Including insights from media studies, cultural studies, literary studies, and the performing and visual arts, this book explores how engaging with diverse representations of mothers and mothering contributes to a broader and deeper interdisciplinary understanding of how motherhood is constructed in our time. The chapters in this book were originally published as a special issue of the journal *Women: A Cultural Review*.

maxine hong kingston the woman warrior pdf: Digitalizing the Global Text Paul Allen Miller, 2020-01-07 A few years ago globalism seemed to be both a known and inexorable phenomenon. With the end of the Cold War, the opening of the Chinese economy, and the ascendancy of digital technology, the prospect of a unified flow of goods and services and of people and ideas seemed unstoppable. Political theorists such as Francis Fukuyama proclaimed that we had reached the end of history. Yes, there were pockets of resistance and reaction, but these, we were told, would be swept away in a relentless tide of free markets and global integration that would bring Hollywood, digital finance, and fast food to all. Religious fundamentalism, nationalism, and traditional sexual identities would melt away before the forces of modernity and empire. A relentless, technocratic rationality would sweep all in its wake, bringing a neoliberal utopia of free markets, free speech, and increasing productivity. Nonetheless, as we have begun to experience the backlash against a global world founded on digital fungibility, the perils of appeals to nationalism, identity, and authenticity have become only too apparent. The collapse of Soviet Communism left an ideological vacuum that offered no recognized place from which to oppose global capitalism. What is the alternative? The anxieties and resentments produced by this new world order among those left behind are often manifested in assertions of xenophobia and particularity. This is what it supposedly means to be really American, truly Muslim, properly Chinese. The other is coming to take what is ours, and we must defend ourselves. *Digitalizing the Global Text* is a collection of essays by an international group of scholars situated squarely at this nexus of forces. Together these writers examine how literature, culture, and philosophy in the global and digital age both enable the creation of these simultaneously utopian and dystopian worlds and offer a resistance to them. A joint publication from the University of South Carolina Press and the National Taiwan University Press.

This new generation's narratives focus on protagonists disenchanted with their daily lives. Many are depressed. Some are haunted by childhood memories of war, trauma, and refugee camps. Rejecting an obsession with professional status and money, they seek fulfillment by prioritizing relationships, personal growth, and cultural success. As Ty shows, these storytellers have done more than reject a narrowly defined road to happiness. They have rejected neoliberal capitalism itself. In so doing, they demand that the rest of us reconsider our outmoded ideas about the so-called model minority.

Highlighting the role of liberal internationalism in US cultural outreach, Harilaos Stecopoulos contends that the state mainly sent authors like Ralph Ellison, Robert Frost, William Faulkner, Langston Hughes, and Maxine Hong Kingston overseas not just to demonstrate the achievements of US civilization but also to broadcast an American commitment to international cross-cultural connection. Those writers-cum-ambassadors

may not have helped the state achieve its propaganda goals-indeed, this rarely proved the case-but they did find their assignments an opportunity to ponder the international meanings and possibilities of US literature. For many of those figures, courting foreign publics inspired a reevaluation of the scope and form of their own literary projects. Testifying to the inadvertent yet integral role of cultural diplomacy in the worlding of US letters, works like *The Mansion* (1959), *Life Studies* (1959), *Cultural Exchange* (1961, 1967), *Tripmaster Monkey: His Fake Book* (1989), and *Three Days Before the Shooting...* (2010) reimagine US literature in a mobile, global, and distinctly political register.

Kishonna L. Gray, 2014-03-21 *Race, Gender, and Deviance in Xbox Live: Theoretical Perspectives from the Virtual Margins* provides a much-needed theoretical framework for examining deviant behavior and deviant bodies within one of the largest virtual gaming communities-Xbox Live. Previous research on video games has focused mostly on violence and examining violent behavior resulting from consuming this medium. This limited scope has skewed criminologists' understanding of video games and video game culture. Xbox Live has proven to be more than just a gaming platform for users. It has evolved into a multimedia entertainment outlet for more than 20 million users. This book examines the nature of social interactions within Xbox Live, which are often riddled with deviant behavior, including but not limited to racism and sexism. The text situates video games within a hegemonic framework deploying whiteness and masculinity as the norm. The experiences of the marginalized bodies are situated within the framework of deviance as they fail to conform to the hegemonic norm and become victims of racism, sexism, and other types of harassment. Provides students, researchers, and practitioners with a baseline understanding of the structure of digitally mediated spaces such as Xbox Live Shows how the architecture of virtual spaces can foster racism, sexism, and possibly criminal activity Examines how unregulated virtual spaces lead to deviant acts and should be taken more seriously given the potential for criminal activity
