ravings of a would-be presidential assassin, stock market investment handbooks, a Cleveland serial murder case, Jesse Owens's record-setting long jump at the 1936 Berlin Olympics, King Edward VIII's abdication from his throne to marry a twice-divorced American

woman, and the founding of Alcoholics Anonymous. In concert with these, it offers new readings of the imaginative literature of the period, from obscure Christian apocalyptic novels and H.P. Lovecraft short stories to classics like John Steinbeck's *The Grapes of Wrath* and Richard Wright's *Native Son*. The result is a new take on the Great Depression, one that emphasizes its major events (the stock market crash, unemployment, the passage of the Social Security Act) but also, and perhaps even more so, its sensibilities, its structures of feeling.
