harry potter 2 and the chamber of secrets: Second-Generation Memory and Contemporary Children's Literature Anastasia Ulanowicz, 2013-09-02 Winner of the Children's Literature Association Book Award This book visits a range of textual forms including diary, novel, and picturebook to explore the relationship between second-generation memory and contemporary children's literature. Ulanowicz argues that second-generation memory — informed by intimate family relationships, textual mediation, and technology — is characterized by vicarious, rather than direct, experience of the past. As such, children's literature is particularly well-suited to the representation of second-generation memory, insofar as children's fiction is particularly invested in the transmission and reproduction of cultural memory, and its form promotes the formation of various complex intergenerational relationships. Further, children's books that depict second-generation memory have the potential to challenge conventional Western notions of selfhood and ethics. This study shows how novels such as Lois Lowry's *The Giver* (1993) and Judy Blume's *Starring Sally J Freedman as Herself* (1977) — both of which feature protagonists who adapt their elders' memories into their own mnemonic repertoires — implicitly reject Cartesian notions of the unified subject in favor of a view of identity as always-already social, relational, and dynamic in

character. This book not only questions how and why second-generation memory is represented in books for young people, but whether such representations of memory might be considered 'radical' or 'conservative'. Together, these analyses address a topic that has not been explored fully within the fields of children's literature, trauma and memory studies, and Holocaust studies.

harry potter 2 and the chamber of secrets: *The Myth of Persephone in Girls' Fantasy Literature* Holly Blackford, 2012-04-23 This book explores the myth of Persephone and Demeter as it informs the development of a long discourse about civilization, the development of children, child psychology, and fantasy literature. The pattern in the myth of girls who descend into underworlds and negotiate a partial return to the earth is a marked feature of girls' literature, and the cycle also reflects the change of seasons and fertility/death. Tracing the parallel between the myth and girls' literature enables an understanding of how female development is mourned but deemed necessary for the reproduction of culture. Blackford looks at the function of toys in children's literature as a representation of the myth's narcissus, combining this approach with classic interpretations of the myth as expressive of female psychology, mother-daughter object-relations, hieros gamos (fertility coupling) rituals, transition from matriarchal to patriarchal order, and excursions into the creative/artistic unconscious. The story of Persephone's separation from her mother and abduction into the underworld is explored as an expression of ambivalence about female development in works such as Hoffmann's *Nutcracker* and *Mouse King*, Alcott's *Little Women*, Brontë's *Wuthering Heights*, Barrie's *Peter and Wendy*, Burnett's *The Secret Garden*, White's *Charlotte's Web*, Rowling's *Harry Potter and the Chamber of Secrets*, Meyer's *Twilight*, and Gaiman's *Coraline*. With this book, Blackford offers a consideration of how literature for the young squares with broader canons, how classics flexibly and uniquely speak through novels that enjoy broad appeal, and how female traditions are embedded in novels by both men and women.

The papers brought together here are motivated by two basic questions: How are myths made in diverse cultures and literatures? And, do all different cultures have different myths to be told in their artistic pursuits? To examine these questions, the book offers a wide array of articles by contributors from various cultures which focus on theory, history, space/ place, philosophy, literature, language, gender, and storytelling. *Mythmaking across Boundaries* not only brings together classical myths, but also contemporary constructions and reconstructions through different cultural perspectives by transcending boundaries. Using a wide spectrum of perspectives, this volume, instead of emphasising the different modes of the mythmaking process, connects numerous perceptions of mythmaking and investigates diversities among cultures, languages and literatures, viewing them as a unified whole. As the essays reflect on both academic and popular texts, the book will be useful to scholars and students, as well as the general reader.
