a to z birmingham: The A to Z of the Kennedy-Johnson Era Richard Dean Burns, Joseph M. Siracusa, 2009-09-21 In the history of the United States, few periods could more justly be regarded as the best and worst of times than the Kennedy-Johnson era. The arrival of John F. Kennedy in the White House in 1961 unleashed an unprecedented wave of hope and optimism in a large segment of the population; a wave that would come crashing down when he was assassinated only a few years later. His successor, Lyndon B. Johnson, enjoyed less popularity, but he was one of the most experienced and skilled presidents the country had ever seen, and he promised a Great Society to rival Kennedy's New Frontier. Both presidents were dogged by foreign policy disasters: Kennedy by the Bay of Pigs fiasco, although he came out ahead on the Cuban missile crisis, and Johnson from the backlash of the Vietnam War. The 1960s witnessed unprecedented progress toward racial and sexual equality, but it also played host to race and urban riots. And while impressive advances in the sciences and arts were fueling the American imagination, the counterculture rejected it all. The A to Z of the Kennedy-Johnson Era relates these events and provides extensive political, economic, and social background on this era through a detailed chronology, an introduction, appendixes, a bibliography, and several hundred cross-referenced dictionary entries on important persons, events, institutions, policies, and issues.

a to z birmingham: The A to Z of the Northern Ireland Conflict Gordon Gillespie, 2009-09-24 For nearly four decades the conflict in Ireland has embittered relations between the communities living there and spoiled relations between the Republic of Ireland and Great Britain. For three decades it escalated, punctuated by periodic bloody clashes followed by somewhat calmer periods of tension during which violence of all sorts-robberies, kidnappings, serious injuries and deaths-were all too common. During the past decade, fortunately, all sides have realized that armed solutions were unlikely to bring a solution to anyone's problems and that peace should be given a chance. Fortunately, with the establishment of a new Northern Ireland Executive, there is a general acceptance that the conflict is now part of the past. The A to Z of the Northern Ireland Conflict covers the history of the Troubles through a chronology covering the Northern Ireland conflict and peace process from 1968 until the formation of the new Northern Ireland Executive in May 2007, an introductory essay, a bibliography, and several hundred cross-referenced dictionary entries on main events, individuals, and organizations. Researchers with an interest in the Northern Ireland conflict will find this book to be an essential addition to their collection of reference books on the subject.

a to z birmingham: A to Z of Physicists, Updated Edition Darryl Leiter, 2019-11-01 A to Z of Physicists, Updated Edition focuses not only on the lives and personalities of those profiled, but also on their research and contributions to the field. A fascinating and important element of this work is the attention paid to the obstacles that minority physicists had to overcome to reach their personal and professional goals. Through incidents, quotations, and photographs, the entries portray something of the human face, which is often lost in books on science and scientists. A to Z of Physicists, Updated Edition features more than 150 entries and 51 black-and-white photographs. Culturally inclusive and spanning the whole range of physicists from ancient times to the present day, this is an ideal resource for students and general readers interested in the history of physics or the significant aspects of the personal and professional lives of important physicists. People covered include: Archimedes (ca. 285-212 BCE) Homi Jehangir Bhabha (1909-1966) Pavel Alekseyevich Cherenkov (1904-1990) Marie Curie (1867-1934) George Gamow (1904-1968) Tsung Dao Lee (1926-present) Lise Meitner (1878-1968) Yuval Ne'eman (1925-2006) Johannes Stark (1874-1957) Nikola Tesla (1856-1943) Alessandro Volta (1745-1827) Hideki Yukawa (1907-1981)

a to z birmingham: Birmingham's Industrial Heritage Ray Shill, 2003-10-17
Birmingham was a renowned manufacturing centre by the 18th century and the city rapidly

grew into the primary industrial centre of the Midlands. An account of Birmingham's heyday of heavy industry is recorded and the story is brought up to date with the story of the decline of heavy industry and its subsequent replacement by design, technology and computing. The proposed redevelopment of Rover's Longbridge site as a science park is symptomatic of this change.

a to z birmingham: *Z User Workshop, York 1991* J. E. Nicholls, 2012-12-06 In ordinary mathematics, an equation can be written down which is syntactically correct, but for which no solution exists. For example, consider the equation $x = x + 1$ defined over the real numbers; there is no value of x which satisfies it. Similarly it is possible to specify objects using the formal specification language Z [3,4], which can not possibly exist. Such specifications are called inconsistent and can arise in a number of ways. Example 1 The following Z specification of a function f , from integers to integers $f : \mathbb{Z} \rightarrow \mathbb{Z}$ $f x : \sim 1 \ x \sim 0 \cdot f x = x + 1$ (i) $f x : \sim 1 \ x \sim 0 \cdot f x = x + 2$ (ii) is inconsistent, because axiom (i) gives $f 0 = 1$, while axiom (ii) gives $f 0 = 2$. This contradicts the fact that f was declared as a function, that is, f must have a unique result when applied to an argument. Hence no such f exists. Furthermore, iff $0 = 1$ and $f 0 = 2$ then $1 = 2$ can be deduced! From $1 = 2$ anything can be deduced, thus showing the danger of an inconsistent specification. Note that all examples and proofs start with the word Example or Proof and end with the symbol.1.
