a life of one s own joanna field: A Life of One's Own Marion Milner, 2024-05-01 'This is what I really want. I want to discover ways to discriminate the important things in human life. I want to find ways of getting past this blind fumbling with existence.' - Marion Milner, from A Life of One's Own. How often do we really ask ourselves, 'What will make me happy? What do I really want from life?' In A Life of One's Own Marion Milner, a renowned British psychoanalyst, artist and autobiographer, takes us on an extraordinary and compelling seven-year inward journey to discover what it is that makes her happy. On its first publication, W. H. Auden found the book 'as exciting as a detective story' and, as Milner searches out clues, the reader quickly becomes involved in the chase. Using her own personal diaries, she analyses moments of everyday life that can bring surprising joy, such as walking, listening to music, and drawing. She also records, in a disarmingly clear and insightful manner, the struggle between the urge to order and control one's thoughts and standing back to let them wander where they may. A pioneering account of lived experience that also anticipates the contemporary phenomenon of mindfulness, A Life of One's Own is a great adventure in thinking and living whose insights remain as fresh today as they were on the book's first publication in the 1930s. This Routledge Classics edition includes a revised Introduction by Rachel Bowlby.

a life of one s own joanna field: Exploring Individual and Organizational Boundaries W. Gordon Lawrence, 2018-03-29 One way of conceptualizing the relationship of individuals, through their roles, to their various groupings (such as families, communities, and business and industrial

enterprises) is to consider their political relatedness. This includes an exploration of organizational structures, management, and issues of responsibility, leadership, and authority. Beyond this, the Tavistock open systems approach has always held that unconscious social processes are of central importance in such explorations. The methodology of the approach, therefore, is one that encourages people to consider the unconscious in relation to the political dimensions of institutions. This involves people in examine a range of boundaries, such as those between the inner and outer worlds of the individual, between person and role, and between enterprise and environment. Also involved are less obvious boundaries - or limits, or distinctions - such as those between certainty and uncertainty, order and chaos, innovation and destructiveness, reality and fantasy, and relationship and relatedness.

a life of one s own joanna field: Bothered By Alligators Marion Milner, 2013-03-01 Milner's final text, *Bothered by Alligators*, came about when, in her nineties, she unexpectedly came across a diary she had kept during the early years of her son's life, recording his conversations and play between the ages of two and nine. With it was a storybook written and illustrated by him when he was about seven years old. Whilst working on the material, Milner gradually realised that both diary and storybook were provoking questions she realised had scarcely been asked, let alone answered in her own analysis. Through her memories, her notebooks and by interpreting her own previously discarded drawings and paintings, she reaches a point of awareness that they were depicting things she did not know in herself, addressing her relationships not only with her son but also with her husband, her father, and in particular, her mother. Like many of Milner's earlier books there is a deeply personal quality to *Bothered by Alligators*, but it is a quality that transcends the personal and reveals insights and conclusions that will be both interesting and useful to clinicians; and fascinating to readers from a psychological, a literary, an artistic or an educational background, and, in particular, those with an interest in psychoanalysis and autobiography and in Milner's work.

a life of one s own joanna field: An Experiment in Leisure Marion Milner, 2011-03-23 What is it that stops people from knowing what they want? How often do we wonder where we are going and what our world is all about? Written in 1936 as a companion piece to *A Life of One's Own*, *An Experiment in Leisure* further charts Marion Milner's illuminating and rewarding investigation into how we lead our lives. Instead of drawing on her daily diary, she turns to memory images - images not only from her own life but also from books, mythology, travel and religion that seem to point to a suspension of ordinary, everyday awareness. From this condition of emptiness springs an increasing imaginative appreciation both of being alive and of the world we live in. With a new introduction by Maud Ellmann, *An Experiment in Leisure* remains a great adventure in thinking and living and will be essential reading for all those from a literary, an artistic, a historical, an educational or a

psychoanalytic/psychotherapeutic background.

a life of one s own joanna field: Blackett Mary Jo Nye, 2004 This is a lively and compact biography of P. M. S. Blackett, one of the most brilliant and controversial physicists of the twentieth century. Nobel laureate, leader of operational research during the Second World War, scientific advisor to the British government, President of the Royal Society, member of the House of Lords, Blackett was also denounced as a Stalinist apologist for opposing American and British development of atomic weapons, subjected to FBI surveillance, and named as a fellow traveler on George Orwell's infamous list. His service as a British Royal Navy officer in the First World War prepared Blackett to take a scientific advisory role on military matters in the mid-1930s. An international leader in the experimental techniques of the cloud chamber, he was a pioneer in the application of magnetic evidence for the geophysical theory of continental drift. But his strong political stands made him a polarizing influence, and the decisions he made capture the complexity of living a prominent twentieth-century scientific life.

a life of one s own joanna field: Between Art Practice and Psychoanalysis Mid-Twentieth Century Beth Williamson, 2017-07-05 The work of mid-twentieth century art theorist Anton Ehrenzweig is explored in this original and timely study. An analysis of the dynamic and invigorating intellectual influences, institutional framework and legacy of his work, Between Art Practice and Psychoanalysis reveals the context within which Ehrenzweig worked, how that influenced him and those artists with whom he worked closely. Beth Williamson looks to the writing of Melanie Klein, Marion Milner, Adrian Stokes and others to elaborate Ehrenzweig's theory of art, a theory that extends beyond the visual arts to music. In this first full-length study on his work, including an inventory of his library, previously unexamined archival material and unseen artworks sit at the heart of a book that examines Ehrenzweig's working relationships with important British artists such as Bridget Riley, Eduardo Paolozzi and other members of the Independent Group in London in the 1950s and 1960s. In Ehrenzweig's second book The Hidden Order of Art (1967) his thinking on Jackson Pollock is important too. It was this book that inspired American artists Robert Smithson

and Robert Morris when they deployed his concept of 'differentiation'. Here Williamson offers new readings of process art c. 1970 showing how Ehrenzweig's aesthetic retains relevance beyond the immediate post-war era.

a life of one's own joanna field: **Surrender and Catch** K.H. Wolff, 2012-12-06 *Suender and catch*: give so you can receive, where the giving is your whole self, in a total experience. This is scarcely new on the American scene, and it is ancient knowledge, East and West. The fears of total surrender, the fears of self-revelation and of total abandon, although genuine, are likewise not new. Yet Kurt H. Wolff does attempt something new here, an epistemological essay with the help of this old idea: his subtitle is 'experience and inquiry today'. He tries to formulate an integrated view which incorporates in the theory of total experience not only the accepted component-esthetics, religion, the recent American experience - but also a metaphysics, a phenomenology, a theory of perception, a social philosophy and a methodology of the social sciences, even a philosophy of history and psychopathology. Phenomenology (especially Alfred Schutz), the critical Frankfurt school (especially Adorno and Marcuse), sociology (especially Georg Simmel), and existentialism (especially Camus) are tied in together. It all looks topsy-turvy at first. We have here scraps of a diary, fragments of correspondence, a stray adolescent love letter, notes on notes on field work, and notes and comments on tutorial seminars plus long excerpts from students' essays, a stray paper in a learned journal summarizing the core of the book, comments piled on comments and a web of self-references, literary criticisms, and pieces of poetry, plus a rich scholarly apparatus.

a life of one's own joanna field: *How to Be Bored* Eva Hoffman, 2017-01-03 In the latest installment of the acclaimed *School of Life* series, learn how to make peace with your down time—and even benefit from it. Lethargic inactivity can be debilitating and depressing, but in the modern world the pendulum has swung far in the other direction. We live in a hyperactive, over-stimulated age. Uninterrupted activity can seem exciting, but it can also leave us emotionally disorientated and mentally depleted. How can we recover a sense of balance and a richness in our lives? In *How to Be Bored*, Eva Hoffman argues for the need to cultivate curiosity and self-knowledge and to relish moments of unplugged idleness and non-virtual contact with others. Drawing on psychoanalysis, neuroscience, and a wide range of literature, she emphasizes the need

to understand our own preferences and purposes and to replenish our inner resources. This book aims to make readers more vigorously engaged in their lives and to restore a sense of depth and meaning to their experiences.
