Dustin Hansen, 2016-11-22 Find out about the fast and furious growth and evolution of video games (including how they are quickly taking over the world!) by looking at some of the most popular, innovative, and influential games ever, from Pong, the very first arcade game ever, to modern hits like Uncharted. Learn about the creators and inspiration (Mario was named after Nintendo’s landlord after he barged into a staff meeting demanding rent), discover historical trivia and Easter eggs (The developers of Halo 2 drank over 24,000 gallons of soda while making the game), and explore the innovations that make each game special (The ghosts in Pac-Man are the first example of AI in a video game). Whether you consider yourself a hard-core gamer or are just curious to see what everyone is talking about, Game On! is the book for you!

sonic the hedgehog news network: Best Before James Newman, 2012-08-21 Despite record sales and an ever-growing global industry, the simple fact is that videogames are disappearing. Most obviously, the physical deterioration of discs, cartridges, consoles and controllers means that the data and devices will crumble to dust and eventually will be lost forever. However, there is more to the disappearance of videogames than plastic corrosion and bit rot. Best Before examines how the videogames industry's retail, publishing, technology design, advertising and marketing practices actively produce obsolescence, wearing out and retiring old games to make way for the always new, just out of reach, 'coming soon' title and 'next generation' platform. Set against the context of material deterioration and the discursive production of obsolescence, Best Before examines the conceptual and practical challenges faced within the nascent field of game preservation. Understanding videogames as rich, complex and mutable texts and experiences that are supported and sustained by cultures of gameplay and fandom, Best Before considers how - and even whether - we might preserve and present games for future generations.

sonic the hedgehog news network: Commercial Intimacy Richard Popp, Brenton Malin, Wendy A. Woloson, 2025-06-03 Explores how marketers have leveraged feelings of personal familiarity in modern consumer capitalism Our wired world connects us with corporations in ways that, just a generation ago, would have been hard to imagine. Marketers track users' habits down to the swipe and scroll; brand influencers reach out to followers in ever more personal ways. Yet, however much we may feel individually recognized (or targeted) by today's marketers, the connections they make are, in truth, fleeting and tactical. They are also nothing new. Marketplace transactions have long been mediated by interactions that blur the line between the putatively public and rational world of commerce and the supposedly private and emotional realm of personal relations. That there is an affective tenor to every sales scenario has never been a secret to talented marketers. How, exactly, marketers have tried to set those moods by endowing commercial relationships with an aura of personal affinity is the subject of *Commercial Intimacy*. Its chapters explore the broad theme of commercial intimacy (that is, market-based feelings of spatial and emotional closeness) in US consumer culture from the mid-nineteenth century to the late twentieth century. They show how experiences of intimacy have been orchestrated by marketers operating at a variety of distances, from the face-to-face solicitations made by retail clerks and direct-sales agents to the long-distance appeals made by mail-order merchants, print and TV advertisers, telemarketers, and e-commerce platforms. The volume pays especially close attention to how these revenue-minded acts of ingratiation worked, how they were shaped by the technologies behind them, and how they capitalized on contemporary dynamics of gender and sexuality. At the heart of this volume, then, is the question of how our understanding of business history changes when we take the emotional, sensational, and affective dynamics of intimacy to be foundational elements of commercial persuasion. Contributors: Samuel Backer, Jennifer M. Black, Donna J. Drucker, Isabelle Marina Held, Julie A. Johnson, Lindsay Mitchell Keiter, Stephanie Kolberg, Brenton J. Malin, Cynthia B. Meyers, Richard K. Popp, Nicole E. Weber, Wendy A. Woloson.
