in this sign conquer: The Royal Army Chaplains' Department, 1796-1953 Michael Francis Snape, 2008 A survey and reassessment of the role of the army chaplain in its first 150 years. Few military or ecclesiastical figures are as controversial as the military chaplain, routinely attacked by pacifist and anticlerical commentators and too readily dismissed by religious and military historians. This highly revisionist study represents a complete reappraisal of the role of the British army chaplain and of the Royal Army Chaplains' Department in the first century and a half of its existence. Challenging old caricatures and stereotypes and drawing on a wealth of new archival material, it surveys the political, denominational and organisational development of the R.A.Ch.D., analyses the changing role and experience of the British army chaplain across the nineteenth century and the two World Wars, and addresses the wider significance of British army chaplaincy for Britain's military, religious and cultural history over the period c.1800-1950. in this sign conquer: *Religion on the Battlefield* Ron E. Hassner, 2016-05-18 How does religion shape the modern battlefield? Ron E. Hassner proposes that religion acts as a force multiplier, both enabling and constraining military operations. This is true not only for religiously radicalized fighters but also for professional soldiers. In the last century, religion has influenced modern militaries in the timing of attacks, the selection of targets for assault, the zeal with which units execute their mission, and the ability of individual soldiers to face the challenge of war. Religious ideas have not provided the reasons why conventional militaries fight, but religious practices have influenced their ability to do so effectively. In *Religion on the Battlefield*, Hassner focuses on the everyday practice of religion in a military context: the prayers, rituals, fasts, and feasts of the religious practitioners who make up the bulk of the adversaries in, bystanders to, and observers of armed conflicts. To show that religious practices have influenced battlefield decision making, Hassner draws most of his examples from major wars involving Western militaries. They include British soldiers in the trenches of World War I, U.S. pilots in World War II, and U.S. Marines in Iraq and Afghanistan. Hassner shows that even modern, rational, and bureaucratized military organizations have taken—and must take—religious practice into account in the conduct of war.

in this sign conquer: *The Oxford Handbook of the Oxford Movement* Stewart J. Brown, Peter Nockles, James Pereiro, 2018-01-25 The *Oxford Handbook of the Oxford Movement* reflects the rich and diverse nature of scholarship on the Oxford Movement and provides pointers to further study and new lines of enquiry. Part I considers the origins and historical context of the Oxford Movement. These chapters include studies of the legacy of the seventeenth-century 'Caroline Divines' and of the nature and influence of the eighteenth and early nineteenth-century High Church movement within the Church of England. Part II focuses on the beginnings and early years of the Oxford Movement, paying particular attention to the people, the distinctive Oxford context, and the ecclesiastical controversies that inspired the birth of the Movement and its early intellectual and religious expressions. In Part III the theme shifts from early history of the Oxford Movement to its distinctive theological developments. This section analyses Tractarian views of religious knowledge and the notion of 'ethos'; the distinctive Tractarian views of tradition and development; and Tractarian ecclesiology, including ideas of the *via media* and the 'branch theory' of the Church. The years of crisis for the Oxford Movement between 1841 and 1845, including John Henry Newman's departure from the Church of England, are covered in Part IV. Part V then proceeds to a consideration of the broader cultural expressions and influences of the Oxford Movement. Part VI focuses on the world outside England and examines the profound impact of the Oxford Movement on Churches beyond the English heartland, as well as on the formation of a world-wide Anglicanism. In Part VII, the contributors show how the Oxford Movement remained a vital force in the twentieth century, finding expression in the Anglo-Catholic Congresses and in the Prayer Book Controversy of the 1920s within the Church of England. The Handbook draws to a close, in Part VIII, with a set of more generalised reflections on the impact of the Oxford Movement, including chapters on the judgement of the converts to Roman Catholicism over the Movement's loss of its original character, on the spiritual life and efforts of those who remained within the Anglican Church to keep Tractarian ideas alive, on the engagement of the Movement with Liberal Protestantism and Liberal Catholicism, and on the often contentious historiography of the Oxford Movement which continued to be a source of church party division as late as the centennial commemorations of the Movement in 1933. An 'Afterword' chapter assesses the continuing influence of the Oxford Movement in the world Anglican Communion today, with special references to some of the conflicts and controversies that have shaken Anglicanism since the 1960s.

States and Canada. With close to 300 photographs, maps, and timelines throughout and thought-provoking study questions at the end of each chapter, *The Church in History* is an excellent introductory resource for students or for anyone wanting to better understand the history of the church.

in this sign conquer: *The Clergy in Khaki* Edward Madigan, 2016-03-23 British army chaplains have not fared well in the mythology of the First World War. Like its commanders they have often been characterized as embodiments of ineptitude and hypocrisy. Yet, just as historians have reassessed the motives and performance of British generals, this collection offers fresh insights into the war record of British chaplains. Drawing on the expertise of a dozen academic researchers, the collection offers an unprecedented analysis of the subject that embraces military, political, religious and imperial history. The volume also benefits from the professional insights of chaplains themselves, several of its contributors being serving or former members of the Royal Army Chaplains' Department. Providing the fullest and most objective study yet published, it demonstrates that much of the post-war hostility towards chaplains was driven by political, social or even denominational agendas and that their critics often overlooked the positive contribution that chaplains made to the day-to-day struggles of soldiers trying to cope with the appalling realities of industrial warfare and its aftermath. As the most complete study of the subject to date, this collection marks a major advance in the historiography of the British army, of the British churches and of British society during the First World War, and will appeal to researchers in a broad range of academic disciplines.

in this sign conquer: *Ruin and Restoration* David Martin, 2018-10-24 To suppose that God has a providential plan based on a special covenant with Israel and realised in the atonement presents us with a moral problem. In *Ruin and Restoration* David Martin sketches a radical naturalistic account of the atonement based on the innocent paying for the sins of the guilty through ordinary social processes. An exercise in socio-theology, the book reflects on the contrast between 'the world' governed by the dynamic of violence as analysed by the social sciences, including international relations, and the emergence in Christianity (and Buddhism) of a non-violent alternative. A 'governing essay' fuses frameworks drawn from Reinhold Niebuhr, Karl Jaspers, Ernst Troeltsch and Max Weber and explores the relation between the cultural sciences, especially sociology, and theology treated as another but very distinctive cultural science. Six commentaries then deal with the atonement in detail; with the nature of Christian language and grammar, and with its characteristic mutations due to necessary compromises with 'the world'; with sex and violence; and with the liturgy as a concentrated mode of reconciliation.

in this sign conquer: *Captains of the Soul* Michael Gladwin, 2013-12-19 Known affectionately as 'Padres', chaplains have been integral to the Australian Army for a century. From the legendary William 'Fighting Mac' McKenzie, whose friendships with diggers in the trenches of Gallipoli and France made him a national figure in 1918, to Harold Wardale-Greenwood, who died caring for the sick while a POW on the brutal Sandakan 'death march' in July 1945, this book assesses the contribution of Australian Army chaplains in conflicts and peacekeeping missions, in barracks and among service families. Drawing on a wealth of original archival material and little known published sources, *Captains of the Soul* represents the first comprehensive account of Australian Army chaplains. It surveys their changing role and experience from the Great War of 1914-18 to the recent conflict in Afghanistan; charts the evolution of the Royal Australian Army Chaplains' Department across its first century; and addresses the significance of Army chaplaincy for Australia's military, religious and cultural history. It is a story of personal conviction and selfless devotion.

in this sign conquer: *Missional: Impossible!* Francis Rothery, 2014-01-07 Mainline Christianity in the West is dying. Addiction to hierarchical and bureaucratic power is killing it. A management-god and a mission-god have usurped the Way of Christ. In the midst of decline the missional movement is attempting to reboot the church. Its goal is to remake a New Christian West through mission, leadership, mapping, and planning. Yet it is trapped in the language and methods of modernity. Its final solution is a polarizing vision of cultural domination by one social group, the Christians. The Way of Life and Truth has been forgotten. Christ is not a conquering King, a written Word, or an absolute Idea, but a divine Human Being. Social wholeness can only be realized through a rediscovery of Conversation, Reconciliation, and Empowerment. These reflect Christ's practices of eternal dialogue and reciprocal giving in small communities. Through this mutual Way of Life people of all faiths (and none) can discover deep within themselves Our Un/Known G-d. A gentle voice is whispering in the heart of all humanity, I am . . . the Way.
