From Third World to First: The Singapore Story 1965-2000

Singapore's transformation from a struggling, resource-scarce nation to a thriving global hub is one of the most remarkable development stories of the 20th century. This journey, encapsulated in the narrative "From Third World to First," highlights the visionary leadership, strategic policies, and resilient spirit that propelled Singapore from independence in 1965 to become a first-world economy by 2000. Over these three and a half decades, Singapore's story offers valuable lessons on nation-building, economic development, and social cohesion.

Introduction: The Context of Independence

The Birth of Modern Singapore

In 1965, Singapore gained independence from Malaysia amid political turmoil, economic uncertainty, and ethnic divisions. The newly formed republic faced immediate challenges: high unemployment, inadequate infrastructure, limited natural resources, and racial tensions. The early leadership recognized that survival depended on rapid economic development, social stability, and good governance.

The Strategic Imperative

Leaders understood that Singapore's small size and lack of natural resources meant that it could not rely on traditional industries or agriculture. Instead, they focused on transforming Singapore into a global trading hub, a financial center, and an attractive destination for foreign investment.

from third world to first the singapore story 1965 2000: From Third World to First: The Singapore Story, 1965-2000 Lee Kuan Yew, 2012-09-15 Few gave tiny Singapore much chance of survival when independence was thrust upon it in 1965. Today the former British trading post is a thriving Asian metropolis with one of the world's highest per capita income. The story of that transformation is told here by Singapore's charismatic, controversial founding father Lee Kuan Yew. From Third World To First continues where the best-selling first volume, The Singapore Story, left off, and brings up to date the story of Singapore's dramatic rise. It was first published in 2000. Delving deep into his own meticulous notes and previously unpublished papers and cabinet records, Lee details the extraordinary efforts it took for an island city-state in Southeast Asia to survive, with just "a razor's edge" to manoeuvre in, as Albert Winsemius, Singapore's economic advisor in the 1960s, put it. We read how a young man of 42 and his cabinet colleagues finished off the communist threat to the fledgling state's security, and began the long, hard work of building a nation: creating an army from scratch, stamping out corruption, providing mass public housing, and masterminding a national airline and airport. Lee writes frankly about his trenchant approach to political opponents and his often unorthodox views on human rights, democracy and inherited intelligence, aiming always "to be correct, not politically correct". Nothing about Singapore escaped his watchful eye: whether choosing shrubs for roadsides, restoring the romance of historic Raffles Hotel or persuading young men to marry women as well-educated as themselves. Today's safe, tidy Singapore certainly bears his stamp, but as he writes, "If this is a nanny state, I am proud to have fostered one."

from third world to first the singapore story 1965 2000: From Third World to First Lee Kuan Yew, 2000-10-03 Few gave tiny Singapore much chance of survival when it was granted independence in 1965. How is it, then, that today the former British colonial trading post is a thriving Asian metropolis with not only the world's number one airline, best airport, and busiest port

of trade, but also the world's fourth-highest per capita real income? The story of that transformation is told here by Singapore's charismatic, controversial founding father, Lee Kuan Yew. Rising from a legacy of divisive colonialism, the devastation of the Second World War, and general poverty and disorder following the withdrawal of foreign forces, Singapore now is hailed as a city of the future. This miraculous history is dramatically recounted by the man who not only lived through it all but who fearlessly forged ahead and brought about most of these changes. Delving deep into his own meticulous notes, as well as previously unpublished government papers and official records, Lee details the extraordinary efforts it took for an island city-state in Southeast Asia to survive at that time. Lee explains how he and his cabinet colleagues finished off the communist threat to the fledgling state's security and began the arduous process of nation building: forging basic infrastructural roads through a land that still consisted primarily of swamps, creating an army from a hitherto racially and ideologically divided population, stamping out the last vestiges of colonial-era corruption, providing mass public housing, and establishing a national airline and airport. In this illuminating account, Lee writes frankly about his trenchant approach to political opponents and his often unorthodox views on human rights, democracy, and inherited intelligence, aiming always to be correct, not politically correct. Nothing in Singapore escaped his watchful eye: whether choosing shrubs for the greening of the country, restoring the romance of the historic Raffles Hotel, or openly, unabashedly persuading young men to marry women as well educated as themselves. Today's safe, tidy Singapore bears Lee's unmistakable stamp, for which he is unapologetic: If this is a nanny state, I am proud to have fostered one. Though Lee's domestic canvas in Singapore was small, his vigor and talent assured him a larger place in world affairs. With inimitable style, he brings history to life with cogent analyses of some of the greatest strategic issues of recent times and reveals how, over the years, he navigated the shifting tides of relations among America, China, and Taiwan, acting as confidant, sounding board, and messenger for them. He also includes candid, sometimes acerbic pen portraits of his political peers, including the indomitable Margaret Thatcher and Ronald Reagan, the poetry-spouting Jiang Zemin, and ideologues George Bush and Deng Xiaoping. Lee also lifts the veil on his family life and writes tenderly of his wife and stalwart partner, Kwa Geok Choo, and of their pride in their three children -- particularly the eldest son, Hsien Loong, who is now Singapore's deputy prime minister. For more than three decades, Lee Kuan Yew has been praised and vilified in equal measure, and he has established himself as a force impossible to ignore in Asian and international politics. *From Third World to First* offers readers a compelling glimpse into this visionary's heart, soul, and mind.

from third world to first the singapore story 1965 2000: From Traders to Innovators Goh Chor Boon, 2018-02-14 Today, more than ever, the state of a country's science and technology is a critical factor for economic competitiveness and long-term growth. This book traces the development of science and technology policies and initiatives in Singapore since 1965. Developed as a trading entrepot by the British, science and technology were never strongly emphasized, right up to the 1970s. However, the need to stay ahead of economic competitiveness motivated the Singapore Government to initiate its national science and technology policy from the 1980s-moving Singapore from a low-skilled, low-technology economy to a high-skilled, high-technology one. Today, the drive for Singapore to become a hotbed for technological start-ups and R&D activities, supported by strong government funding and cutting-edge facilities, seems promising. Are the aspirations of nurturing a Silicon Valley-type culture in Singapore achievable? Are pragmatic, risk-averse Singaporeans ready for the mindset change? Can a nation of traders and service-brokers become a nation of technological innovators and entrepreneurs? This book attempts to provide the answers.

from third world to first the singapore story 1965 2000: Cold War Reckonings Jini Kim Watson, 2021-08-03 Honorable Mention, 2022 René Wellek Prize How did the Cold War shape culture and political power in decolonizing countries and give rise to authoritarian regimes in the so-called free world? Cold War Reckonings tells a new story about the Cold War and the global shift from colonialism to independent nation-states. Assembling a body of transpacific cultural works that speak to this historical conjuncture, Jini Kim Watson reveals autocracy to be not a deficient form of liberal democracy, but rather the result of Cold War entanglements with decolonization. Focusing on East and Southeast Asia, the book scrutinizes cultural texts ranging from dissident poetry, fiction, and writers' conference proceedings of the Cold War period, to more recent literature, graphic novels, and films that retrospectively look back to these decades with a critical eye. Paying particular attention to anti-communist repression and state infrastructures of violence, the book provides a rich account of several U.S.-allied Cold War regimes in the Asia Pacific, including the South Korean military dictatorship, Marcos' rule in the Philippines, illiberal Singapore under Lee Kuan Yew, and Suharto's Indonesia. Watson's book argues that the cultural forms and narrative techniques that emerged from the Cold War-decolonizing matrix offer new ways of comprehending these histories and connecting them to our present. The book advances our understanding of the global reverberations of the Cold War and its enduring influence on cultural and political formations in the Asia Pacific. Cold War Reckonings is available from the publisher on an open-access basis.

from third world to first the singapore story 1965 2000: A Handbook of Comparative Social Policy, Second Edition Patricia Kennett, 2013-01-01 'This extensively revised edition of A Handbook of Comparative Social Policy provides up-to-date and valuable insights on key concepts and issues,

such as globalization, crime, diversity, housing, child poverty, gender inequality, and social policy regimes. To write about these topics, editor Patricia Kennett has gathered an excellent team of researchers, who deal with both the developing and the advanced industrial world. Students of comparative social policy would benefit from engaging with this illuminating Handbook.' Daniel Béland, JohnsonShoyama Graduate School of Public Policy, Canada The current context of social policy is one in which many of the old certainties of the past have been eroded. The predominantly inward-looking, domestic preoccupation of social policy has made way for a more integrated, international and outward approach to analysis which looks beyond the boundaries of the state. It is in this context that this Handbook brings together the work of key commentators in the field of comparative analysis in order to provide comprehensive coverage of contemporary debates and issues in cross-national social policy research. Organized around five themes, this thoroughly revised and updated second edition explores the contextual, conceptual, analytical and processual aspects of undertaking comparative social research. The contributions highlight specific areas of comparative social policy including child poverty and well-being, patterns of housing provision and housing inequalities, and social protection in East Asia as well as crime and criminology in a global context. The authors of the Handbook explore continuing and emerging themes as well as issues which are of particular relevance to understanding the contemporary social world. International in scope, this authoritative Handbook presents original cutting-edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative and international social research. It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy, sociology, politics, urban studies and public policy.

from third world to first the singapore story 1965 2000: Brown Boys and Rice Queens
 Eng-Beng Lim, 2023-11-21 Honorable Mention for the 2015 Cultural Studies Best Book presented by the Association of Asian American Studies Winner of the 2013 CLAGS Fellowship Award for Best First Book Project in LGBT Studies A transnational study of Asian performance shaped by the homoerotics of orientalism, *Brown Boys and Rice Queens* focuses on the relationship between the white man and the native boy. Eng-Beng Lim unpacks this as the central trope for understanding colonial and cultural encounters in 20th and 21st century Asia and its diaspora. Using the native boy as a critical guide, Lim formulates alternative readings of a traditional Balinese ritual, postcolonial Anglophone theatre in Singapore, and performance art in Asian America. Tracing the transnational formation of the native boy as racial fetish object across the last century, Lim follows this figure as he is passed from the hands of the colonial empire to the postcolonial nation-state to neoliberal globalization. Read through such figurations, the traffic in native boys among white men serves as an allegory of an infantilized and emasculated Asia, subordinate before colonial whiteness and modernity. Pushing further, Lim addresses the critical paradox of this entrenched relationship that resides even within queer theory itself by formulating critical interventions around Asian performance.

from third world to first the singapore story 1965 2000: Singapore in the Global System
 Peter Preston, 2007-12-21 This book tracks the phases of Singapore's economic and political development, arguing that its success was always dependent upon the territories links with the surrounding region and the wider global system, and suggests that managing these links today will be the key to the country's future. Singapore has followed a distinctive historical development trajectory. It was one of a number of cities which provided bases for the expansion of the British empire in the East. But the Pacific War provided local elites with their chance to secure independence. In Singapore the elite disciplined and mobilized their population and built successfully on their colonial inheritance. Today, the city-state prospers in the context of its regional and global networks, and sustaining and nurturing these are the keys to its future. But there are clouds on the elite's horizons; domestically, the population is restive with inequality, migration and surplus-repression causing concern; and internationally, the strategy of constructing a business-hub economy is being widely copied and both Hong Kong and Shanghai are significant competitors. This

book discusses these issues and argues that although success is likely to characterize Singapore's future, the elite will have to address these significant domestic and international problems.

from third world to first the singapore story 1965 2000: The Legacy of the Cold War Vojtech Mastny, Zhu Liqun, 2013-12-16 The unexpected end of the protracted conflict has been a sobering experience for scholars. No theory had anticipated how the Cold War would be terminated, and none should also be relied upon to explicate its legacy. But instead of relying on preconceived formulas to project past developments, taking a historical perspective to explain their causes and consequences allows one to better understand trends and their long-term significance. The present book takes such perspective, focusing on the evolution of security, its substance as well as its perception, the concurrent development of alliances and other cooperative structures for security, and their effectiveness in managing conflicts. In *The Legacy of the Cold War* Vojtech Mastny and Zhu Liqun bring together scholars to examine the worldwide effects of the Cold War on international security. Focusing on regions where the Cold War made the most enduring impact—the Euro-Atlantic area and East Asia—historians, political scientists, and international relations scholars explore alliances and other security measures during the Cold War and how they carry over into the twenty-first century.

from third world to first the singapore story 1965 2000: Boards of the Future Dr. Chinyere Almona, 2021-11-09 Boards may not appear to be noticed while business activities are going well. Yet, when things start to go awry, they are usually the center of attention, and their effectiveness is actively questioned. Are today's boards equipped to create value for companies in the future? Dr. Almona's proprietary ©Five-Way Directional Model, which can be used in various contexts, guides board members to focus their attention on what matters most. It helps them leverage their board leadership role to achieve success in the short, medium, and long term. The model requires business leaders to look intentionally in the right direction, learn from what they see so that they can lead effectively, and consequently leap exponentially. Looking in the right direction allows the board to have a robust perspective of its stakeholders and the business landscape. Over the past twenty-five years, Dr. Almona has studied board behavior and worked with several boards as an advisor, assessor, trainer, and consultant. In this book, she harnesses her wealth of experience to assist boards in professionalizing their practices to achieve sustainable business success. Boards that look and learn effectively, lead and leap exponentially.

from third world to first the singapore story 1965 2000: India as an Asia Pacific Power David Brewster, 2012-03-12 The emergence of India as a regional and potentially global power is forcing us to rethink our mental map of the Asia Pacific. We are only just beginning to discern how India may alter the global economic landscape. How will the rise of India change the strategic landscape of Asia and beyond? This book provides a comprehensive assessment of India's international relations in the Asia Pacific, a region which has not traditionally been understood to include India. It examines India's strategic thinking about the Asia Pacific, its relationships with China and the United States, and India's increasingly close security ties with other major countries in the region. It considers the consequences of India's rise on the Asia Pacific strategic order and asks whether India is likely to join the ranks of the major powers of the Asia Pacific in coming years.

from third world to first the singapore story 1965 2000: Making Cities Global A. K. Sandoval-Strausz, Nancy H. Kwak, 2017-09-12 In recent decades, hundreds of millions of people

across the world have moved from rural areas to metropolitan regions, some of them crossing national borders on the way. While urbanization and globalization are proceeding with an intensity that seems unprecedented, these are only the most recent iterations of long-term transformations—cities have for centuries served as vital points of contact between different peoples, economies, and cultures. *Making Cities Global* explores the intertwined development of urbanization and globalization using a historical approach that demonstrates the many forms transnationalism has taken, each shaped by the circumstances of a particular time and place. It also emphasizes that globalization has not been persistent or automatic—many people have been as likely to resist or reject outside connections as to establish or embrace them. The essays in the collection revolve around three foundational themes. The first is an emphasis on connections among the United States, East and Southeast Asia, Latin America, and South Asia. Second, contributors ground their studies of globalization in the built environments and everyday interactions of the city, because even world-spanning practices must be understood as people experience them in their neighborhoods, workplaces, stores, and streets. Last is a fundamental concern with the role powerful empires and nation-states play in the emergence of globalizing and urbanizing processes. *Making Cities Global* argues that combining urban history with a transnational approach leads to a richer understanding of our increasingly interconnected world. In order to achieve prosperity, peace, and sustainability in metropolitan areas in the present and into the future, we must understand their historical origins and development. Contributors: Erica Allen-Kim, Leandro Benmergui, Matt Garcia, Richard Harris, Carola Hein, Nancy Kwak, Carl Nightingale, Amy C. Offner, Margaret O'Mara, Nikhil Rao, A. K. Sandoval-Strausz, Arijit Sen, Thomas J. Sugrue.

from third world to first the singapore story 1965 2000: Rescue Thyself Sylvanus Ayeni, 2017-03-29 This book is an in-depth and bold dialogue with several constituencies about the necessity of finding alternative pathways to solve the monumental problems facing the nations of Sub-Saharan Africa. It asserts that the most formidable barriers to progress in Sub-Saharan Africa are Sub-Saharan Africans, particularly the leaders. Thus, for these nations to escape from destitution, change must originate from within. African leaders are reminded that life anchored on the pursuit of money, material wealth, and power by any means, is hollow, empty, and meaningless. The future leaders of Sub-Saharan Africa are reminded that the Creator has endowed them and the citizens of their nations with the talents they need to develop themselves and their societies. Furthermore, nature has been so kind to their nations, endowing them with more than sufficient natural resources. Thus, they need not continue the culture of dependency on the rest of the human race.
