montreal cognitive assessment moca pdf: *Ethnogeriatrics* Lenise Cummings-Vaughn, Dulce

M. Cruz-Oliver, 2016-10-05 This volume is divided into five parts and fifteen chapters that address these topics by examining ethnogeriatric foundations, research issues, clinical care in ethnogeriatrics, education and policy. Expertly written chapters, by practicing geriatricians, gerontologists, clinician researchers and clinician educators, present a systematic approach to recognizing, analyzing and addressing the challenges of meeting the healthcare needs of a diverse population and authors discuss ways in which to engage the community by increasing research participation and by investigating the most prevalent diseases found in ethnic minorities.
