Management Isabella Beeton, 2000-03-16 'As with the commander of an army, or the leader of any enterprise, so it is with the mistress of a house.' A founding text of Victorian middle-class identity, *Household Management* is today one of the great unread classics. Over a thousand pages long, and written when its author was only 22, it offered highly authoritative advice on subjects as diverse as fashion, child-care, animal husbandry, poisons, and the management of servants. To the modern reader expecting stuffy moralizing and watery vegetables, Beeton's book is a revelation: it ranges widely across the foods of Europe and beyond, actively embracing new food stuffs and techniques,

mixing domestic advice with discussions of science, religion, class, industrialism and gender roles. Alternately fashionable and frugal, anxious and blusteringly self-confident, Household Management highlights the concerns of the ever-expanding Victorian middle-class at a key moment in its history. The abridged edition does justice to its high status as a cookery book, while also suggesting ways of approaching this massive, hybrid text as a significant document of social and cultural history.

mrs beeton s book of household management: *The Book of Household Management* Isabella Beeton, 2016-08-17 I must frankly own, that if I had known, beforehand, that this book would have cost me the labour which it has, I should never have been courageous enough to commence it. What moved me, in the first instance, to attempt a work like this, was the discomfort and suffering which I had seen brought upon men and women by household mismanagement. I have always thought that there is no more fruitful source of family discontent than a housewife's badly-cooked dinners and untidy ways. Men are now so well served out of doors,—at their clubs, well-ordered taverns, and dining-houses, that in order to compete with the attractions of these places, a mistress must be thoroughly acquainted with the theory and practice of cookery, as well as be perfectly conversant with all the other arts of making and keeping a comfortable home. In this book I have attempted to give, under the chapters devoted to cookery, an intelligible arrangement to every recipe, a list of the ingredients, a plain statement of the mode of preparing each dish, and a careful estimate of its cost, the number of people for whom it is sufficient, and the time when it is seasonable. For the matter of the recipes, I am indebted, in some measure, to many correspondents of the Englishwoman's Domestic Magazine, who have obligingly placed at my disposal their formulas for many original preparations. A large private circle has also rendered me considerable service. A diligent study of the works of the best modern writers on cookery was also necessary to the faithful fulfilment of my task. Friends in England, Scotland, Ireland, France, and Germany, have also very materially aided me. I have paid great attention to those recipes which come under the head of COLD MEAT COOKERY.
