the healing web poster pdf: Transforming Trauma Philip Tedeschi, Molly Anne Jenkins, 2019-07-15 Have you ever looked deep into the eyes of an animal and felt entirely known? Often, the connections we share with non-human animals represent our safest and most reliable relationships, offering unique and profound opportunities for healing in periods of hardship. This book focuses on research developments, models, and practical applications of human-animal connection and animal-assisted intervention for diverse populations who have experienced trauma. Physiological and psychological trauma are explored across three broad and interconnected domains: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including military service, war, and developmental trauma; and 3) times of crisis, such as the ever-increasing occurrence of natural disasters, community violence, terrorism, and anticipated or actual grief and loss. Contributing authors, who include international experts in the fields of trauma and human-animal connection, examine how our relationships with animals can help build resiliency and foster healing to transform trauma. A myriad of animal species and roles, including companion, therapy, and service animals are discussed. Authors also consider how animals are included in a variety of formal and informal models of trauma recovery across the human lifespan, with special attention paid to canine- and equine-assisted interventions and psychotherapy. In addition, authors emphasize the potential impacts to animals who provide trauma-informed services, and discuss how we can respect their participation and implement best practices and ethical standards to ensure their well-being. The reader is offered a comprehensive understanding of the history of research in this field, as well as the latest advancements and areas in need of further or refined investigation. Likewise, authors explore, in depth, emerging practices and methodologies for helping people and communities thrive in the face of traumatic events and their long-term impacts. As animals are important in cultures all over the world, cross-cultural and often overlooked animal-assisted and animal welfare applications are also highlighted throughout the text.

the healing web poster pdf: Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man. Economic man has epitomized neo-liberal capitalism, which embraces competition and maximization of profit, resulting in a steep increase in economic inequality. The book demonstrates that women's inequality is a crucial factor in economic inequality, which cannot be fully understood without relating to women's situation, and that economic woman cannot thrive in the conditions of economic inequality created under global neo-liberalism. Emphasising the international human rights guarantees of women's right to equality in all fields of life, the author documents woman's increased participation in political, public, financial and corporate institutions, employment and entrepreneurship, with some women reaching high profile positions. Nevertheless, using global data, she reveals that economic woman lags behind, with a severe economic power deficit, an unfulfilled promise of equal employment opportunity, a gendered impact of poverty and barriers to gender equality in the family. The book analyses the trap of women's increased burden of breadwinning in the context of discriminatory laws and practices, infrastructural failures and policy gaps, which preempt achievement of gender equality in economic life. The book is intended for the general reader, academics, students, policy makers and NGOs. It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity. The author demonstrates that tackling gender inequality, restoring welfare priorities and reducing economic inequality are inextricably linked. Human rights and governments have a vital role to play in addressing them all, to create a sustainable economic infrastructure for the lives of women and men.

the healing web poster pdf: Balkan Dialogues Maja Gori, Maria Ivanova, 2017-02-17 Spatial variation and patterning in the distribution of artefacts are topics of fundamental significance in Balkan archaeology. For decades, archaeologists have classified spatial clusters of artefacts into discrete "cultures", which have been conventionally treated as bound entities and equated with past social or ethnic groups. This timely volume fulfils the need for an up-to-date and theoretically informed dialogue on group identity in Balkan prehistory. Thirteen case studies covering the beginning of the Neolithic to the Middle Bronze Age and written by archaeologists conducting fieldwork in the region, as well as by ethnologists with a research focus on material culture and identity, provide a robust foundation for exploring these issues. Bringing together the latest research, with a particular intentional focus on the central and western Balkans, this collection offers original perspectives on Balkan prehistory with relevance to the neighbouring regions of Eastern and Central Europe, the Mediterranean and Anatolia. Balkan Dialogues challenges

long-established interpretations in the field and provides a new, contextualised reading of the archaeological record of this region.
