authors has demonstrated how passionately children can commit to the books they love. But this kind of devotion is not new. This timely volume takes up the challenge of assessing the complex interplay of forces that have created the popularity of children's books both today and in the past. The essays collected here ask about the meanings and values that have been ascribed to the term 'popular'. They consider whether popularity can be imposed, or if it must always emerge from children's preferences. And they investigate how the Harry Potter phenomenon fits into a repeated cycle of success and decline within the publishing industry. Whether examining eighteenth-century chapbooks, fairy tales, science schoolbooks, Victorian adventures, waif novels or school stories, these essays show how historical and publishing contexts are vital in determining which books will succeed and which will fail, which bestsellers will endure and which will fade quickly into obscurity. As they considering the fiction of Angela Brazil, Enid Blyton, Roald Dahl and J.K. Rowling, the contributors carefully analyse how authorial talent and cultural contexts combine, in often unpredictable ways, to generate - and sometimes even sustain - literary success.

Through three sets of case studies, the contributors examine the key debates surrounding adaptations: whether screen versions of literary classics can be faithful to the text; if something as capsulated as Jane Austens irony can even be captured on film; whether costume dramas always of their own time and do adaptations remake their parent text to reflect contemporary ideas and concerns. Tracing the complex alterations which texts experience between different media, Adaptations is a unique exploration of the relationship between text and film.

In The Middle Ages and the Movies, eminent historian Robert Bartlett takes a fresh, cogent look at how our view of medieval history has been shaped by eight significant films of the twentieth century. The book ranges from the concoction of sex and nationalism in Mel Gibson's Braveheart, to Fritz Lang's silent epic Siegfried, the art-house classic The Seventh Seal, and the epic historical drama El Cid. Bartlett examines the historical accuracy of these films, as well as other salient aspects—how was Umberto Eco's Name of the Rose translated from page to screen? Why is Monty Python and the Holy Grail funny? And how was Eisenstein's Alexander Nevsky shaped by the Stalinist tyranny under which it was filmed?
