tropic of cancer miller: *The Secret Violence of Henry Miller* Katy Masuga, 2011 Miller as a writer whose work does something more profound and violent to literary conventions than produce novel effects: it announces the possibility of difference and instability within language itself. Henry Miller is a cult figure in the world of fiction, in part due to having been banned for obscenity for nearly thirty years. Alongside the liberating effect of his explicit treatment of sexuality, however, Miller developed a provocative form of writing that encourages the reader to question language as a stable communicative tool and to consider the act of writing as an ongoing mode of creation, always in motion, perpetually establishing itself and creating meaning through that very motion. Katy Masuga provides a new reading of Miller that is alert to the aggressively and self-consciously writerly form of his work. Critiquing the categorization of Miller into specific literary genres through an examination of the small body of critical texts on his oeuvre, Masuga draws on Deleuze and Guattari's concept of a minor literature, Blanchot's infinite curve, and Bataille's theory of puerile language, while also considering Miller in relation to other writers, including Proust, Rilke, and William Carlos Williams. She shows how Miller defies conventional modes of writing, subverting language from within. Katy Masuga is Adjunct Professor of British and American literature, cinema, and the arts in the Cultural Studies Department at the University of Paris III: Sorbonne Nouvelle.

tropic of cancer miller: *A Self-made Surrealist* Caroline Blinder, 2000 A new evaluation of a writer who was the talk of the literary world in the early days of the sexual revolution. Since the publication of *Tropic of Cancer* in 1934, Henry Miller has been the target of critics from all sides. *A Self-Made Surrealist* sets out to provide a view of Miller different from both earlier vindications of him as sexual liberator and prophet and more contemporary feminist critiques of him as pornographer and male chauvinist. In this re-evaluation of Miller's role as a radical writer, Blinder considers not only notions of obscenity and sexuality, but also the emergence of psychoanalysis, surrealism, automatic writing, and the aesthetics of fascism, as they illuminate Miller's more general 20th-century concerns with politics and mass psychology in relation to art. Blinder also considers the effect on Miller of the theoretical works of Georges Bataille and André Breton, among others, in order to define and explore the social, philosophical, and political contexts of the period. By examining the enormous impetus Miller got from being in the midst of French culture and its debate, *A Self-Made Surrealist* shows that Miller was indeed a seminal writer of the period rather than simply an isolated male chauvinist.

tropic of cancer miller: *The Unknown Henry Miller* Arthur Hoyle, 2016-08-02 Henry Miller was one of the most distinctive voices in twentieth-century literature, yet he remains misunderstood. Better known in Europe than in his native America for most of his career, he achieved international success and celebrity during the 1960s when his banned "Paris" books—beginning with *Tropic of Cancer*—were published here and judged by the Supreme Court not to be obscene. *The Unknown Henry Miller* recounts Miller's career from its beginnings in Paris in the 1930s but focuses on his years living in Big Sur, California, from 1944 to 1961, during which he wrote many of his most important books, including *The Rosy Crucifixion* trilogy, married and divorced twice, raised two children, painted watercolors, and tried to live out a credo of self-realization. Written with the cooperation of the Henry Miller and Anaïs Nin estates, *The Unknown Henry Miller* draws on material previously unavailable to biographers, including interviews with Lepska Warren, Miller's third wife. Behind the "bad boy" image, Arthur Hoyle finds a man whose challenge of literary sexual taboos was part of a broader assault on the dehumanization of man and commercialization during

the postwar years, and he makes the case for restoring this groundbreaking writer to his rightful place in the American literary canon. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. tropic of cancer miller: Henry Miller and Religion Thomas Nesbit, 2012-12-06 This study argues that this previously banned author devoted his entire life to articulating a religion of self-liberation in his autobiographical books, examining his life and work within the context of fringe religious movements that were linked with the avant-garde in New York City and Paris at the first of the 20th century. This study shows how these transatlantic movements - including Gurdjieff, Rosicrucianism, and Theosophy - gave him the hermeneutical devices, not to mention the creative license, to interpret texts and symbols from mainline religions in an iconoclastic manner, ranging from obscure Taoist treatises to the mystical works of Jacob Boehme. The influence of numerous philosophical sources widely circulated in his most critical years - particularly Henri Bergson's *Two Sources of Morality and Religion* (1932) - also helped him develop a religious view situated between transcendence and immanence, in which self-liberation through the channeled flow of *élan vital* is the chief objective. Miller's knowledge of these intellectual currents, along with his involvement with sidestream religious groups, inspired him to meld his religious and literary aims into one perplexing project.
