lost lives book for sale: *The Social Lives of Books* Edward Frederick Finn, 2011 This project explores how changing models of literary production are blurring or erasing the divisions between authors, critics and readers. Millions of cultural consumers are participating in previously closed literary conversations and expressing forms of mass distinction through their purchases and reviews of books. These traces of popular reading choices constitute a fresh perspective on elusive audience reactions to literature and reveal evolving networks of conversation. Employing network analysis methodologies and 'distant reading' of book reviews, recommendations and other digital traces of cultural distinction, I develop a new model for literary culture in America today. Through readings of the fiction and reception of Thomas Pynchon, Toni Morrison, David Foster Wallace and Junot Díaz, this model outlines the fundamental requirements for contemporary literary fame. My introduction outlines methodological tools I developed and situates them in the critical traditions of literary reception, cultural sociology and media theory before describing the digital ecologies that have emerged around literature online and their value. Chapter 1 explores the nature of literary fame through a case study of Thomas Pynchon, whose carefully guarded anonymity and ironic distance from capitalism are reflected in the networks his readers construct around his long, challenging books. In stark contrast, Toni Morrison, the subject of Chapter 2, has succeeded critically and commercially, tirelessly seeking out readers to form literary communities around her writing, most prominently through her collaboration with Oprah's Book Club. Chapter 3 considers David Foster Wallace and Junot Díaz and sets out a model for contemporary literary culture: a reading society that demands new forms of authorial reflexivity to mirror the collaborative, iterative nature of digital literary conversations. I conclude with a brief consideration of the exciting prospects and challenges for fiction in a world that reads more than ever but is growing disaffected with the material realities of literary production.

In the last of his major writings, Samuel Johnson looked back over the previous two centuries of English Literature in order to describe the personalities as well as the achievements of the leading English poets. The major Lives - of Milton, Dryden, Swift, and Pope - are memorable cameos of the life of writing in which Johnson is as attentive to human frailty as to literary prowess. The shorter Lives preserve some of Johnson's most piercing, critical judgements. Unsentimental, opinionated, and quotable, *The Lives of the Poets* continues to influence the reputations of the writers concerned. It is one of the greatest works of English criticism, but also one of the most humanly diverting. This selection of the Lives of ten of the most important poets draws

its text from Roger Lonsdale's authoritative complete edition. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.
