what is investment pdf: Substantive Law in Investment Treaty Arbitration Monique Sasson, 2016-04-24 This new edition of what has rapidly become the pre-eminent work on the role of municipal law in investment treaty arbitration is justified not only by the accelerating appearance of investment treaty awards but also by the continuing, serious flaws in the application of international law by investment treaty arbitral tribunals. As a matter of international law, arbitrators need to be attentive to the circumstances where municipal law supplies the necessary substantive legal rule. They will find this book to be the best guide to this complex challenge. The author has maintained the overall structure of the first edition and added a new chapter on Article 42 of the ICSID Convention. Certain descriptions and arguments have been rethought and revised to clarify their significance and their applicability. The treatment focuses on the role of municipal law in providing the substance for concepts such as contracts, property rights, and shareholders' rights, which are relevant in the international investment treaty context but are not regulated under international law. Among the complex questions considered are the following: - If the application of international law requires a renvoi to municipal law, how should that renvoi be conducted? - In investment disputes, what role, if any, should municipal law have in assessing State attribution under international law? - Should shareholders receive compensation for damages suffered by their company due to a violation of an international obligation vis-à-vis the company? - Does a contractual right exist to foreign investment 'property'? - Under what conditions may a violation of municipal law become internationally wrongful? - May foreign investors rely on 'expectations' as an autonomous source of rights in investment treaty disputes? - Does an alleged breach of an umbrella clause transform a breach of contract claim covered by municipal law into an international law claim? The chapters answer these and many other questions in extraordinary depth, drawing on detailed analyses of the issues and implications posed by major relevant cases and arbitral decisions. The author's analysis of the unavoidable interaction of municipal law and international law in investment treaty arbitration - and the consequences stemming from rejecting the application of municipal law when relevant - will continue to prove of immeasurable value to arbitrators, arbitration counsel, corporate counsel, and scholars of international law.

what is investment pdf: Shifting Paradigms in International Investment Law Steffen Hindelang, Markus Krajewski, 2016-01-22 International investment law is in transition. Whereas the prevailing mindset has always been the protection of the economic interests of individual investors, new developments in international investment law have brought about a paradigm shift. There is now more than ever before an interest in a more inclusive, transparent, and public regime. Shifting Paradigms in International Investment Law addresses these changes against the background of the UNCTAD framework to reform investment treaties. The book analyses how the investment treaty regime has changed and how it ought to be changing to reconcile private property interests and the state's duty to regulate in the public interest. In doing so, the volume tracks attempts in international investment law to recalibrate itself towards a more balanced, less isolated, and increasingly diversified regime. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements with other areas of public international law, constitutional questions, and new regional perspectives from Europe, South Africa, the Pacific Rim Region, and Latin America. Together they

what is investment pdf: *China's International Investment Strategy* Julien Chaisse, 2019-02-07 Since China adopted its 'open door' policy in 1978, which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged: to assist the readjustment of China's economy, to coordinate its modernization programs, and to improve its quality of life. With the 1997 launch of the 'Going Global' policy, an outward focus regarding foreign investment was added, to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment-related legal instruments and conclude international investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific; and global initiatives, spear-headed by China's presidency of the G20 and its 'Belt and Road initiative'. The book's overarching topic is whether these three tracks compete with each other, or whether they complement one another - a question of profound importance for the country's political and economic future and world investment governance.

what is investment pdf: *Foreign Direct Investment in Large-Scale Agriculture in Africa* Atkeyelsh Persson, 2019-05-02 This book examines environmental sustainability and inclusive economic growth, providing in-depth analysis of foreign direct investment (FDI) in large-scale agriculture in Ethiopia. In most African states, arable land and other natural resources play a pivotal role for economic growth and development. Ethiopia is one of those countries where agriculture is the backbone of the economy. This sector has also been an attraction for FDI in Sub-Saharan Africa

since the global food and financial crisis of 2007 and 2008. This book uses six foreign investments in large-scale agriculture as case studies to examine current Ethiopian policies, the patterns of investment they promote, how these impact on land-based resources and communities' wellbeing. Presenting analyses of the economic, social and political realities of foreign direct investment in the local context, *Foreign Direct Investment in Large-Scale Agriculture in Africa* discusses how the fundamental principles of pro-poor and environmentally sustainable investments intersect with the government's ambition to advance Ethiopia's development agenda. This book will be of interest to scholars and students of African economics and sustainable development, African policy makers, intergovernmental organisations as well as multilateral and bilateral development partners.

what is investment pdf: International Investment Law and the Law of the European Union Xaralampos Tagaroulis, 2024-07-15 International Arbitration Law Library The fragility of the relationship between international law and European Union (EU) law comes to the fore when a dispute arises between an EU Member State and a multinational corporate investor. This book analyzes the legislative and jurisprudential backbone affecting both policy and practice in this area, showing in the process how both the autonomy of the EU legal order and the sovereignty of Member States can be strengthened through a common investor protection policy inside the EU with an efficient adjudication mechanism promised by the EU's "new generation" agreements. With a thorough analysis of the parameters that the Court of Justice of the European Union (CJEU) and investor-State dispute settlement (ISDS) arbitral tribunals have set for the interplay between EU law and international investment law, the following salient issues and topics and more are covered: operation of the EU's exclusive competence regarding foreign direct investment; EU rules on capital movements related to investments; potential conflicts between EU law and extra-EU bilateral investment treaties; intra-EU bilateral investment treaties viewed from the perspectives of both international and EU law primacy; role of arbitral tribunals in intra-EU dispute settlement and ramifications in the light of applicable law; and problems arising when the *lex arbitri* in the proceedings is the law of a non-EU state. The relevant jurisprudence of the CJEU is analyzed against ISDS case law, and detailed attention is paid to scholarship in the relevant fields. The author presents substantial and procedural solutions that will prevent the violation of EU law without sacrificing the substantial protection that arbitration provides for the protection of investments. The book goes largely beyond existing literature and is the first to jointly address EU law, international investment law, and integration theories with actionable solutions. It will allow all concerned with international judicial decision-making to acquire an arsenal of available normative responses to issues raised by EU law's autonomy, primacy of EU law, EU competences, international EU responsibility, compatibility of ISDS with EU law, and other issues, addressing all the challenges likely to be raised in arbitral or court proceedings. Practitioners will discover viable ways to identify, prevent, or resolve legal impasses stemming from the overlap of EU law and other international law regimes when structuring an investment inside the EU.

what is investment pdf: Investment Treaty Law and Climate Change Tomás Restrepo Rodríguez, 2023-01-01 The book deals with the question whether the investment treaty law system could be harmonized with the climate change international legal framework and the climate interest that lies beyond. The answer to this research question is divided into three parts. The first examines the relevance of the climate change international legal framework in investment treaty disputes as a natural pre(logical)interpretative stage. The second focuses on the BIT's content-interpretation, which is the orthodox approach to solve the fragmentation between the system of investment treaty law and the system of international climate change law. Finally, the third part tackles this

fragmentation through a heterodox approach that is grounded in the direct application of climate change principles through law ascertainment. Apart from concluding that harmonization between investment treaty law and international climate change law is possible through the orthodox approach to the expropriation and the FET standards, as well as through the direct application of the climate change precautionary principle and the CBDRRRC principle – heterodox approach, the book suggests that tribunals are expected soon to openly address climate change disputes in their rulings.
