40 years of scream the archival collection: *Bloodflowers* W. Ian Bourland, 2019-01-31 In *Bloodflowers* W. Ian Bourland examines the photography of Rotimi Fani-Kayode (1955-1989), whose art is a touchstone for cultural debates surrounding questions of gender and queerness, race and diaspora, aesthetics and politics, and the enduring legacy of slavery and colonialism. Born in Nigeria, Fani-Kayode moved between artistic and cultural worlds in Washington, DC, New York, and London, where he produced the bulk of his provocative and often surrealist and homoerotic photographs of black men. Bourland situates Fani-Kayode's work in a time of global transition and traces how it exemplified and responded to profound social, cultural, and political change. In addition to his formal analyses of Fani-Kayode's portraiture, Bourland outlines the important influence that surrealism, neo-Romanticism, Yoruban religion, the AIDS crisis, experimental film, loft culture, and house and punk music had on Fani-Kayode's work. In so doing, Bourland offers new perspectives on a pivotal artist whose brief career continues to resonate with deep aesthetic and social meaning.

and potentially dangerous professional operations - the risks of sea voyages even on technically sophisticated ocean liners, whose interiors and services often include grand hotels in the metropolises of the late 19th and 20th century, were discreetly ignored by the passengers. The charm of the Atlantic and the ship, unthinkable in earlier times, should not be decimated in any way.

40 years of scream the archival collection: Monuments and Memory, Made and Unmade
Robert S. Nelson, Margaret Olin, 2003 How do some monuments become so socially powerful that people seek to destroy them? After ignoring monuments for years, why must we now commemorate public trauma, but not triumph, with a monument? To explore these and other questions, Robert S. Nelson and Margaret Olin assembled essays from leading scholars about how monuments have functioned throughout the world and how globalization has challenged Western notions of the monument. Examining how monuments preserve memory, these essays demonstrate how phenomena as diverse as ancient drum towers in China and ritual whale-killings in the Pacific Northwest serve to represent and negotiate time. Connecting that history to the present with an epilogue on the World Trade Center, *Monuments and Memory, Made and Unmade* is pertinent not only for art historians but for anyone interested in the turbulent history of monuments—a history that is still very much with us today. 40 years of scream the archival collection: The Making of the "Rape of Nanking" Takashi Yoshida, 2009-03-04 On December 13, 1937, the Japanese army attacked and captured the Chinese capital city of Nanjing, planting the rising-sun flag atop the city's outer walls. What occurred in the ensuing weeks and months has been the source of a tempestuous debate ever since. It is well known that the Japanese military committed wholesale atrocities after the fall of the city, massacring large numbers of Chinese during the both the Battle of Nanjing and in its aftermath. Yet the exact details of the war crimes--how many people were killed during the battle? How many after? How many women were raped? Were prisoners executed? How unspeakable were the acts committed?--are the source of controversy among Japanese, Chinese, and American historians to this day. In *The Making of the Rape of Nanking* Takashi Yoshida examines how views of the Nanjing Massacre have evolved in history writing and public memory in Japan, China, and the United States. For these nations, the question of how to treat the legacy of Nanjing--whether to deplore it, sanitize it, rationalize it, or even ignore it--has aroused passions revolving around ethics, nationality, and historical identity. Drawing on a rich analysis of Chinese, Japanese, and American history textbooks and newspapers, Yoshida traces the evolving--and often conflicting--understandings of the Nanjing Massacre, revealing how changing social and political environments have influenced the debate. Yoshida suggests that, from the 1970s on, the dispute over Nanjing has become more lively, more globalized, and immeasurably more intense, due in part to Japanese revisionist history and a renewed emphasis on patriotic education in China. While today it is easy to assume that the Nanjing Massacre has always been viewed as an emblem of Japan's wartime aggression in China, the image of the Rape of Nanking is a much more recent icon in public consciousness. Takashi Yoshida analyzes the process by which the Nanjing Massacre has become an international symbol, and provides a fair and respectful treatment of the politically charged and controversial debate over its history.

40 years of scream the archival collection: Can't Be Faded Stooges Brass Band, Kyle DeCoste, 2020-08-25 The Stooges Brass Band always had big dreams. From playing in the streets of New Orleans in the mid-1990s to playing stages the world over, they have held fast to their goal of raising brass band music and musicians to new heights—professionally and musically. In the intervening years, the band's members have become family, courted controversy, and trained a new generation of musicians, becoming one of the city's top brass bands along the way. Two decades after their founding, they have decided to tell their story. *Can't Be Faded: Twenty Years in the New Orleans Brass Band* Game is a collaboration between musician and ethnomusicologist Kyle DeCoste and more than a dozen members of the Stooges Brass Band, past and present. It is the culmination of five years of interviews, research, and writing. Told with humor and candor, it's as much a personal account of the Stooges' careers as it is a story of the city's musicians and, even more generally, a coming-of-age tale about black men in the United States at the turn of the twenty-first century. DeCoste and the band members take readers into the barrooms, practice rooms, studios, tour vans, and streets where the music is made and brotherhoods are shaped and strengthened. Comprised of lively firsthand accounts and honest dialogue, *Can't Be Faded* is a dynamic approach to collaborative research that offers a sensitive portrait of the humans behind the horns.
