The Blade Runner Experience: The Legacy of a Science Fiction Classic examines the film in a broad context, examining its relationship to the original novel, the PC game, the series of sequels, and the many films influenced by its style and themes. blade runner 2 kw jeter: Blade Runner Matt Hills, 2011-12-13 More than just a box office flop that resurrected itself in the midnight movie circuit, Blade Runner (1982) achieved extraordinary cult status through video, laserdisc, and a five-disc DVD collector's set. Blade Runner has become a network of variant texts and fan speculations a franchise created around just one film. Some have dubbed the movie classroom cult for its participation in academic debates, while others have termed it meta-cult, in line with the work of Umberto Eco. The film has also been called design cult, thanks to Ridley Scott's brilliant creation of a Los Angeles in 1919, the graphics and props of which have been recreated by devoted fans. Blade Runner tests the limits of this authenticity and artificiality, challenging the reader to differentiate between classic and flop, margin and mainstream, true cult and its replicants.

blade runner 2 kw jeter: Blade Runner Amy Coplan, David Davies, 2015-05-08 Ridley Scott's Blade Runner is widely regarded as a masterpiece of modern cinema and is regularly ranked as one of the great films of all time. Set in a dystopian future where the line between human beings and 'replicants' is blurred, the film raises a host of philosophical questions about what it is to be human, the possibility of moral agency and freedom in 'created' life forms, and the capacity of cinema to make a genuine contribution to our engagement with these kinds of questions. This volume of specially commissioned chapters systematically explores and addresses these issues from a philosophical point of view. Beginning with a helpful introduction, the seven chapters examine the following questions: How is the theme of death explored in Blade Runner and with what implications for our understanding of the human condition? What can we learn about the relationship between emotion and reason from the depiction of the 'replicants' in Blade Runner? How are memory, empathy, and moral agency related in Blade Runner? How does the style and 'mood' of Blade Runner bear upon its thematic and philosophical significance? Is Blade Runner a meditation on the nature of film itself? Including a brief biography of the director and a detailed list of references to other writings on the film, Blade Runner is essential reading for students - indeed anyone - interested in philosophy and film studies. first feature film, *The Duellists*, to his international successes *Alien*, *Blade Runner*, *Thelma and Louise*, *Black Hawk Down*, *Gladiator*, and *American Gangster*, Ridley Scott has directed some of the most compelling films of the last 30 years. Apart from his work as a film director, Scott has engaged in a vast range of activities, including that as a designer, producer, film mogul, and advertising executive. The *Ridley Scott Encyclopedia* is the first book that focuses on all aspects of his work in a wide-ranging career that spans nearly 50 years. The entries in this encyclopedia focus on all aspects of his work and are divided into four categories. The first focuses on Ridley Scott's work as a director, encompassing his feature films from *The Duellists* to *Body of Lies*, as well as his work in television, including commercials. The second category focuses on the people who have been involved in Scott's projects, including actors, directors, producers, designers, writers and other creative personnel. The third focuses on general thematic issues raised in Scott's work, such as gender construction, political issues, and geographical locations. Finally the encyclopedia incorporates entries on films by other directors who have influenced Scott's approach to his work as a director or producer. Each entry is followed by a bibliography of published sources, both in print and online, making this the most comprehensive reference on Scott's body of work.

Dick's *Do Androids Dream of Electric Sheep?* The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in *Paradise Lost*, *Frankenstein*, detective fiction, and previous science fiction cinema.

blade runner 2 kw jeter: *Writing and Cinema* Jonathan Bignell, 2014-07-22 This collection of essays examines the ways in which writing and cinema can be studied in relation to each other. A wide range of material is presented, from essays which look at particular films, including *The Piano* and *The English Patient*, to discussions of the latest developments in film studies including psychoanalytic film theory and the cultural study of film audiences. Specific topics that the essays address also include: the kinds of writing produced for the cinema industry, advertising, film adaptations of written texts and theatre plays from nineteenth century 'classic' novels to recent cyberpunk science fiction such as *Blade Runner* and *Starship Troopers*. The essays deal with existing areas of debate, like questions of authorship and audience, and also break new ground, for example in proposing approaches to the study of writing on the cinema screen. The book includes a select bibliography, and a documents section gives details of a range of films for further study.

blade runner 2 kw jeter: *The Cinematic Novel and Postmodern Pop Fiction* Décio Torres Cruz, 2019-12-05 Décio Torres Cruz approaches connections between literature and cinema partly through issues of gender and identity, and partly through issues of reality and representation. In doing so, he looks at the various ways in which people have thought of the so-called cinematic novel, tracing the development of that genre concept not only in the French *ciné-roman* and film scenarios but also in novels from the United States, England, France, and Latin America. The main tendency he identifies is the blending of the cinematic novel with pop literature, through allusions to Pop Art and other postmodern cultural trends. His prime exhibits are a number of novels by the Argentinian writer Manuel Puig: *Betrayed* by Rita Hayworth; *Heartbreak Tango*; *The Buenos Aires Affair*; *Kiss of the Spider Woman*; and *Pubis angelical*. Bringing in suggestive sociocultural and psychoanalytical considerations, Cruz shows how, in Puig's hands, the cinematic novel resulted in a pop collage of different texts, films, discourses, and narrative devices which fused reality and imagination into dream and desire.

En este ensayo se analizan las diferentes versiones de *Blade Runner* y se abordan, con un estilo ágil y gran rigor analítico, las reflexiones antropológicas y morales que propone la película. ¿Qué era lo que Deckard no sabía?
