when the side catch feelings book: Identity, Social Class and Learning in the 'Bottom' Reading Group Jess Anderson, 2025-02-28 The common practice of ability-grouped reading in UK schools, often termed guided reading, influences children's sense of identity, feelings and progress as readers. Drawing on a rich ethnographic study of three primary classrooms, this book reopens a critical inquiry into ability-grouped reading that has been quiet since the 1990s, when guided reading in literacy education became established practice in the UK and the US. Through the lens of children's agency in accommodating, resisting and at times transforming such reading pedagogy, the book shows how readers are shaped by ability-grouped reading and by the more egalitarian reading pedagogies introduced in the study. Children's individual and collective experiences are brought to life through extended narratives that attend as closely to gesture, posture, visage, silences and prosody of speech as to spoken words. The book ends with a provocation: how literacy pedagogy might change if reflexive noticing and dismantling of hierarchies become the compass of pedagogical change. This demands attention to structural inequalities around race, gender and class and a turn towards deep listening to children. As well as being a valuable read for scholars of the sociology of childhood and education, it should appeal to anyone concerned with making education more equitable, including teachers, school leaders, parents, carers and policymakers.

when the side catch feelings book: *The Conflicted Mind* Geoffrey Beattie, 2017-11-01 One of the greatest paradoxes of human behavior is our tendency to say one thing and do something completely different. We think of ourselves as positive and fair-minded, caring about other people and our environment, yet our behavior lets us down time and time again. Part of the reason for this is that we may have two separate 'selves': two separate and dissociated mental systems - one conscious, reflective and rational, and one whose motives and instincts are rooted in the unconscious and whose operation resists reflection, no matter how hard we try. In all kinds of areas of our life - love, politics, race, smoking, survival - one system seems to make very different sorts of judgements to the other, and is subject to distinct, hidden biases. *The Conflicted Mind* explores how and why this system operates as it does and how we may use that knowledge to promote positive behaviour change. However, the 'conflicted mind' is a broader concept than just the clash between potential (hypothetical) systems of thinking, because in one form or another it forms the very pillars on which the edifice of social psychology is built. This unique book therefore examines key social psychology theories and research in a new light, including Festinger's concept of cognitive dissonance, Milgram's obedience experiments, Bateson's description of conflict in communications, and Bartlett's explorations of the constructive nature of human memory. Geoffrey Beattie argues that although these classic studies were sometimes great and imaginative beginnings, they were also full of flaws, which social psychology must remedy if it is to make the kind of impact it aspires to. In doing so, he offers a ground breaking perspective on why we think and act in the way we do, to see what lessons can be learned for the discipline of social psychology going forward. Written in the author's distinct open and engaging style, *The Conflicted Mind* is a fascinating resource for researchers, specialists, and students in the field, as well as the general reader.

when the side catch feelings book: *God in Two Minutes* Prem Kamble, 2024-12-01 Is God a Myth? Like several myths of the pre-science and pre-mathematics era, is god a myth of the pre-Mentomatics age? As Mathematics explained the laws of the external physical world, will a new science called Mentomatics explain the laws of an internal world of our mind and brain? Like mathematics became the language of the physical science, will Mentomatics be the language of Spiritual science? After the industrial and information revolution, will Mentomatics usher in the spiritual revolution? Will we, the believers of god, then look as foolish as the people who believed that the earth was flat? And that you could fall off the edge of the earth into hell? *God in Two Minutes* by Prem Kamble dwells on several such questions. It looks at the past and possible future of God and Religion as has never been done before. It is based on completely original thoughts, not based on anything you have read or heard anywhere before. Though consistent with most religions, it challenges some of our basic beliefs. When our strong beliefs like the flat-earth theory have been proved wrong, it is possible that some of our deepest faiths today may prove to be myths.
