the shining stephen king: *The Gothic Other* Ruth Bienstock Anolik, Douglas L. Howard, 2014-09-26 Literary use of the Gothic is marked by an anxious encounter with otherness, with the dark and mysterious unknown. From its earliest manifestations in the turbulent eighteenth century, this seemingly escapist mode has provided for authors a useful ground upon which to safely confront very real fears and horrors. The essays here examine texts in which Gothic fear is relocated onto the figure of the racial and social Other, the Other who replaces the supernatural ghost or grotesque monster as the code for mystery and danger, ultimately becoming as horrifying, threatening and unknowable as the typical Gothic manifestation. The range of essays reveals that writers from many canons and cultures are attracted to the Gothic as a ready medium for expression of racial and social anxieties. The essays are grouped into sections that focus on such topics as race, religion, class, and centers of power.

"The House of Usher" and its literary progeny have not lacked for tenants in the century and a half since: writers from Nathaniel Hawthorne to Stephen King have taken rooms in the haunted houses of American fiction. Dale Bailey traces the haunted house tale from its origins in English gothic fiction to the paperback potboilers of the present, highlighting the unique significance of the house in the domestic, economic, and social ideologies of our nation. The author concludes that the haunted house has become a powerful and profoundly subversive symbol of everything that has gone nightmarishly awry in the American Dream.

the shining stephen king: *Hearths of Darkness* Tony Williams, 2014-11-27 *Hearths of Darkness: The Family in the American Horror Film* traces the origins of the 1970s family horror subgenre to certain aspects of American culture and classical Hollywood cinema. Far from being an ephemeral and short-lived genre, horror actually relates to many facets of American history from its beginnings to the present day. Individual chapters examine aspects of the genre, its roots in the Universal horror films of the 1930s, the Val Lewton RKO unit of the 1940s, and the crucial role of Alfred Hitchcock as the father of the modern American horror film. Subsequent chapters investigate the key works of the 1970s by directors such as Larry Cohen, George A. Romero, Brian De Palma, Wes Craven, and Tobe Hooper, revealing the distinctive nature of films such as *Bone*, *It's Alive*, *God Told Me To*, *Carrie*, *The Exorcist*, *Exorcist 2*, *The Texas Chainsaw Massacre*, as well as the contributions of such writers as Stephen King. Williams also studies the slasher films of the 1980s and 1990s, such as the *Friday the 13th* series, *Halloween*, the remake of *The Texas Chainsaw Massacre*, and *Nightmare on Elm Street*, exploring their failure to improve on the radical achievements of the films of the 1970s. After covering some post-1970s films, such as *The Shining*, the book concludes with a new postscript examining neglected films of the twentieth and early twenty-first century. Despite the overall decline in the American horror film, Williams determines that, far from being dead, the family horror film is still with us. Elements of family horror even appear in modern television series such as *The Sopranos*. This updated edition also includes a new introduction.
