Nwajiaku, 2022-04-12 *Chinua Achebe and the Igbo-African World: Between Fiction, Fact, and Historical Representation* explores Chinua Achebe's literary works and how they communicated the Igbo-African world to readers. Engaging in the politics of representation, Achebe sought to demystify deterministic views of race and cultural ethnocentrism. While his books and commentaries have been very influential in shaping a unique and multifaceted view of the African world, some scholars have challenged Achebe's representations of historical reality. Through in-depth analyses of his writing, contributors examine the interpretations Achebe imposed on African culture and history in his texts. The chapters cover Achebe's engagement with critical issues like historical representation, gender relations, and indigenous political institutions in a changing society. Throughout, contributors present new ways for understanding Achebe's literary works and show how his work draws from African historical reality and identity while challenging Western epistemological hegemony.

joseph conrad heart of darkness pdf: *The Geography Teaching Adventure* Steve Puttick, 2023-09-28 Children are born explorers, full of wonder and hungry for stories about the world. What role might geography teaching play? What geographical stories do we tell about the world? What stories do we tell about geography itself? The book revisits an older vision of geography that is much bigger than exams and memorising information: dreams of adventure and discovery. But where geography's imperial past used these tools for domination and control, this book reclaims exploration to nurture wonder and tell better stories that work towards more just, equitable and sustainable futures. Positioning geography teaching in relation to major global challenges, author Steve Puttick argues that the subject has a unique role to play through its ability to think across natural and social sciences in equipping young people with the skills and knowledge they need to respond. The book offers a critical and accessible analysis of geography's entanglements with colonialism by exploring the striations of Empire in the subject. Each chapter draws on a wide range of research in geography, and finishes with practical activities and questions for reflection that can be used individually and collectively to support teachers' ongoing professional development. The book is essential reading for all geography teachers at any stage of their career, as well as geography teacher educators, subject leads and school leaders with responsibility for curriculum development.

Covering critical themes such as

Felix Lösing, 2021-01-12 The British and American Congo Reform Movement (ca. 1890-1913) has been praised extensively for its ›heroic‹ confrontation of colonial atrocities in the Congo Free State. Its commitment to white supremacy and colonial domination, however, continues to be overlooked, denied, or trivialised. This historical-sociological study argues that racism was the ideological cornerstone and formed the main agenda of this first major human rights campaign of the 20th century. Through a thorough analysis of contemporary sources, Felix Lösing unmasks the colonial and racist formation of the modern human rights discourse and investigates the ›historical work‹ of racism at a crossroads between imperial power and ›white crisis‹.
