The Orientalist buddy film draws a scenario in which two buddies, one white and one black, transcend an initial hatred for one another by joining forces against a foreign Asian menace. Alongside an analysis of multiple genres of film, Brian Locke argues that this triangulated rendering of race ameliorates the longstanding historical contradiction between U.S. democratic ideals and white America's persistent domination over blacks.

Accurate histories of western interventions and regional realities are often obscured or even eclipsed in the accounts of western mainstream media, which, if anything, tend to rue the withdrawals and lionize the suffering of returning troops. This volume investigates the state's role in the dark underbelly of the shortsighted interventionist media narrative, as well as the dehumanizing portrayals of people living in the Afghanistan-Pakistan region. In its opening section, the book critically evaluates the narrative of the Global War on Terror, as well as the wars launched after 9/11 that destabilized the Middle East. The chapters in the following section contextualize developments in Afghanistan with a historical framework that will problematize linear narratives that are mobilized in support of interventions. The chapters in the final section re-present specific aspects of the geopolitical and humanitarian consequences that have eluded mainstream media workers, including journalists and Hollywood moviemakers. This book will be of interest to students of propaganda studies, media and communication studies, US foreign policy, and international relations.
