non fiction book recommendations: Mastering Nonfiction Writing with ChatGPT Maximus Wilson, 2023-03-19 Writers are increasingly using ChatGPT, an advanced natural language processing model developed by OpenAI, to help with various aspects of their writing process. ChatGPT uses machine learning to generate human-like responses to text prompts, making it a valuable tool for generating ideas, overcoming writer's block, and even providing inspiration for full-length works. In this chapter, we will explore some of the ways in which writers are using ChatGPT and the benefits and limitations of this technology. One of the most popular uses of ChatGPT for writers is to generate ideas. By providing a text prompt, such as a sentence or a few words, ChatGPT can generate a list of potential ideas or prompts for further exploration. This can be especially useful for writers who are stuck or experiencing writer's block and need a new angle or direction to pursue. ChatGPT can also be used to develop characters by generating personality traits, backgrounds, and motivations. By providing a basic description of a character, ChatGPT can

generate a list of potential traits and characteristics that can be further developed and explored. This can be especially useful for writers who are struggling to develop complex, multi-dimensional characters. Another way that writers are using ChatGPT is to explore different plot points or scenarios.

non fiction book recommendations: *Reading Bestsellers* Danielle Fuller, DeNel Rehberg Sedo, 2023-04-27 Readers are essential agents in the production of bestsellers but bestsellers are not essential to readers' leisure pursuits. The starting point in this Element is readers' opinions about and their uses of bestselling fiction in English. Readers' relationships with bestsellers bring into view their practices of book selection, and their navigation of book recommendation culture. Based on three years of original research (2019-2021), including a quantitative survey with readers, interviews with social media influencers, and qualitative work with international Gen Z readers in a private Instagram chat space, the authors highlight three core actions contemporary multimodal readers make- choosing, connecting, and responding- in a transmedia era where on- and offline media practices co-exist. The contemporary multimodal reader, or the MMR3, they argue, illustrates the pervasiveness of recommendation culture, reliance on trusted others, and an ethic of responsiveness.
