the power of postive thinking pdf: *Awaken the Power Within* Albert Amao, 2018-06-05 The \$12 billion self-help industry is under constant attack for pedaling false miracles to duped believers. But sociologist Albert Amao demonstrates that Americans eagerly support self-help books, seminars, and programs because, under the right conditions, these things work. Sociologist Albert Amao analyzes the accuracy of self-help and positive-thinking claims in this groundbreaking--and wholly unexpected--exploration of what works, what doesn't, and why. Regarding my personal experience, Amao writes, I can testify that positive thinking and positive action have worked wonderfully for me. Born in a poor Latin-American country into a very impoverished family with both parents practically illiterate, I was the oldest of five children. I started working when I was six years old, shining shoes and selling newspapers to help my family. Nobody then would have believed that I would be able to finish high school. Nevertheless, I was able to do it going to night school, which allowed me to be admitted at the San Marcos University in Lima to get my Ph.D. in sociology. All these things were possible because, when I was teenager, I had access to New Thought, or positive-thinking philosophy. Contrary to the critics who blithely dismiss self-help methods, or the New Age gurus

who sell it them as miracles, Amao--writing with sobriety, scholarship, and drawing on deep personal experience--explores the conditions under which self-help is authentic.

the power of postive thinking pdf: The Successful Teacher's Survival Kit Dale Ripley, 2018-12-14 If you have ever had the opportunity to observe a master craftsman at work, one of the first things you will notice is how easy they make their work look. This principle applies to artists, athletes, plumbers and painters. It also applies to teachers. If you were fortunate enough to have some master teachers in your K to 12 schooling or for your university student teaching, you will have seen this principle at work. You will recall how easy they made teaching look. For the most part, their classes just flowed. The teacher would ask the students to do something, and the students did it. The teacher would cue the kids to transition into a new activity, and the kids transitioned. There was little conflict, few arguments, and the vast majority of classroom time was spent engaged in learning. It is a pleasure to observe these kinds of behaviors in the classrooms of master teachers, but this leaves us with an important question: how do they do it? Just how did these teachers get their students to be so cooperative and have their classroom running so smoothly? That is what THE SUCCESSFUL TEACHER'S SURVIVAL KIT: 83 simple things that successful teachers do to thrive in the classroom will show you - the kinds of things that master teachers do to make their classes work - both for themselves and for their students. You too can become a master teacher. This book will show you how.

the power of postive thinking pdf: Mindfulness and Its Discontents David Forbes, 2019-05-14T00:00:00Z Mindfulness, a way to alleviate suffering by realizing the impermanence of the self and our interdependence with others, has been severed from its Buddhist roots. In the late-stage-capitalist, neoliberal, solipsistic West, it becomes McMindfulness, a practice that instead shores up the privatized self, and is corporatized and repackaged as a strategy to cope with our stressful society through an emphasis on self-responsibility and self-promotion. Rather than a way to promote human development and social justice, McMindfulness covertly reinforces neoliberalism and capitalism, the very self-promoting systems that worsen our suffering. In *Mindfulness and Its Discontents*, David Forbes provides an integral framework for a critical, social, moral mindfulness that both challenges unmindful practices and ideas and provides a way forward. He analyzes how education curricula across North America employ mindfulness: to help students learn to succeed in a neoliberal society by enhancing the ego through emphasizing individualistic skills and the self-regulation of anger and stress. Forbes argues that mindfulness educators instead should uncover and resist the sources of stress and distress that stem from an inequitable, racist, individualistic, market-based (neoliberal) society and shows how school mindfulness programs can help bring about one that is more transformative, compassionate and just.
