the streets of liverpool: *The Making of Liverpool* Mike Fletcher, 2004-04-30 Discover the fascinating history of this coastal English city from its Medieval origins to its status today as a world-renowned cultural destination. In *The Making of Liverpool*, Mike Fletcher tells the story of this historic city and highlights the significant changes that have made it what it is today. It all begins with King John's 1207 charter and the construction of Liverpool castle to protect this new town. Liverpool's development throughout the medieval period was slow, and even through the reigns of the Tudors and Stuarts, the town was confined to the waterfront area. Through the English Civil Wars, Liverpool endured three brutal sieges. But during the Georgian period, it embraced the transport revolution by investing in river navigations and building the first passenger railway. By the nineteenth century, Liverpool was a thriving port, yet life in the city was beset by poverty and disease. Even as the twentieth century brought the devastation of two world wars and the Toxteth Riots, Liverpool found international fame during the swinging sixties. More recently, it has enjoyed a significant resurgence and was named European Capital of Culture in 2008.

the streets of liverpool: *The Streets of London* Sheila Fairfield, 1983

the streets of liverpool: *Crime Control and Everyday Life in the Victorian City* David Churchill, 2017 The history of modern crime control is usually presented as a narrative of how the state wrested control over the governance of crime from the civilian public. Most accounts trace the decline of a participatory, discretionary culture of crime control in the early modern era, and its replacement by a centralized, bureaucratic system of responding to offending. The formation of the 'new' professional police forces in the nineteenth century is central to this narrative: henceforth, it is claimed, the priorities of criminal justice were to be set by the state, as ordinary people lost what authority they had once exercised over dealing with offenders. This book challenges this established view, and presents a fundamental reinterpretation of changes to crime control in the age of the new police. It breaks new ground by providing a highly detailed, empirical analysis of everyday crime control in Victorian provincial cities - revealing the tremendous activity which ordinary people displayed in responding to crime - alongside a rich survey of police organization and policing in practice. With unique conceptual clarity, it seeks to reorient modern criminal justice history away from its established preoccupation with state systems of policing and punishment, and move towards a more nuanced analysis of the governance of crime. More widely, the book provides a unique and valuable vantage point from which to rethink the role of civil society and the state in modern governance, the nature of agency and authority in Victorian England, and the historical antecedents of pluralized modes of crime control which characterize contemporary society.
