When twelve-year-old Zinnia Manning's older brother Gabriel is diagnosed with a mental illness, the family's world is turned upside down. Mom and Dad want Zinny, her sixteen-year-old sister, Scarlett, and her eight-year-old brother, Aiden, to keep Gabriel's condition "private"—and to Zinny that sounds the same as "secret." It also means she can't talk about it during Lunch Club, a group run by the school guidance counselor. How did Zinny get stuck in this weird club, anyway? She certainly doesn't have anything in common with these kids—and even if she did, she'd never betray her family's secret. The only good thing about school is science class, where cool teacher Ms. Molina has them doing experiments on crayfish. Douglas Adams’s “six-part trilogy,” The Hitchhiker’s Guide to the Galaxy grew from a blip of a notion into an ever-expanding multimedia universe that amassed an unprecedented cult of followers and became an international sensation. As a young journalist, Neil Gaiman was given complete access to Adams’s life, times, gossip, unpublished outtakes, and files (and became privy to his writing process, insecurities, disillusionments, challenges, and triumphs). The resulting volume illuminates the unique, funny, dramatic, and improbable chronicle of an idea, an incredibly tall man, and a mind-boggling success story. In Don’t Panic, Gaiman celebrates everything Hitchhiker: the original radio play, the books, comics, video and computer games, films, television series, record albums, stage musicals, one-man shows, the Great One himself, and towels. And as Douglas Adams himself attested: “It’s all absolutely devastatingly true—except the bits that are lies.” Updated several times in the thirty years since its original publication, Don’t Panic is available for the first time in digital form. Part biography, part tell-all parody, part pop-culture history, part guide to a guide, Don’t Panic “deserves as much cult success as the Hitchhiker’s books themselves” (Time Out).

Upstairs, 14-year-old Mae had fallen into one of her trances, often a result of feeling too closely attuned to her mother's dark moods. After Marianne is unwillingly admitted to a mental hospital, Edie and Mae are forced to move from their childhood home in Louisiana to New York to live with their estranged father, Dennis, a former civil rights activist and literary figure on the other side of success. The girls, grieving and homesick, are at first wary of their father's affection, but soon Mae and Edie's close relationship begins to fall apart—Edie remains fiercely loyal to Marianne, convinced that Dennis is responsible for her mother's downfall, while Mae, suffocated by her striking resemblances to her mother, feels pulled toward their father. The girls move in increasingly opposing and destructive directions as they struggle to cope with outsized pain, and as the history of Dennis and Marianne's romantic past clicks into focus, the family fractures further. Moving through a selection of first-person accounts and written with a sinister sense of humor, *The Deeper the Water the Uglier the Fish* powerfully captures the quiet torment of two sisters craving the attention of a parent they can't, and shouldn't, have to themselves. In this captivating debut, Katya Apekina disquietingly crooks the lines between fact and fantasy, between escape and freedom, and between love and obsession. The structure, characters and storyline are all refreshingly original, and the writing is nothing short of gorgeous. It's a stunningly accomplished book, and Apekina isn't afraid to grab her readers by the hand and take them to some very dark and very beautiful places. —Michael Schaub, NPR

thanks for all the fish: *One is Never Alone with a Rubber Duck* Marillette van der Colff, 2010-08-11 What do existential elevators, sentient mattresses, paranoid androids, humans and other aliens have in common? For one thing, they want answers. The fact (yes fact) that there are no answers (except, perhaps, for "42") causes some humans (and other aliens) to face this empty madness we call life with Sisyphus-like defiance. Others choose to sulk or skulk or annihilate themselves. Another thing these creatures have in common is that they are all born mad, "and some

remain so". One is never alone with a rubber duck explores the premise that Douglas Adams's Hitchhiker Series is not merely characterised by light-hearted comedy, but is underpinned by intricate philosophical ideas, especially those of twentieth century Existentialism and the related notion of absurdity. It also investigates the interlaced functions of Adams's fantasy and landscapes of alterity, and considers the ambiguous concept of madness as subjective reality. Concepts related to alterity, such as simulation, the structure of reality, dreaming and parallel universes, are investigated as part of Adams's fantastic story space. In a science-fictional sense, Adams's aliens satirise the human condition and the monstrosities that lurk at the heart of twentieth century society.

Furthermore, despite the emergence of undergraduate courses on the subject, no basic textbooks exist. Nanotechnology: Basic Science and Emerging Technologies bridges the gap between detailed technical publications that are beyond the grasp of nonspecialists and popular science books, which may be more science fiction than fact. It provides a fascinating, scientifically sound treatment, accessible to engineers and scientists outside the field and even to students at the undergraduate level. After a basic introduction to the field, the authors explore topics that include molecular nanotechnology, nanomaterials and nanopowders, nanoelectronics, optics and photonics, and nanobiometrics. The book concludes with a look at some cutting-edge applications and prophecies for the future. Nanoscience will bring to the world technologies that today we can only imagine and others of which we have not yet dreamt. This book lays the groundwork for that future by introducing the subject to those outside the field, sparking the

imaginations of tomorrow's scientists, and challenging them all to participate in the advances that will bring nanotechnology's potential to fruition.

The resulting fourteen completely new episodes were produced by Above the Title Productions and broadcast on BBC Radio 4, with nearly all of the original cast reunited for recording. These scripts brilliantly bring to life the last three books in Adams' perennially popular Hitchhiker series: Life, the Universe and Everything; So Long, and Thanks for All the Fish; and Mostly Harmless. Dirk Maggs supplies notes which highlight original Adams material and explain how the cast, special effects and music were directed. The scripts are introduced by Simon Jones, who played Arthur Dent in both the original and the recent radio series, as well as in The Hitchhiker's Guide to the Galaxy television series. Douglas Adams first conceived The Hitchhiker's Guide to the Galaxy for radio and it is an honour to his memory that all five Hitchhiker novels have now been adapted for this medium. These scripts exemplify the freshness of perspective, humour and perspicacity that epitomize the work of Douglas Adams. They will be loved by fans and those new to Hitchhiker's alike.
