Teach from the Heart is about finding, rediscovering, or holding on to the heart of the teaching life, which is, quite literally, the teacher's heart. It is an encouragement to take up teaching as more than a service to provide, a profession to master, or a job to perform. **plato republic summary pdf: Routledge Handbook of the Influence Industry** Emma L. Briant, Vian Bakir, 2024-10-15 This Handbook provides the first comprehensive examination of the influence industry and how it operates worldwide across different domains. The rapid evolution of emerging technologies and data-driven persuasive practices has been linked to the spread of misleading

content in domestic and foreign influence campaigns. This has prompted worldwide public and policy discussions about disinformation and how to curb its spread. However, less attention has been paid to the increasingly data-driven commercial industry taking advantage of the opportunities these new technologies afford. The handbook uses the term 'influence' here to include not only messaging and public relations (PR), which fell within the traditional focus of propaganda studies, but to consider the infrastructure and actors behind an advanced array of capabilities that can be used in a coordinated way to affect an audience's emotions, ideas and behaviors in order to advance a state or non-state actor's objectives - increasingly based on data-driven profiling. The volume fills a gap in scholarship exploring the recent technical, political and economic development of this industry, surveying the extent of different technologies and services offered to clients worldwide across multiple domains (commercial, political, national security and government). The chapters are divided into three thematic sections and evaluate Influence Industry practices, aims and effectiveness across audiences; business practices and economics; and democratic structures and human rights. They also offer advice for researchers and consider key ethical issues and new regulatory approaches. This volume will be of much interest to students of political science, propaganda studies, sociology, communication studies and journalism.

**plato republic summary pdf: Boom** Byrne Hobart, Tobias Huber, 2024-11-19 A timely investigation of the causes of technological and scientific stagnation, and a radical blueprint for accelerating innovation. "Read this book for the alternative history of our age." —Peter Thiel, investor and author of *Zero to One* "A must-read for those who seek to build the future." —Marc Andreessen, cofounder of Netscape and Andreessen Horowitz From the Moon landing to the dawning of the atomic age, the decades prior to the 1970s were characterized by the routine invention of transformative technologies at breakneck speed. By comparison, ours is an age of stagnation. Median wage growth has slowed, inequality and income concentration are on the rise, and scientific research has become increasingly expensive and incremental. Why are we unable to replicate the rate of progress of past decades? What can we do to reinvigorate innovation? In *Boom*, Byrne Hobart and Tobias Huber take an inductive approach to the problem. In a series of case studies tracking some of the most significant breakthroughs of the past 100 years—from the Manhattan Project and the Apollo program to fracking and Bitcoin—they reverse-engineer how transformative progress arises from small groups with a unified vision, vast funding, and surprisingly poor accountability. They conclude that financial bubbles, while often maligned as destructive and destabilizing forces, have in fact been the engine of past breakthroughs and will drive future advances. In other words: Bubbles aren't all bad. Integrating insights from economics, philosophy, and history, *Boom* identifies the root causes of the Great Stagnation and provides a blueprint for accelerating innovation. By decreasing collective risk aversion, overfunding experimental processes, and organizing high-agency individuals around a transcendent mission, bubbles are the key to realizing a future that is radically different from the present. *Boom* offers a definite and optimistic vision of our future—and a path to unleash a new era of global prosperity.

**plato republic summary pdf: *The Wisdom of Our Ancestors*** Graham James McAleer, Alexander S. Rosenthal-Pubul, 2023-12-01 In *The Wisdom of Our Ancestors*, the authors mount a powerful defense of Western civilization, sketching a fresh vision of conservatism in the present age. In this book, Graham McAleer and Alexander Rosenthal-Pubul offer a renewed vision of conservatism for the twenty-first century. Taking their inspiration from the late Roger Scruton, the authors begin with a simple question: What, after all, is the meaning of conservatism? In reply, they make a case for a political orientation that they call “conservative humanism,” which threads a middle way between liberal universalism and its ideological alternatives. This vision of conservatism is rooted in the humanist tradition (that is, classical humanism, Christian humanism, and secular humanism), which the authors take to be the hallmark of Western civilizational identity. At its core, conservative humanism attempts to reconcile universal moral values (rooted in natural law) with local, particularist loyalties. In articulating this position, the authors show that the West—contra various contemporary critics—does, in fact, have a great deal of wisdom to offer. The authors begin with an overview of the conservative thought world, situating their proposal relative to two major poles: liberalism and nationalism. They move on to show that conservatism must fundamentally take the form of a defense of humanism, the “master idea of our civilization.” The ensuing chapters articulate various aspects of conservative humanism, including its metaphysical, institutional, legal, philosophical, and economic dimensions. Largely rooted in the Anglo-Continental conservative tradition, the work offers fresh perspectives for North American conservatism.

**plato republic summary pdf: *Straussophobia*** Peter Minowitz, 2009-08-15 Leo Strauss and his students have long been accused of mendacity, elitism, and militarism, but the Iraq War has prompted unprecedented levels of caustic and inaccurate denunciations. Inappropriate criticisms

have issued from artists (Tim Robbins), politicians (Ron Paul), journalists (Joe Klein), and even highly lauded scholars such as Arthur Schlesinger, Jr., Gordon Wood, Douglas Massey, Stephen Holmes, Anne Norton, Shadia Drury, Sheldon Wolin, John Pocock, John Yolton, Nicholas Xenos, and Brian Leiter. In *Straussophobia*, Peter Minowitz provides a methodical and detailed critique of the major offenders, especially of Drury, who maintains that Strauss established a 'covert tyranny' that would keep the Western world 'mired in perpetual war.' In replying to such charges\_ and to various authors who belittle Strauss's contributions as a scholar\_ Minowitz highlights the imaginative yet meticulous manner in which Strauss interpreted Thucydides, Plato, Xenophon, Farabi, Machiavelli, Hobbes, Locke, and Carl Schmitt. *Straussophobia* also provides both a comprehensive assessment of Strauss's 1933 letter that commended 'fascist, authoritarian, and imperial' principles, and a compelling account of Strauss's influence, or lack of influence, on neoconservative promoters of the Iraq War (e.g., Paul Wolfowitz, Richard Perle, and Lewis Libby). The book likewise breaks new ground in employing diversity discourse to explain and combat the bigotry and buffoonery that pervade attacks against Strauss and Straussians\_ and in drawing on Strauss to illuminate the distortions that mar some widely-used arguments for affirmative action.
