Sousa, 2003 'This is a book which is a must to be read by those teaching able children and of course parents with children who appear to show giftedness or a high level of talent' - Dr L F Lowenstein, National Association for Gifted Children Newsletter David A Sousa, author of the bestselling How the Brain Learns (2000) and How the Special Needs Brain Learns (2001) presents a new book dealing with gifted and talented students. This book will help answer such questions as: - How are the brains of gifted students different? - What kinds of strategies are particularly effective for students with particular gifts? - What can be done to adequately challenge gifted students in our schools? - What can we do to identify and help gifted students who are underachievers? - How can we identify and help students who are both gifted and learning disabled? Schools have a responsibility to provide for the needs of gifted and talented students--to challenge them so that they may reach their fullest potentials. Offering real strategies for real classrooms, How the Gifted Brain Learns is an indispensable tool for all educators--school administrators, teachers, staff developers, preservice students, and even parents who want to better understand their gifted children, and help them reach exceptional levels of performance.

For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.
