- Irrigate the abscess cavity with sterile saline to reduce bacterial load

Step 6: Placement of Drain (if necessary)

- Insert a drain (e.g., Penrose drain) for ongoing drainage in large or deep abscesses
- Secure the drain appropriately

Step 7: Dressing and Wound Care

- Pack the wound loosely with sterile gauze if needed
- Apply a sterile dressing to protect the area

Postoperative Care and Follow-up

Abscess Formation

- Suppurative infections resulting in pus accumulation
- Commonly seen in skin, soft tissues, or deep organs

Cellulitis with Fluctuance

- When the infection causes localized swelling with palpable pus

Infected Sebaceous or Sweat Cysts

- When cysts become infected and inflamed

Other Conditions

- Hematomas with secondary infection
- Certain deep infections like breast abscesses or perianal abscesses

Contraindications:

- Cellulitis without fluctuant swelling
