eden it s an endless world: *Vernacular Worlds, Cosmopolitan Imagination* Stephanos Stephanides, Stavros Karayanni, 2015-09-01 This collection addresses broad questions of ethics and aesthetics in the framework of vernacular cosmopolitanism. With a common anthropological focus, the essays map literary and artistic practices involving cross-cultural transactions shaped by social forces, institutions, and the multiple mediations of the imagination. Some essays are based on community-based fieldwork, while all encompass an affective immersion in the places we inhabit, and the claims these make on the body's intelligibility. The authors consider the role of artists, writers, and literary scholars as cultural actors in a variety of settings, grassroots, regional, trans-regional, and global. Topics include: the role of social and cultural activism; the problematic dimensions of national belonging; the plurality of knowledge-systems and inter-language environ-mental learning in South Africa; the vernacular imagination in Papua New Guinea

Anglophone fiction; pulp fiction and chick lit in India; transformative artistic motifs of Australia's nomadic Tiwi community; life writing as a reconfiguring of postcolonial or cosmopolitan paradigms; southern African supernatural belief-systems and the malign magic of the global economy; Canadian First Nations literature read against the struggle for self-determination by India's castes and scheduled tribes; feral animals in relation to the indigenous exotic; and the imbrication of the vernacular, national, colonial, and cosmopolitan in perceptions of homecoming in the eastern Mediterranean. The collection as a whole thus provides manifestations of poesis in relation to theory and praxis and articulates perspectives that expand, challenge, strengthen, and renew the potential for growth in contemporary world literature and culture.

The 42 essays by leading scholars in each field explore the rich spectrum of ways in which eschatological understanding can be expressed, and for which purposes it can be used. Readers will gain new insight into the historical contexts, details, functions and impact of eschatological ideas and imagery in ancient texts and material culture from the twenty-fifth century BCE to the ninth century CE. Traditionally, the study of "eschatology" (and related concepts) has been pursued mainly by scholars of Jewish and Christian scripture. By broadening the disciplinary scope but remaining within the clearly defined geographical milieu of the Mediterranean, this volume enables its readers to note comparisons and contrasts, as well as exchanges of thought and transmission of eschatological ideas across Antiquity. Cross-referencing, high quality illustrations and extensive indexing contribute to a rich resource on a topic of contemporary interest and relevance. Eschatology in Antiquity is aimed at readers from a wide range of academic disciplines, as well as non-specialists including seminary students and religious

leaders. The primary audience will comprise researchers in relevant fields including Biblical Studies, Classics and Ancient History, Ancient Philosophy, Ancient Near Eastern Studies, Art History, Late Antiquity, Byzantine Studies and Cultural Studies. Care has been taken to ensure that the essays are accessible to undergraduates and those without specialist knowledge of particular subject areas.
