map with turkey and surrounding countries: The Middle East Keshav Bhattarai, Mahmoud Yousef, 2025-03-10 The Middle East and North Africa (MENA) region stands as a remarkable crossroads of tradition and modernity, shaped by millennia of history under empires, colonial powers, and global influences. This book unpacks the intricate dynamics of the region, examining how historical resource exploitation, border manipulation, and cultural impositions have profoundly impacted its languages, traditions, and geopolitical identity. The rich tapestry of Arabic, Farsi, Kurdish, and regional dialects reflects a deep cultural resilience that has resisted globalization, often fueled anti-Western sentiments and prioritized the preservation of heritage over rapid economic development. Central to the region's geopolitical importance is its vast oil wealth, which has positioned MENA as a cornerstone of the global energy market and a continuous focus of Western interest. This book explores how oil exploitation has economically empowered the region while simultaneously fostering political tension, external interventions, and instability. As the global shift toward green technologies accelerates, the book examines how this transition might redefine MENA's role in the global energy market, offering both challenges and opportunities for transformation. These dynamics unfold against the backdrop of water scarcity and a scorching, inhospitable climate that further complicates the region's path forward. Grounded in real-life case studies and an interdisciplinary blend of historical, cultural, and economic analysis, this book offers an unparalleled exploration of the MENA region's past, present, and future in the context of advanced technological development. Co-authored by a Palestinian native, it brings a unique perspective by dissecting ongoing identity crises through unbiased insights and true-life

conversations with individuals who have embraced diverse religious and political ideologies. By intertwining these narratives with the region's deeply rooted cultural practices, the book presents a compelling human lens to understand MENA's complexities. This rare and thought-provoking study seamlessly balances traditional and modern perspectives, emphasizing the MENA region's pivotal role at the intersection of Western powers and the Global South. For readers seeking to grasp the intricate dynamics of a region that continues to influence and adapt to an ever-changing global order, this book serves as an indispensable resource.

map with turkey and surrounding countries: *Dislocating the Orient* Daniel Foliard, 2017-04-13 While the twentieth century's conflicting visions and exploitation of the Middle East are well documented, the origins of the concept of the Middle East itself have been largely ignored. With *Dislocating the Orient*, Daniel Foliard tells the story of how the land was brought into being, exploring how maps, knowledge, and blind ignorance all participated in the construction of this imagined region. Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps. Until then, the region had never been clearly distinguished from "the East" or "the Orient." In the course of their colonial activities, however, the British began to conceive of the Middle East as a separate and distinct part of the world, with consequences that continue to be felt today. As they reimagined boundaries, the British produced, disputed, and finally dramatically transformed the geography of the area—both culturally and physically—over the course of their colonial era. Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being, *Dislocating the Orient* will interest historians of the Middle East, the British empire, cultural geography, and cartography.

Drawing parallels between atrocities committed against the Kurds by the Turkish State, and the racist police brutality, and government sanctioned murders in the UK, James Kelman shatters the myth of Western exceptionalism, revealing the universality of terror campaigns levied against the most vulnerable, and calling on a global citizenship to stand in solidarity with victims of oppression. Kelman's case against the Turkish and British governments is not just a litany of murders, or an impassioned plea—it is a cool-headed take down of the State and an essential primer for revolutionaries.

map with turkey and surrounding countries: Frontex and the Rising of a New Border Control Culture in Europe Antonia-Maria Sarantaki, 2023-03-02 This book examines the rapidly expanding EU agency's distinct role in EU border control, showing that Frontex is a prominent border control actor that reshapes the EU borders by promoting a new border control culture. Bringing culture into the analysis of Frontex, this book offers an alternative in-depth understanding of the agency's function, focusing on the production and diffusion of border control assumptions and practices within a border control community. Based on data drawn from primary research at Frontex and two EU external borders, namely Lampedusa and Evros, this book examines Frontex's

contribution to the emergence of a new border control culture in Europe, replacing the pre-existing Schengen culture. Compared with the existing literature on Frontex, this novel account takes into consideration the evolving nature of borders and border control, discussing three contemporary challenges for the established border control regime: Brexit, the COVID-19 pandemic, and hard security preoccupations, such as the fall-out from the Russian invasion in Ukraine and the weaponisation of migration at the Greek-Turkish land border. Frontex and the Rising of a New Border Control Culture in Europe will appeal to scholars and students of border management, EU studies, migration, geography, international relations, and security, along with policymakers and practitioners with an interest in EU border control and Frontex.

map with turkey and surrounding countries: Migration Crises and the Structure of International Cooperation Jeannette Money, Sarah P. Lockhart, 2019-01-15 Although international cooperation on migration is often promoted, scholars have been unable to arrive at a consensus about the extent of cooperation in the current system. Under what conditions does international cooperation on migration arise, and what shape does it take? These questions are important because migrants are often vulnerable to human rights abuses during their journeys as well as in the country of destination, and international cooperation represents one mechanism for reducing this vulnerability. Jeannette Money and Sarah P. Lockhart ask these questions as they examine the patterns of migration flows during the post- World War II period, with particular attention to crises or shocks to the international system, as in the case of migration following the recent conflicts in Afghanistan and Syria. Their analysis makes several important contributions to this debate. First, they explain how the broad pattern of migration in the contemporary era—generally from poorer, less stable countries to wealthier, more stable countries—fosters cooperation that is predominantly bilateral, when cooperation does in fact occur. Second, they argue that cooperation is unlikely under most circumstances, because countries of destination prefer the current system, which privileges their sovereignty over migration flows. Finally, they posit that cooperation may arise under three conditions: when the costs of maintaining the status quo increase, when countries of origin locate a venue where their numbers allow them to control the bargaining agenda, or when migrant flows tend toward reciprocity.
