1000 splendid suns book: Four Shades of Gray Simon Peter Rowberry, 2022-04-05 This first book-length analysis of Amazon's Kindle explores the platform's technological, bibliographical, and social impact on publishing. *Four Shades of Gray* offers the first book-length analysis of Amazon's Kindle and its impact on publishing. Simon Peter Rowberry recounts how Amazon built the infrastructure for a new generation of digital publications, then considers the consequences of having a single company control the direction of the publishing industry. Exploring the platform from the perspectives of technology, texts, and uses, he shows how the Kindle challenges traditional notions of platforms as discrete entities. He argues that Amazon's influence extends beyond "disruptive technology" to embed itself in all aspects of the publishing trade; yet despite industry pushback, he says, the Kindle has had a positive influence on publishing. Rowberry documents the first decade of the Kindle with case studies of Kindle Popular Highlights, an account of the digitization of books published after 1922, and a discussion of how Amazon's patent filings reflect a shift in priorities. Rowberry argues that while it was initially convenient for the book trade to outsource ebook development to Amazon, doing so has had adverse consequences for publishers in the mid- and long term, limiting opportunities for developing an inclusive and forward-thinking digital platform. While it has forced publishers to embrace digital forms, the Kindle has also empowered some previously marginalized readerships. Although it is still too early to judge the long-term impact of ebooks compared with that of the older technologies of clay tablets, the printing press, and offset printing, the shockwaves of the Kindle continue to shape publishing.

1000 splendid suns book: Reading Is My Window Megan Sweeney, 2010-02-15 Drawing on extensive interviews with ninety-four women prisoners, Megan Sweeney examines how incarcerated women use available reading materials to come to terms with their pasts, negotiate their present experiences, and reach toward different futures. Foregrounding the voices of African American women, Sweeney analyzes how prisoners read three popular genres: narratives of victimization,

urban crime fiction, and self-help books. She outlines the history of reading and education in U.S. prisons, highlighting how the increasing dehumanization of prisoners has resulted in diminished prison libraries and restricted opportunities for reading. Although penal officials have sometimes endorsed reading as a means to control prisoners, Sweeney illuminates the resourceful ways in which prisoners educate and empower themselves through reading. Given the scarcity of counseling and education in prisons, women use books to make meaning from their experiences, to gain guidance and support, to experiment with new ways of being, and to maintain connections with the world.

1000 splendid suns book: *Imagining Afghanistan* Alla Ivanchikova, 2019-09-15 *Imagining Afghanistan* examines how Afghanistan has been imagined in literary and visual texts that were published after the 9/11 attacks and the subsequent U.S.-led invasion—the era that propelled Afghanistan into the center of global media visibility. Through an analysis of fiction, graphic novels, memoirs, drama, and film, the book demonstrates that writing and screening “Afghanistan” has become a conduit for understanding our shared post-9/11 condition. “Afghanistan” serves as a lens through which contemporary cultural producers contend with the moral ambiguities of twenty-first-century humanitarianism, interpret the legacy of the Cold War, debate the role of the U.S. in the rise of transnational terror, and grapple with the long-term impact of war on both human and nonhuman ecologies. Post-9/11 global Afghanistan literary production remains largely NATO-centric insofar as it is marked by an uncritical investment in humanitarianism as an approach to Third World suffering and in anti-communism as an unquestioned premise. The book’s first half exposes how persisting anti-socialist biases—including anti-statist bias—not only shaped recent literary and visual texts on Afghanistan, resulting in a distorted portrayal of its tragic history, but also informed these texts’ reception by critics. In the book’s second half, the author examines cultural texts that challenge this limited horizon and forge alternative ways of representing traumatic histories. Captured by the author through the concepts of deep time, nonhuman witness, and war as a multispecies ecology, these new aesthetics bring readers a sophisticated portrait of Afghanistan as a rich multispecies habitat affected in dramatic ways by decades of war but not annihilated.
