many years from now: *Anzac Memories* Alistair Thomson, 2013-11-01 *Anzac Memories* was first published to acclaim in 1994, and has achieved international renown for its pioneering contribution to the study of war memory and mythology. Michael McKernan wrote that the book gave ‘as good a picture of the impact of the Great War on individuals and Australia as we are likely to get in this generation’, and Michael Roper concluded that ‘an immense achievement of this book is that it so clearly illuminates the historical processes that left men like my grandfather forever struggling to fashion myths which they could live by’. In this new edition Alistair Thomson explores

how the Anzac legend has transformed over the past quarter century, how a 'post-memory' of the Great War creates new challenges and opportunities for making sense of the national past, and how veterans' war memories can still challenge and complicate national mythologies. He returns to a family war history that he could not write about twenty years ago because of the stigma of war and mental illness, and he uses newly released Repatriation files to question his own earlier account of veterans' post-war lives and memories and to think afresh about war and memory.

many years from now: *Martin Scorsese* Robert Ribera, 2017-01-05 Martin Scorsese (b. 1942) has long been considered one of America's greatest cinematic storytellers. Over the last fifty years he has created some of the most iconic moments in American film, never afraid to confront controversial issues with passion. While few of his films are directly autobiographical, his upbringing in New York's Little Italy, the childhood asthma that kept him from playing sports, and his early desire to enter the priesthood all helped form his sensibilities and later shaped his distinct style. Community, religion, violence—these themes drive a Scorsese picture, and whether he examines the violence that bursts forth in the hand of Travis Bickle or the passion of Jesus Christ, Scorsese's mastery of the history, art, and craft of filmmaking is undeniable. This collection was originally edited by the late Peter Brunette in 1999 and is now revised and extensively updated by Robert Ribera. It traces Scorsese's evolution from the earliest days of the New American Cinema, his work with Roger Corman, and his days at New York University's film program to his efforts to preserve the legacy of cinema, his documentary work, and his recent string of successes. Among new movies discussed are *The Departed*, *Hugo*, and *The Wolf of Wall Street*, and the documentaries *No Direction Home* and *The Blues*. Scorsese stands out as a director, producer, scholar, preservationist, and icon. His work both behind the camera and in the service of its history are a cornerstone of American and world cinemas. In these interviews, Scorsese takes us from Elizabeth Street to the heights of Hollywood and all the journeys in between.

the job, Keith Beal, the Research and Development Director, and my immediate supervisor, gave me a tour of the manufacturing area and made it a point to stop at a small table. There were about three or four assemblers at the table manually placing Sharpie "reservoirs" into Sharpie "barrels", fitting the "ferrule" (top half of the pen) into place, spin welding the assembly, adding the ink with a foot-operated syringe, setting the tip and cap in place, and then placing the finished marker in a box that was partitioned to hold twelve rows of twelve—one gross of product. "This," Keith told me, "Is the Sharpie Marker." All Bill wanted as he interviewed for the job of chemist at Sanford Ink Company in Bellwood, Illinois was a way to support his young family. He could worry about making his mark in the world after his family had a place to sleep, a used car to drive, and food in the refrigerator. Furniture for the apartment could come later. What happened next is today a piece of Americana.
