sophie marceau anna karenina: Anna Karenina in Our Time Gary Saul Morson, 2007-01-01 In this invigorating new assessment of Anna Karenina, Gary Saul Morson overturns traditional interpretations of the classic novel and shows why readers have misunderstood Tolstoy's characters and intentions. Morson argues that Tolstoy's ideas are far more radical than has been thought: his masterpiece challenges deeply held conceptions of romantic love, the process of social reform, modernization, and the nature of good and evil. By investigating the ethical, philosophical, and social issues with which Tolstoy grappled, Morson finds in Anna Karenina powerful connections with the concerns of today. He proposes that Tolstoy's effort to see the world more wisely can deeply inform our own search for wisdom in the present day. The book offers brilliant analyses of Anna, Karenin, Dolly, Levin, and other characters, with a particularly subtle portrait of Anna's extremism and self-deception. Morson probes Tolstoy's important insights (evil is often the result of negligence; goodness derives from small, everyday deeds) and completes the volume with an irresistible, original list of One Hundred and Sixty-Three Tolstoyan Conclusions.

Ian Carter delves into the cultural impact of the train. Why, for example, did Britain possess no great railway novel? He compares fiction and images by canonical British figures (Turner, Dickens, Arnold Bennett) with selected French and Russian competitors: Tolstoy, Zola, Monet, Manet. He argues that while high cultural work on the British steam railway is thin, British popular culture did not ignore it. Detailed discussions of comic fiction, crime fiction, and cartoons reveal a popular fascination with railways tumbling from vast (and hitherto unexplored) stores of critically overlooked genres.

Crossing: Russian Literature into Film examines the way classic Russian texts have been altered to suit new cinematic environments. In these essays, international scholars examine how political and economic circumstances, from a shifting Soviet political landscape to the perceived demands of American and European markets, have played a crucial role in dictating how filmmakers transpose their cinematic hypertext into a new environment. Rather than focus on the degree of accuracy or fidelity with which these films address their originating texts, this innovative collection explores the role of ideological, political, and other cultural pressures that can affect the transformation of literary narratives into cinematic offerings.
