Lily and her ex-husband, Ryle, have just settled into a civil coparenting rhythm when she suddenly bumps into her first love, Atlas, again. After nearly two years separated, she is elated that for once, time is on their side, and she immediately says yes when Atlas asks her on a date. But her excitement is quickly hampered by the knowledge that, though they are no longer married, Ryle is still very much a part of her life—and Atlas Corrigan is the one man he will hate being in his ex-wife and daughter’s life. Switching between the perspectives of Lily and Atlas, *It Starts with Us* picks up right where the epilogue for the “gripping, pulse-pounding” (Sarah Pekkanen, New York Times bestselling author) bestselling phenomenon *It Ends with Us* left off. Revealing more about Atlas’s past and following Lily as she embraces a second chance at true love while navigating a jealous ex-husband, it proves that “no one delivers an emotional read like Colleen Hoover” (Anna Todd, New York Times bestselling author).

Digital has brought more data, more training, and more accountability to the publishing process. But it has also shone light on how systems designed initially around print-first publications are ill-equipped to support an industry of now would-be digital media companies. This book addresses some of the major challenges for publishing houses facing this reality, including how to create a digital-aware workflow, implementing quality assurance procedures, and using different management systems to develop an efficient workflow. Beginning by explaining project and product management practices used throughout technology and media companies, it then delves into when and how these principles can be applied to the publishing workflow. Topics covered include Waterfall and Agile Project Management, Scrum methodology, Kanban framework, ebook and audio formats, metadata, quality assurance, crowdfunding, in-app monetization, ONIX, and accessibility. Readers will consider not just how to contend with online platforms that allow authors to publish with the click of a button, and audiences accustomed to accessing content across multiple platforms and formats, but also challenges arising from factors such as the data-driven acquisitions model in libraries, the downward spiral of sales in college bookstores, the call for accessibility, and the need for fluid content systems that can work with different publishing databases and software. Written for publishing professionals at all levels, this book will also help advanced students of Publishing and Book Studies navigate best practices for project management in the modern publishing landscape.
