

1 000 amazing facts

1 000 amazing facts – a treasure trove of fascinating insights that span the breadth of human knowledge, nature, science, history, technology, and the universe. Whether you're a curious learner, a trivia enthusiast, or someone seeking to expand your understanding of the world, this comprehensive collection of astonishing facts will captivate your imagination and broaden your horizons. In this article, we delve into a diverse range of topics, presenting 1 000 remarkable facts that will surprise, educate, and entertain you. Let's embark on this journey of discovery and uncover some of the most incredible truths about our world and beyond.

Introduction to Amazing Facts

Understanding the world around us often begins with curiosity. Amazing facts serve as windows into the extraordinary, revealing how strange, beautiful, and complex our universe truly is. From the smallest particles to the vast cosmos, each fact offers a glimpse into the marvels of existence. This article aims to compile a curated list of 1 000 amazing facts, categorized for easier navigation and better learning experience.

Science and Nature Facts

Earth and Environment

- The Amazon rainforest produces about 20% of the world's oxygen, earning it the nickname "Lungs of the Earth."
- Mount Everest grows approximately 4 millimeters taller each year due to tectonic plate movement.
- There are more than 3 trillion trees on Earth, with the majority located in tropical rainforests.
- Antarctica is the driest, windiest, and coldest continent, and it's technically a desert because it gets very little precipitation.
- The Sahara Desert is not just hot; it can also experience snowfall, as seen in recent years.

Animals and Plants

1. The heart of a blue whale weighs as much as a small car, around 400 pounds (180 kg).
2. Crows can recognize human faces and remember those who have been kind or threatening to them.

3. Octopuses have three hearts and blue blood, which helps them survive in deep ocean environments.
4. Some species of bamboo can grow up to 35 inches in a single day, making it one of the fastest-growing plants.
5. The immortal jellyfish (*Turritopsis dohrnii*) can revert to its juvenile form after reaching maturity, potentially living forever under ideal conditions.

Physics and Chemistry

- Light from the Sun takes about 8 minutes and 20 seconds to reach Earth.
- Neutron stars are so dense that a sugar-cube-sized amount of material would weigh about a billion tons on Earth.
- Water can boil and freeze at the same time, a phenomenon called the triple point, which occurs at precise temperature and pressure conditions.
- Pluto, once considered the ninth planet, is classified as a dwarf planet but still has a complex geology and atmosphere.
- Quantum entanglement allows particles to be connected over vast distances instantly, defying classical physics.

Historical Facts

Ancient Civilizations

- The Great Pyramid of Giza was the tallest man-made structure for over 3,800 years.
- Cleopatra VII lived closer in time to the moon landing than to the construction of the Great Pyramid.
- The shortest war in history was between Britain and Zanzibar on August 27, 1896. It lasted between 38 and 45 minutes.
- Ancient Egyptians used honey as an antiseptic to treat wounds, a practice still relevant today.
- The Library of Alexandria, one of the largest and most significant libraries of the ancient world, was tragically destroyed multiple times.

Modern History

1. The Eiffel Tower can expand by about 6 inches during hot days due to metal expansion.
2. NASA's Apollo 11 lunar module weighed about 15,200 pounds (6,900 kg) on Earth but only about 2,500 pounds (1,100 kg) on the Moon due to reduced gravity.
3. The Berlin Wall fell in 1989, leading to the reunification of East and West Germany after nearly 30 years.
4. The first email was sent by Ray Tomlinson to himself in 1971 as a test message.
5. Plastic was first invented in 1907 by Leo Baekeland, revolutionizing manufacturing and packaging industries.

Technology and Innovation

Computers and Internet

- The first computer virus was created in 1986 and was called "Brain."
- The world's first website is still online: info.cern.ch, created by Tim Berners-Lee in 1991.
- There are more devices connected to the Internet than there are people on Earth.
- Quantum computers could potentially solve complex problems faster than classical computers, revolutionizing fields like cryptography.
- The average person checks their smartphone over 80 times a day, highlighting our dependence on technology.

Space Exploration

1. The Voyager 1 spacecraft has been traveling in space since 1977 and is now over 14 billion miles from Earth.
2. The Hubble Space Telescope has captured images of galaxies over 13 billion light-years away.
3. One day on Venus lasts about 243 Earth days, making a year on Venus longer than its day.

4. Saturn's moon Titan has lakes of liquid methane and ethane, making it one of the most Earth-like celestial bodies in the solar system.
5. SpaceX's reusable rockets have significantly lowered the cost of space travel, opening new frontiers for exploration.

Human Body Facts

Physiology and Health

- The human brain contains about 86 billion neurons, each capable of forming thousands of connections.
- Your blood travels about 12,000 miles (19,312 km) through your body every day.
- The human nose can detect over 1 trillion different scents.
- Humans are the only animals with the ability to blush, a unique social and emotional response.
- Bone is five times stronger than steel of the same density, making it incredibly resilient.

Human Achievements

1. The longest recorded human lifespan is 122 years and 164 days, held by Jeanne Calment from France.
2. The human heart beats about 3 billion times in an average lifetime.
3. Humans have more bacterial cells in their bodies than human cells, mostly in the gut.
4. The average person will walk the equivalent of five times around the Earth in their lifetime.
5. Our bodies contain enough carbon to fill about 9,000 pencils.

Pop Culture and Miscellaneous Facts

Music, Movies, and Art

- The song "Happy Birthday" was originally written in 1893 as "Good Morning to All" by two sisters, Patty and Mildred J. Hill.
- The most expensive painting ever sold is Leonardo da Vinci's "Salvator Mundi," which sold for over \$450 million.
- The Marvel Cinematic Universe is the highest-grossing film franchise of all time, earning over \$22 billion worldwide.
- The iconic "Star Wars" franchise has led to numerous spin-offs, merchandise, and a dedicated global fanbase.
- Vinyl records have seen a resurgence in popularity, with over 41 million units sold in 2020 alone.

Sports and Leisure

1. The Olympic Games were revived in 1896 in Athens after a hiatus since ancient times.
2. Golf is the only sport to have been played on the Moon; astronaut Alan Shepard hit two golf balls during Apollo 14.
3. The fastest marathon ever recorded was completed in under 2 hours and 2 minutes by Eliud Kipchoge in a special event.
4. Chess is over 1,500 years old and is considered one of the most strategic board games in history.
5. Skateboarding was first invented in California in the 1950s and has evolved into a worldwide sport and culture.

Conclusion: Celebrating the Wonder of Our World

This collection of 1 000 amazing facts demonstrates just how extraordinary our universe is. From the depths of the oceans to the far reaches of space, from ancient civilizations to

Frequently Asked Questions

What are some examples of the most astonishing facts about space in '1 000 amazing facts'?

The book highlights facts such as the existence of planets made of diamond, the fact that a day on Venus lasts longer than a year on Venus, and that there are more stars in the universe than grains of sand on all Earth's beaches.

How does '1 000 amazing facts' reveal surprising truths about animals?

It shares fascinating details like octopuses having three hearts, a snail can sleep for three years, and honey never spoils, providing a deeper appreciation for the diversity and wonder of the animal kingdom.

What are some mind-blowing historical facts featured in '1 000 amazing facts'?

The book covers facts such as Cleopatra living closer in time to the iPhone than the construction of the Great Pyramid, and that Napoleon was once attacked by a horde of wild rabbits during a hunting trip.

Can you give an example of a surprising scientific fact from '1 000 amazing facts'?

One example is that water can boil and freeze at the same time, a phenomenon called triple point, and that there are more molecules in a single glass of water than stars in the observable universe.

What are some fun and quirky facts about human body included in '1 000 amazing facts'?

It states that human bones are about five times stronger than steel of the same density, the human nose can detect over a trillion scents, and that the human brain generates enough electricity to power a small light bulb.

Additional Resources

1 000 Amazing Facts: Unlocking the Wonders of the World and Beyond

In a world overflowing with information, discovering a curated collection of 1 000 amazing facts offers an exhilarating journey into the extraordinary, the peculiar, and the awe-inspiring. Whether you're a trivia enthusiast, a curious learner, or someone seeking to impress friends with fascinating tidbits, exploring these facts provides endless entertainment and enlightenment. From astonishing scientific discoveries to bizarre historical anecdotes, this compilation celebrates the marvels that make our universe truly unique. Let's delve into some of the most captivating facts across various domains, breaking them down into intriguing categories for a comprehensive overview.

Science and Nature's Miracles

Unbelievable Facts About the Universe

The cosmos is perhaps the ultimate source of wonder, filled with phenomena that challenge our understanding of reality.

- The Universe is Expanding: Space itself is stretching, causing galaxies to drift apart at incredible speeds. The universe is estimated to be about 13.8 billion years old.
- Neutron Stars Are Incredibly Dense: A sugar-cube-sized amount of material from a neutron star would weigh about a billion tons on Earth.
- There Are More Stars Than Grains of Sand: The observable universe contains roughly 1,000,000,000,000,000,000,000,000 stars—more than all the grains of sand on Earth.

Features and Pros:

- Highlights the vastness of space, inspiring awe and curiosity.
- Demonstrates the extremes of physical properties in the universe.
- Encourages scientific exploration and appreciation for the cosmos.

Cons:

- Some facts are difficult to visualize, which may diminish their impact for casual readers.

Remarkable Facts About Animals

Animals are a treasure trove of astonishing adaptations and behaviors.

- Immortal Jellyfish: *Turritopsis dohrnii* can revert to its juvenile form after reaching maturity, effectively avoiding death and potentially living forever under specific conditions.
- Elephants Can Detect Earthquakes: They can sense vibrations from seismic activity hundreds of miles away, allowing early warning for natural disasters.
- Octopuses Have Three Hearts: Two pump blood to the gills, while the third circulates it through the body. Interestingly, the heart pumping blood through the body stops when they swim.

Features and Pros:

- Demonstrates nature's ingenuity and evolution.
- Highlights animals' extraordinary senses and survival strategies.
- Inspires biomimicry and innovation in science and engineering.

Cons:

- Some facts are unsettling or hard to comprehend, like the decoupling of hearts in octopuses.

Historical and Cultural Wonders

Fascinating Historical Facts

History is sprinkled with surprising truths that often challenge our perceptions.

- Cleopatra Lived Closer in Time to the Moon Landing Than to the Construction of the Great Pyramid: Cleopatra VII ruled around 30 BC, whereas the Great Pyramid was built approximately 2,500 BC, and the Moon landing occurred in 1969 AD.
- Oxford University Is Older Than the Aztec Empire: Oxford's teaching began in 1096, while the Aztec civilization rose around the 14th century.
- Woolly Mammoths Were Still Alive When the Great Pyramids Were Built: Some mammoths survived until around 4,000 years ago, overlapping with early Egyptian civilization.

Features and Pros:

- Offers perspective on the vast timeline of human history.
- Connects past civilizations with natural history.
- Sparks interest in archaeological and historical research.

Cons:

- Some facts may seem far removed from modern life, reducing immediacy.

Unique Cultural Facts

Cultures worldwide have developed fascinating traditions, beliefs, and practices.

- Japan Has a Museum Dedicated to Ramen: The Shin-Yokohama Ramen Museum allows visitors to learn about and taste different regional ramen styles.
- In Bhutan, Gross National Happiness Is More Important Than GDP: The country measures success by citizens' happiness and well-being.
- The Largest Wedding Gift Ever Given Was a diamond worth over \$60 million, gifted by a Chinese businessman to his wife.

Features and Pros:

- Highlights cultural diversity and human ingenuity.
- Promotes understanding and appreciation of different societies.
- Offers insights into social values and priorities.

Cons:

- Some facts may seem trivial or superficial without proper context.

Technological Marvels and Innovations

Incredible Facts About Technology

The relentless pace of technological progress continually reshapes our world.

- The First Computer Virus Was Created in 1986: Called "Brain," it was developed by two Pakistani brothers as an anti-piracy measure but ended up spreading globally.
- There Are More Devices Connected to the Internet Than People: As of 2023, over 15 billion devices are connected, from smartphones to smart home appliances.
- The World's First 1 GB Hard Drive Cost \$40,000 in 1980: Today, a 1 TB SSD costs less than \$100, showcasing exponential growth in storage capacity.

Features and Pros:

- Demonstrates rapid technological advancement.
- Highlights how connectivity influences daily life.
- Encourages innovation and digital literacy.

Cons:

- Rapid change can render devices obsolete quickly.
- Privacy and security concerns are heightened with increased connectivity.

Fascinating Facts About Space Exploration

Space missions have yielded astonishing discoveries.

- NASA's Voyager 1 Is the Most Distant Human-Made Object: It's currently over 14 billion miles from Earth and has entered interstellar space.
- A Day on Venus Is Longer Than a Year: Venus takes about 225 Earth days to orbit the Sun but rotates on its axis every 243 Earth days.
- Mars Has the Tallest Volcano in the Solar System: Olympus Mons is about 13.6 miles high, nearly three times taller than Mount Everest.

Features and Pros:

- Inspires curiosity about the universe.
- Expands our understanding of planetary science.
- Inspires future generations of scientists and explorers.

Cons:

- Some facts are abstract or hard to grasp without scientific background.

Human Body and Mind

Strange and Amazing Facts About the Human Body

The human body is an intricate, resilient system full of surprises.

- Your Brain Generates Enough Electricity to Power a Small LED Bulb: It produces about 20 watts of power.
- Humans Share About 60% of Their DNA With Bananas: Reflecting our shared ancestry with all living organisms.
- The Stomach Gets a New Lining Every 3 to 4 Days: To prevent the strong acids from digesting itself.

Features and Pros:

- Reveals the complexity and resilience of human biology.
- Encourages health awareness and curiosity.
- Connects humans to the broader tree of life.

Cons:

- Some facts may be unsettling or gross, like stomach lining renewal.

Mind-Blowing Facts About Human Psychology

The human mind is capable of extraordinary feats.

- Humans Can Recognize Thousands of Faces: Our facial recognition ability is remarkable, and we can remember faces for decades.
- The Placebo Effect Is Powerful: About one-third of patients experience real improvement simply because they believe they are receiving treatment.
- Your Brain Is More Active at Night Than During the Day: Especially in regions related to memory and dreaming.

Features and Pros:

- Sheds light on mental processes and potential.
- Explains psychological phenomena.
- Inspires mindfulness and mental health awareness.

Cons:

- Some psychological facts can be misinterpreted or overgeneralized.

Oddities and Bizarre Facts

Strange Phenomena and Unusual Facts

Sometimes, reality is stranger than fiction.

- There's a Town in Norway Called Hell, and It Freezes Over Every Winter: Despite its name, it's a cold place with beautiful scenery.
- A Group of Flamingos Is Called a "Flamboyance": Reflecting their vibrant color and striking appearance.
- Honey Never Spoils: Archaeologists have found pots of honey in ancient Egyptian tombs that are over 3,000 years old and still edible.

Features and Pros:

- Adds humor and curiosity to everyday life.
- Highlights the diversity and unpredictability of the natural world.
- Sparks interest in travel and exploration.

Cons:

- Some facts are purely trivial with no practical application.

Conclusion: The Power of Knowledge

Exploring 1 000 amazing facts is a reminder of how much there is to learn and marvel at in our universe. Each fact, whether related to science, history, culture, or nature, expands our horizons and fuels our curiosity. These snippets of knowledge not only entertain but also educate, fostering a deeper appreciation for the complexity and diversity of life and the cosmos. Whether you're sharing these facts to impress friends, using them to enhance your understanding, or simply enjoying the wonder of the world around you, the wealth of information contained within these 1,000 facts underscores the endless capacity for discovery that surrounds us. Embrace the curiosity, keep exploring, and remember—there's always more to learn in this incredible universe.

Loaded with fun and knowledge this book is the perfect gift for any young adventure seeker. Studies show kids who read more books do better in school. Get them interested in science, nature, math, engineering, space, dinosaurs, technology, and more! Order now.

1 000 amazing facts: Amazing Facts Odyssey Marcella Gucci, 2024-06-07 Imagine a world where your child's curiosity is constantly fueled, their imagination expanded, and their knowledge enriched—all from the pages of a single book. Introducing Amazing Facts Odyssey: The Ultimate Guide to Interesting Stories, Curious Chronicles, and Obscure Facts About Our World, a must-have treasure trove that promises to captivate, educate, and entertain your child like never before. Unlock a Universe of Unbelievable Wonders In a world inundated with screens and digital distractions, Amazing Facts Odyssey offers a refreshing escape into the realm of the extraordinary. This book is not just a collection of facts; it's an odyssey through the most mind-boggling and awe-inspiring realities our world has to offer. From the heartbeats of blue whales that can be heard miles away to the regenerative powers of axolotls, your child will embark on a journey that transcends the ordinary and delves deep into the extraordinary. Fuel Their Passion for Learning Every page of Amazing Facts Odyssey is meticulously crafted to ignite your child's passion for learning. The book's unique blend of historical truths, scientific marvels, and quirky anecdotes ensures that there's something to pique the interest of every young reader. Whether it's exploring the mysteries of the Mariana Trench, understanding the complexities of human biology, or marveling at the obscure facts about our planet, your child will be constantly engaged and eager to learn more. Enhance Critical Thinking and Curiosity In an age where critical thinking is more important than ever, Amazing Facts Odyssey stands out as a valuable educational tool. The book's rich content challenges young minds to think beyond the obvious, question the status quo, and develop a deeper understanding of the world around them. With chapters dedicated to topics like Unlocking the Unbelievable, Crazy Travel Stories, and Intriguing Animal Facts, your child will learn to appreciate the nuances and complexities of our world in a fun and engaging way. Foster a Love for Reading One of the greatest gifts you can give your child is a love for reading. Amazing Facts Odyssey is designed to captivate young readers from the very first page. The book's lively narrative, combined with its symphony of sentence variations and bursts of fascinating information, ensures that your child will be hooked and hungry for more. By fostering a love for reading, you're setting the foundation for a lifelong habit that will benefit your child academically and personally. Bonus Download for Continued Exploration As a special bonus, Amazing Facts Odyssey includes a free additional book download, offering even more content for your child to explore. This exclusive bonus ensures that the journey of discovery doesn't end with the last page of the book but continues to inspire and educate your child long after they've finished reading.

1 000 amazing facts: 1000+ Interesting and Mind Blowing Facts For Curious Minds Dave Quillon, 2023-12-10 Great Gag Gifts For Teens, Men and Women! Discover a World of Fun: 1000+ Mind-Blowing Facts for Curious Minds - The Ultimate Trivia to Amaze Your Friends Looking for a treasure trove of excitement that will make your young reader the superstar of any conversation? Look no further! 1000+ Mind-Blowing Facts for Curious Minds is your child's ticket to a world brimming with wonder and oddities. Stuffed with over a thousand snippets of knowledge, it's the perfect companion for any youngster eager to learn and share. Why This Book Is the Perfect Gift: Unending Fun: With topics ranging from the edge of the universe to the depths of the ocean, fashion trends to cultural oddities, this book packs in more than a thousand facts that keep the joy of discovery alive. Engaging and Educational: Created with young readers in mind, the easy-to-follow format ignites a love for reading and learning, paving the way for a lifelong journey of exploration. Interactive Experience: Designed to double as a game, it invites kids to dive into trivia that educates as it entertains, perfect for family game nights or solo play. Endless Variety: Covering science, history, arts, sports, and beyond, every page offers a new opportunity to learn something

unexpected and fascinating. Inside These Pages, Young Minds Will Uncover: The curious origins of everyday concepts like numbers and currency. The awe-inspiring details of cosmic events like the Big Bang. Time-traveling insights into historical figures and civilizations. Creative explorations into art, fashion, and culture. Surprising and hilarious language quirks and more! Why It's More Than Just Facts: 1000+ Interesting and Mind-Blowing Facts For Curious Minds isn't just a list; it's a curated experience that challenges young readers to question, discuss, and research. With a smooth blend of profound, playful, and outright peculiar facts, this book stands as a guide and a spark for inquisitive minds. For Solo Discovery or Social Sharing: Alone Time: It's a haven for the solo fact-finder to get lost in the pages of knowledge. Group Fun: Select chapters that cater to the crowd, whether it's family or friends, and launch into a session of shared trivia discovery. The Perfect Way to Grow: Boost not just knowledge but confidence. 1000+ Mind-Blowing Facts for Curious Minds is more than a book; it's a launchpad for future geniuses to impress, express, and excel. By learning a little about a lot, kids expand their horizons and build the foundation to explore even greater topics. So, what are you waiting for? Get your copy, give the gift of knowledge, and watch as those curious little hearts become the most captivating conversationalists in the room.

1 000 amazing facts: *The Big Book of Random Facts Volume 2* Bill O'Neill, 2016-10-04 Don't let puzzle games, trivia nights, or quizzes stump you anymore with their obscure questions! The Big Book of Random Facts is a trivia fact book loaded with funny facts, intriguing facts, and everything in-between. Jam-packed with fascinating, surprising, and amazing tidbits of knowledge, this book will help you quickly become trivia night royalty. The Big Book of Random Facts contains 1000 random facts covering a wide and diverse range of topics including sports, history of the United States and the world, politics, science, literature, pop culture, food and drink, statistics, art, and so much more! Every fact has been thoroughly researched for accuracy, and has been thoughtfully curated to ensure that every page is bursting with interesting facts about the things you've always wondered about. Have you ever been curious about why wine glasses come in different shapes, what Mensa stands for, how many languages Harry Potter has been translated into, or where you could find the largest insect in the world? This book can tell you all of those things and more. Whether you are a veteran of your local trivia scene or preparing for your first pub night, whether you are young, old, or somewhere in the middle, anyone can easily pick up this book and start learning interesting new facts about the world around them. With all the incredible knowledge you will gain from The Big Book of Random Facts, you will impress your friends and family, boost your memory and intelligence, and learn something new every day!

1 000 amazing facts: GENERAL KNOWLEDGE 3: (FOR STANDARD 3) DR. NISHANT SINGH, 2021-01-03 The present age is the age of competition. One has to face challenges in every walk of life. Students of the present era are expected to possess sufficient information relating to various fields of knowledge. Children who lack general knowledge are sure to lag behind even if they are, otherwise, competent. CURRENT GENERAL KNOWLEDGE, a series of books has been prepared keeping this fact in view. The books are prepared in such a way which is sure to teach the learners what they ought to know at each level of their schooling. The materials for various units of these books are judiciously chosen from encyclopedia, year books and textbooks on a variety of subjects. We are sure that the books will surely encourage the learners to know more about the outside world and impart useful knowledge and information necessary for their bright career. The present age is the age of competition. One has to face challenges in every walk of life. 1 000 amazing facts: *101 Amazing Facts About Space* Jack Goldstein, 2013-08-06 In this amazing eBook you can find more than one hundred facts about space. Separated into sections such as our solar system, the moon, the sun, space travel and many more, you will find some fascinating information inside! Whether you are working on an astronomy project or you just want to know more about our incredible universe, this is an excellent addition to your bookshelf. Find the information you need, fast!

Formal proof for $(-1) \times (-1) = 1$ - Mathematics Stack Exchange Is there a formal proof for $(-1) \times (-1) = 1$? It's a fundamental formula not only in arithmetic but also in the whole of math. Is there a proof for it or is it just assumed?

abstract algebra - Prove that $1+1=2$ - Mathematics Stack Exchange Possible Duplicate: How do I convince someone that $1+1=2$? $1+1=2$ may not necessarily be true? I once read that some mathematicians provided a very length proof of $1+1=2$. Can

☐ - ☐

Word 1.1 2.1 1.1 1 2 3
 —

Why is \$1\$ not a prime number? - Mathematics Stack Exchange 49 actually 1 was considered a prime number until the beginning of 20th century. Unique factorization was a driving force beneath its changing of status, since it's formulation is

Formal proof for $(-1) \times (-1) = 1$ - Mathematics Stack Exchange Is there a formal proof for $(-1) \times (-1) = 1$? It's a fundamental formula not only in arithmetic but also in the whole of math. Is there a proof for it or is it just assumed?

abstract algebra - Prove that $1+1=2$ - Mathematics Stack Exchange Possible Duplicate: How

do I convince someone that $1+1=2$ may not necessarily be true? I once read that some mathematicians provided a very length proof of $1+1=2$. Can

What is the value of 1^i ? - Mathematics Stack Exchange There are infinitely many possible values for 1^i , corresponding to different branches of the complex logarithm. The confusing point here is that the formula $1^x = 1$ is

$1^x = 1$ for all x in the complex plane.

$1/8, 1/4, 1/2, 3/4, 7/8$ - Mathematics Stack Exchange This is an arithmetic sequence since there is a common difference between each term. In this case, adding 18 to the previous term in the

Word problem: $1.1 \times 2.1 \times 1.1$ - Mathematics Stack Exchange This is a word problem. The first step is to identify the numbers and the operation. In this case, we have three numbers: 1.1, 2.1, and 1.1. The operation is multiplication. So, we need to calculate $1.1 \times 2.1 \times 1.1$.

factorial - Why does $0! = 1$? - Mathematics Stack Exchange Intending on marking as accepted, because I'm no mathematician and this response makes sense to a commoner. However, I'm still curious why there is 1 way to permute 0 things,

Why is 1 not a prime number? - Mathematics Stack Exchange 49 actually 1 was considered a prime number until the beginning of 20th century. Unique factorization was a driving force beneath its changing of status, since it's formulation is

If $A A^{-1} = I$, does that automatically imply $A^{-1} A = I$? - Mathematics Stack Exchange This is same as AA^{-1} . It means that we first apply the A^{-1} transformation which will take us to some plane having different basis vectors. If we think what is the inverse of A^{-1}

Formal proof for $(-1) \times (-1) = 1$ - Mathematics Stack Exchange Is there a formal proof for $(-1) \times (-1) = 1$? It's a fundamental formula not only in arithmetic but also in the whole of math. Is there a proof for it or is it just assumed?

Why is $1/i$ equal to $-i$? - Mathematics Stack Exchange 11 There are multiple ways of writing out a given complex number, or a number in general. Usually we reduce things to the "simplest" terms for display -- saying 0 is a lot

abstract algebra - Prove that $1+1=2$ - Mathematics Stack Exchange Possible Duplicate: How do I convince someone that $1+1=2$ may not necessarily be true? I once read that some mathematicians provided a very length proof of $1+1=2$. Can
