social work law alison brammer: Vulnerabilities, Care and Family Law Julie Wallbank, Jonathan Herring, 2013-11-26 While in the past family life was characterised as a haven from the harsh realities of life, it is now recognised as a site of vulnerabilities and a place where care work can go unacknowledged and be a source of social and economic hardship. This book addresses the strong relationships that exist between vulnerability and care and dependency in particular contexts, where family law and social policy have a contribution to make. A fundamental premise of this collection is that vulnerability needs to be analysed in a way that gets at the heart of the differential power relationships that exist in society, particularly in respect of access to family justice, including effective social policy and law targeted at the specific needs of families in mutually dependent caring relationships. It is therefore crucial to critically examine the various approaches taken by policy makers and law reformers in order to understand the range of ways that some families, and some family members, may be rendered more vulnerable than others. The first book of its kind to provide an intersectional approach to this subject, *Vulnerabilities, Care and Family Law* will be of interest to students and practitioners of social policy and family law.

The profession is committed to maximizing service users' autonomy yet vulnerable people may be at risk of abuse or injury if they exercise complete independence - so practitioners need to know in what situations it is appropriate for that autonomy to be curtailed. This accessible and practically-grounded text equips social workers with the legal knowledge needed to work effectively with some of the most vulnerable people in society. It explores capacity in relation to minors, vulnerable adults and mental health, as well as covering complex issues such as refusal to accept treatment and deprivation of liberty. The book goes on to explore the different legal mechanisms that are available for promoting autonomy and safeguarding people's interests. The text is supported by a range of innovative features and boxed information to aid learning and stimulate reflection: - Key Case Analysis boxes summarize the details of particular legislation cases and outline the implications for social work practice. - Practice Focus boxes apply legal principles and processes to practice through the use of social work scenarios. - On-The-Spot Questions reinforce understanding and encourage critical reflection.
